Vann,2012-03-20 As long as the human species has existed men and women have had to contend with the unpredictable forces of nature Geographer Barry A Vann brings a unique perspective to this age old struggle in this illuminating overview of human population shifts and their precarious relationship with climate change and geography Vann takes us on a journey along the migration routes of the earliest modern humans and tells why our ancestors chose to settle down in places that can be best described as natural utopias In the religiously oriented worldview of ancient peoples such places took on a sacred aura of divine favor Similarly destructive events such as volcanic eruptions and earthquakes were interpreted as expressions of divine wrath Vann shows how the ancient texts of the Bible and the Qur an offer glimpses of past climates that were distinctly different from the climate of our time He also discusses the rise of technology as a means of controlling the threatening features of the natural world Though technology has enabled humanity to cope with hostile climates it has also created a false sense of security Vann notes that population clusters are increasing in dangerous areas and that no technology can protect vulnerable groups from major category hurricanes tornadoes or earthquakes Finally he considers our current anxieties regarding global warming pointing out that this focus has obscured a good deal of historical and geological evidence for a return of another ice age The Forces of Nature offers a challenging perspective on the precarious balance between fragile human communities and their often threatening environments

**Puritan Islam** Barry A. Vann, 2011-09-27 In this unique analysis of Muslim population shifts in the Western world geographer Barry A Vann provides fresh insights into the theological factors that play into these demographic trends Vann examines the imagined geographies of Muslims with a puritan orientation People with this mind set are little inclined to accept a pluralistic multicultural live and let live concept of society And conflicts between conflicting value systems are almost inevitable Vann notes that this purist approach to Islam is certainly not universal among Muslims and there are many varying interpretations that are more moderate in outlook Nonetheless the undeniable theological background of all Muslim communities colors their values and attitudes and must be taken into consideration when attempting to understand the

potential conflicts between contiguous Muslim and non Muslim groups Given the fact that the population of Muslim immigrants is growing in traditionally Christian and increasingly secular countries of the Western world while the resident populations are either stagnant or declining Vann s insightful analysis of the ways in which Islam influences perceptions of community and geography is of great relevance **2006/2007** ,2011-09-15 Die seit 1971 wieder erscheinende interdisziplinäre internationale Rezensionbibliographie IBR ist eine einmalige Informationsquelle Die Datenbank weist über 1,1 Millionen vornehmlich die Geistes und Sozialwissenschaften berücksichtigende Buchrezensionen in 6.000 vorwiegend europäischen wissenschaftlichen Zeitschriften nach 60.000 Eintragungen kommen jedes Jahr hinzu bieten dem Benutzer Daten zum rezensierten Werk und zur Rezension **Open Educational Resources (OER) Pedagogy and Practices** Zhou, Molly Y.,2019-11-29 Access to learning materials has been an issue within education that has had a profound impact on student outcomes and equality among students New strategies for promoting more equal access to these materials began within institutions of higher learning and can be adapted at lower levels to facilitate equity within educational systems Open Educational Resources OER Pedagogy and Practices is a comprehensive research publication that explores open access to educational materials and its impact on educational cost educational equity and poverty Featuring a range of topics such as instructional design pedagogy and gamification this book is essential for teachers curriculum developers instructional designers principals school boards educational professionals academicians professors administrators educational policymakers researchers and educational agencies **Dragons and Tigers** Barbara A.
