

**TEST OUT
THE SAKAMOTO
METHOD!**

A fruit stall sells its pear at 70¢ and apples at 40¢. Sally bought some pears and Tom bought some apples. Sally spent \$1.10 more than Tom but had 7 less fruits than him.

- a) How much pears did Sally buy?
b) How much money did Tom spend? (PSLE 2011)

Let **①** be the number of apples that Tom bought.

<1> **G. R. (Grasp the relation.)**

$$\begin{array}{c} 70\text{¢} \times \left(\begin{array}{cc} \text{Sally} & \text{Tom} \\ \text{①} & \text{①} \\ -7 & \end{array} \right) \times 40\text{¢} \\ \hline \begin{array}{c} 1 : 1 \\ + \$1.10 \end{array} \end{array}$$

<2> **Diagram**

<3> **Writing**

$$7 \times 70\text{c} = 490\text{c}$$

$$110\text{c} + 490\text{c} = 600\text{c}$$

$$70\text{c} - 40\text{c} = 30\text{c}$$

$$600\text{c} \div 30\text{c} = 20 \longrightarrow \text{①, the number of apples that Tom bought}$$

$$20 - 7 = 13 \longrightarrow \text{the number of pears that Sally bought}$$

$$20 \times 40\text{c} = \$8 \longrightarrow \text{Tom spent}$$

Answer a) 13 b) \$8

Official Gazette of the United States Patent and Trademark Office, 2002 *Index of Patents Issued from the United States Patent and Trademark Office*, 1993 **Index of Patents Issued from the United States Patent Office** United States. Patent Office, 1971 *Complex, Intelligent and Software Intensive Systems* Leonard Barolli, Aneta Poniszewska-Maranda, Tomoya Enokido, 2020-06-10 This book explores three interwoven and challenging areas of research and development for future ICT enabled applications software intensive systems complex systems and intelligent systems Software intensive systems are systems that extensively interact with other systems sensors actuators devices and users More and more domains are now employing software intensive systems e g the automotive sector telecommunication systems embedded systems in general industrial automation systems and business applications Moreover the outcome of web services offers a new platform for enabling software intensive systems Complex systems research is focused on the overall understanding of systems rather than their components Complex systems are very much characterized by the changing environments in which they operate through their multiple internal and external interactions They evolve and adapt through internal and external dynamic interactions The development of intelligent systems and agents which is increasingly characterized by the use of ontologies can be beneficial for software intensive systems and complex systems alike Accordingly recent research in the areas of intelligent systems robotics neuroscience artificial intelligence and the cognitive sciences is essential to the future development of software intensive and complex systems Advances in Networked-based Information Systems Leonard Barolli, Hiroaki Nishino, Tomoya Enokido, Makoto Takizawa, 2019-08-14 This book focuses on the emerging areas of information networking and its applications presenting the latest innovative research and development techniques from both theoretical and practical perspectives Today s networks and information systems are evolving rapidly and there are new trends and applications in information networking such as wireless sensor networks ad hoc networks peer to peer systems vehicular networks opportunistic networks grid and cloud computing pervasive and ubiquitous computing multimedia systems security multi agent systems high speed networks and web based systems However since these networks need to be capable of managing the increasing number of users provide support for different services guarantee the QoS and optimize the network resources a number of research issues and challenges have to be considered in order to provide solutions **Advances in Internet, Data and Web Technologies** Leonard Barolli, Yoshihiro Okada, Flora Amato, 2020-01-30 This book presents original contributions on the theories and practices of emerging Internet data and web technologies and their applicability in businesses engineering and academia The Internet has become the most proliferative platform for emerging large scale computing paradigms Among them data and web technologies are two most prominent paradigms and manifest in a variety of forms such as data centers cloud computing mobile cloud mobile web services and so on Together these technologies form a digital ecosystem based on the data cycle from capturing to processing analysis and

visualization The investigation of various research and development issues in this digital ecosystem is made all the more important by the ever increasing needs of real life applications which involve storing and processing large amounts of data As a key feature the book addresses advances in the life cycle exploitation of data generated from the digital ecosystem and data technologies that create value for businesses moving toward a collective intelligence approach Given its scope the book offers a valuable reference guide for researchers software developers practitioners and students interested in the field of data and web technologies

Advances in Intelligent Networking and Collaborative Systems Leonard Barolli,Hsing-Chung Chen,Hiroyoshi Miwa,2021-08-06 This book provides latest research findings innovative research results methods and development techniques from both theoretical and practical perspectives related to intelligent social networks and collaborative systems intelligent networking systems mobile collaborative systems secure intelligent cloud systems etc as well as to reveal synergies among various paradigms in such a multi disciplinary field intelligent collaborative systems With the fast development of the Internet we are experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm which locates people at the very centre of networks and exploits the value of people s connections relations and collaboration Social networks are also playing a major role in the dynamics and structure of intelligent Web based networking and collaborative systems Virtual campuses virtual communities and organizations strongly leverage intelligent networking and collaborative systems by a great variety of formal and informal electronic relations such as business to business peer to peer and many types of online collaborative learning interactions including the emerging e learning systems This has resulted in entangled systems that need to be managed efficiently and in an autonomous way In addition latest and powerful technologies based on grid and wireless infrastructure as well as cloud computing are currently enhancing collaborative and networking applications a great deal but also facing new issues and challenges The principal purpose of the research and development community is to stimulate research that will lead to the creation of responsive environments for networking and at longer term the development of adaptive secure mobile and intuitive intelligent systems for collaborative work and learning

Advances in Intelligent Networking and Collaborative Systems Fatos Xhafa,Leonard Barolli,Michal Greguš,2018-08-25 This book provides the latest research findings and discusses from both theoretical and practical perspectives innovative research methods and development techniques related to intelligent social networks and collaborative systems intelligent networking systems mobile collaborative systems and secure intelligent cloud systems It also presents the synergies among various paradigms in such a multi disciplinary field of intelligent collaborative systems With the rapid development of the Internet we are experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm which locates people at the very centre of networks and exploits the value of individuals connections relations and collaboration Social networks are also playing a major role in the dynamics and structure of intelligent Web based networking and collaborative systems Virtual

campuses virtual communities and organizations strongly leverage intelligent networking and collaborative systems by means of a great variety of formal and informal electronic relations such as business to business peer to peer and various types of online collaborative learning interactions including the emerging e learning systems This has resulted in entangled systems that need to be managed efficiently and autonomously In addition the latest powerful technologies based on grid and wireless infrastructure as well as cloud computing are currently enhancing collaborative and networking applications significantly but are also facing new issues and challenges The principal purpose of the research and development community is to stimulate research that will lead to the creation of responsive environments for networking and in the longer term the development of adaptive secure mobile and intuitive intelligent systems for collaborative work and learning

Reproductive Neuroendocrinology and Social Behavior Ishwar S. Parhar,Tomoko Soga,Sonoko Ogawa,2016-10-12 Anti social behaviors and social deficits induced mental disorders are critical problems in our society today Social behaviors and interactions are shaped by experience hereditary components genes hormones and neuropeptides and environmental factors photoperiods and metabolic signals In addition to the classical gonadotropin releasing hormone RFamide peptides kisspeptin and gonadotropin inhibiting hormone are emerging as important regulators of the reproductive axis These neuropeptides are evolutionarily conserved and are regulated by environmental factors In this Research Topic we advocate more recent advances in reproductive neuropeptides and sex steroids in the domains of social behavior including sexual and parental behavior aggression stress and anxiety Using multiple species model we also review how genes and the neuroendocrine system interact at the cell and organismic levels to contribute to social behavior in particular the epigenetic genomic changes caused by early life environment We provide comprehensive insights of distinct neural networks and how cellular and molecular events in the brain regulate social behavior from a comparative perspective **Tempo** ,2001

Multimedia Information Systems in Practice Wing S. Chow,1999 With the help of advanced technology in telecommunications the benefits of multimedia applications have become even more significant than when it was used as just as a form for strategic advantage by individuals The International Conference on Multimedia and Telecommunications Management held December 17 19 1998 highlights the recent significant research in the areas of multimedia and telecommunications applications in industry This book collects the 58 reviewed papers from 18 countries that were chosen out of 140 submissions for presentation at the conference An introductory paper entitled Multimedia in Facet A Facet of Hong Kong Environment by Wing S Chow et al is included as an introductory chapter to render readers a better understanding of the study subjects This volume is useful for researchers practitioners and students alike for an update on the mosr recent developments in the ever changing and significant field of multimedia and telecommunications Advances on P2P, Parallel, Grid, Cloud and Internet Computing Leonard Barolli,2021-10-19 This book provide latest research findings

innovative research results methods and development techniques from both theoretical and practical perspectives related to P2P grid cloud and Internet computing as well as to reveal synergies among such large scale computing paradigms P2P grid cloud and Internet computing technologies have been very fast established as breakthrough paradigms for solving complex problems by enabling aggregation and sharing of an increasing variety of distributed computational resources at large scale Grid computing originated as a paradigm for high performance computing as an alternative to expensive supercomputers through different forms of large scale distributed computing P2P computing emerged as a new paradigm after client server and web based computing and has shown useful to the development of social networking Business to Business B2B Business to Consumer B2C Business to Government B2G Business to Employee B2E and so on Cloud computing has been defined as a computing paradigm where the boundaries of computing are determined by economic rationale rather than technical limits Cloud computing has fast become the computing paradigm with applicability and adoption in all application domains and providing utility computing at large scale Finally Internet computing is the basis of any large scale distributed computing paradigms it has very fast developed into a vast area of flourishing field with enormous impact on today s information societies serving thus as a universal platform comprising a large variety of computing forms such as grid P2P cloud and mobile computing
