Edwards Family Ann McReynolds Bush,2004 **Humans and Hyenas** Keith Somerville,2021-03-18 Humans and Hyenas examines the origins and development of the relationship between the two to present an accurate and realistic picture of the hyena and its interactions with people The hyena is one of the most maligned misrepresented and defamed mammals It is still despite decades of research led knowledge seen as a skulking cowardly scavenger rather than a successful hunter with complex family and communal systems Hyenas are portrayed as sex shifting deviants grave robbers and attackers of children in everything from African folk tales through Greek and Roman accounts of animal life to Disney s The Lion King depicting hyenas with a lack of respect and disgust despite the reality of their behaviour and social structures Combining the personal in depth mining of scientific papers about the three main species and historical accounts Keith Somerville delves into our relationship with hyenas from the earliest records from millennia ago through the accounts by colonisers to contemporary coexistence where hyenas and humans are forced into ever closer proximity due to shrinking habitats and loss of prey Are hyenas fated to retain their bad image or can their amazing ability to adapt to humans more successfully than lions and other predators lead to a shift in perspective This book will be of great interest to students and scholars in the environmental sciences conservation biology and wildlife and conservation issues **Literature as a Lens for Climate Change** Rebecca L. Phillips,2016-10-19 From its origins in academic discourse in the 1970s to our collective imagination today the concept of rape culture has resonated in a variety of spheres including television gaming comic book culture and college campuses Beyond Blurred Lines traces ways that sexual violence is collectively processed mediated negotiated and contested by exploring public reactions to high profile incidents and rape narratives in popular culture The concept of rape culture was initially embraced in popular media mass media social media and popular culture and contributed to a social understanding of sexual violence that mirrored feminist concerns about the persistence of rape myths and victim blaming However it was later challenged by skeptics who framed the concept as a moral panic Nickie D Phillips documents how the conversation shifted from substantiating claims of a rape culture toward growing scrutiny of the prevalence of sexual assault on college campuses This in turn renewed attention

toward false allegations and away from how college enforcement policies fail victims to how they endanger accused young men Ultimately she successfully lends insight into how the debates around rape culture including microaggressions gendered harassment and so called political correctness inform our collective imaginations and shape our attitudes toward criminal justice and policy responses to sexual violence

 Michael Brown writes with clarity and courtesy as he confronts one of the most explosive issues among all those who uphold
 the Bible as the plumb line of truth David Shibley Eighteenth-Century Conservatism in Christianity and Islam Ralph A.
 Leo,2024-06-28 This book examines the world of religious conservatism in Christianity and Islam through a comparison of
 two eighteenth century traditionalist icons Jonathan Edwards and Mu ammad Ibn Abd al Wahh b Spanning the globe from
 America to Arabia this book explores the major themes in the lives and works of these most unlikely of bedfellows the
 Reverend and the Shaykh In many ways Edwards and Ibn Abd al Wahh b are about as far apart as two figures could possibly
 be Without minimizing their very real differences however this comparative study finds numerous parallels that beckon even
 the most conservative of Christians and Muslims to take a second look at their own faith as well as the faith of the other The
 numerous surprising congruences in the worlds of the Reverend and the Shaykh as well as in their conceptions of God
 humanity and the faith of the other suggest that we stand much to gain from a reassessment of long held views that could
 lead to wholly new patterns of engagement With implications in diverse fields such as politics law philosophy theology history
 warfare and anthropology this book unearths striking parallels in Edwards and Ibn Abd al Wahh b that have heretofore gone
 unnoticed or largely ignored **(K)information** Maren Klotz,2014-05-15 Openness about gamete i e sperm or egg donation
 and the regulation of donor anonymity or non anonymity are new phenomena How do affected families clinics and regulators
 deal with information about the donors and the donation in Germany and Britain And how does this knowledge management
 contribute to the making and doing of kinship Addressing these questions through an ethnographic exploration this book
 makes a comparative contribution to the empirical and theoretical analysis of kin formation and social change in plural late
 modern societies in Europe The research demonstrates a contemporary re negotiation of the values of privacy information
 sharing and connectedness with transparency as moral imperative not genetics Instead of an unambiguously discernible
 geneticisation the findings on donor non anonymity and parental openness display a pattern of transparentization In
 ensemble a shift of authority becomes evident more minute in Germany than in Britain towards concerned groups parents by
 donation and policy makers away from a sometimes high handed reproductive medical profession Brain-Computer

Global Justice, Natural Resources, and Climate Change Megan Blomfield,2019-05-16 To address climate change fairly many conflicting claims over natural resources must be balanced against one another This has long been obvious in the case of fossil fuels and greenhouse gas sinks including the atmosphere and forests but it is ever more apparent that responses to climate change also threaten to spur new competition over land and extractive resources This makes climate change an instance of a broader more enduring and for many all too familiar problem the problem of human conflict over how the natural world should be cared for protected shared used and managed This work develops a new theory of global egalitarianism concerning natural resources rejecting both permanent sovereignty and equal division which is then used to examine the problem of climate change It formulates principles of resource right designed to protect the ability of all human beings to satisfy their basic needs as members of self determining political communities where it is understood that the genuine exercise of collective self determination is not possible from a position of significant disadvantage in global wealth and power relations These principles are used to address the question of where to set the ceiling on future greenhouse gas

emissions and how to share the resulting emissions budget in the face of conflicting claims to fossil fuels climate sinks and land It is also used to defend an unorthodox understanding of responsibility for climate change as a problem of global justice based on its provenance in historical injustice concerning natural resources
