Developing Sustainable Agriculture in Pakistan Iqrar Ahmad Khan,Muhammad Sarwar Khan,2018-04-17 Agriculture plays a pivotal role in the economy and development of Pakistan providing food to consumers raw materials to industries and a market for industrial goods Unfortunately agricultural production is stagnant due to several barriers including a fixed cropping pattern reliance on a few major crops a narrow genetic pool poor seed quality and a changing climate In addition the high cost of production weak phytosanitary compliance mechanisms and a lack of cold chain facilities makes Pakistan agriculturally uncompetitive in export markets Despite all these issues agriculture is the primary industry in Pakistan and small farmers continue to dominate the business Small farmers grow crops for subsistence under a fixed cropping pattern and a holistic approach is required to develop agriculture to improve the livelihoods of the rural populace This book presents an exhaustive look at agriculture in Pakistan Chapters provide critical analyses of present trends inadequacies in agriculture strategic planning improvement programs and policies while keeping in view the natural resources plant and animal related agricultural production technologies input supplies population planning migration and poverty and balanced policies on finance credit marketing and trade

The Making of Pakistani Human Bombs , Khuram Iqbal,2015-10-30 A multi level analysis of Pakistani human bombs reveals that suicide terrorism is caused by multiple factors with perceived effectiveness vengeance poverty and religious fundamentalism playing a varying role at the individual organizational and environmental levels Nationalism and resistance to foreign occupation appear as the least relevant factors behind suicide terrorism in Pakistan The findings of this research are based on a multi level analysis of suicide bombings incorporating both primary and secondary data In this study the author also decodes personal demographic economic and marital characteristics of Pakistani human bombs On average Pakistani suicide bombers are the youngest but the deadliest in the world and more than 71 percent of their victims are civilians Earlier concepts of a weak link linking terrorism with poverty and illiteracy do not hold up against the recent data gathered on the post 9 11 generation of fighters in Pakistan in suicidal and non suicidal categories as the majority of fighters from a variety of terrorist organizations are economically deprived and semi literate The majority of Pakistani human bombs come from rural backgrounds with very few from major urban centres Suicide bombings in

Pakistan remain a male dominated phenomenon with most bombers being single men Demographic profiling of Pakistani suicide bombers based on a random sample of 80 failed and successful attackers dents the notion that American drone strikes play a primary role in promoting terrorism in all its manifestations The study concludes that previous scholarly attempts to explain suicide bombings are largely based on Middle Eastern data thus their application in the case of Pakistan can be misleading The Pakistani case study of suicide terrorism demonstrates unique characteristics hence it needs to be understood and countered through a context specific and multi level approach
