General Guidelines	Page 1
Research Statement of Purpose	Page 2

### General Guidelines

#### **1) Before you start writing, be clear in your own mind as to the objectives of writing this statement**

A statement of purpose is generally used to convince the admissions committee that you are suitable for the course applied for. Clarify why you think you are suitable for this course, why you would do well in it, and how your previous experiences are relevant and strengthen your position as an applicant. You should also consider your own skills, your strengths and weakness, your motivations and your future plans.

Always keep in mind the purpose of the statement of purpose while writing it, making sure that no superfluous information is included. Remember that while you may wish to reinforce certain parts of your CV, overdoing on repetition is not going to be very useful.

Also keep in mind your readers and consider what they are looking for and how you think you fit in.

#### **2) Draft a Table of Content for your Statement**

Consolidate your thoughts into specific sub-topics. The following are typical areas that need to be addressed:

- Your motivations behind your application
- Your reasons for choosing the course that you've chosen
- How you think you are prepared for undertaking the course (you can mention here not only academic preparations, but also any extracurricular activities that have given you skills and knowledge that will be useful for the course)
- Your reasons for choosing the institution
- What are your plans after your study and how does doing this course fit in these plans

If there are any inconsistencies in your records or examination results, you may write a couple of lines to justify yourself. Remember to follow up any potentially negative points with positive statements of your abilities and strengths.

## **Handbook of Research on Lessons Learned From Transitioning to Virtual Classrooms During a Pandemic**

Thornburg, Amy W., Ceglie, Robert J., Abernathy, Dixie F., 2021-05-14 Online instruction is rapidly expanding the way administrators and educators think about and plan instruction. In addition, due to a pandemic, online instructional practices and learning in a virtual environment are being implemented with very little training or support. Educators are learning new tools and strategies at a quick pace and often on their own, even through resistance. It is important to explore lessons learned through the pandemic, but also of importance is sharing the virtual classroom options and instruction that align to best practices when transitioning to online instruction. Sharing these will allow educators to understand and learn that virtual instruction can benefit all, even when not used out of need, and can enhance face-to-face courses in many ways. The Handbook of Research on Lessons Learned From Transitioning to Virtual Classrooms During a Pandemic is a critical reference that presents lessons instructors have learned throughout the COVID-19 pandemic, including what programs and tools were found to be the most impactful and useful, and how to effectively embed virtual teaching into face-to-face teaching. With difficult choices to be made and implemented, this topic and collection of writings demonstrates the learning curve in a state of survival, and also lessons and resources learned that will be useful when moving back to face-to-face instruction as a tool to continue to use. Highlighted topics include the frustrations faced during the transition, lessons learned from a variety of viewpoints, resources found and used to support instruction, online learner perspectives, and thoughts on course content and best practices in transitioning to online instruction. This book is ideal for teachers, principals, school leaders, instructional designers, curriculum developers, higher education professors, pre-service teachers, in-service teachers, practitioners, researchers, and anyone interested in developing more effective virtual and in-classroom teaching methods.

McGregor,2017-10-25 Understanding and Evaluating Research A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question the use of theory in the study the methods used and how the outcomes are reported The book starts with what it means to be a critical and uncritical reader of research followed by a detailed chapter on methodology and then proceeds to a discussion of each component of a research article as it is informed by the methodology The book encourages readers to select an article from their discipline learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report

Ancient World: Lesson Overviews, 5th ed. , *Journal Article Writing and Publication* Sharon A. Gutman,2024-06-01 The ability to demonstrate that a specific health care profession provides valuable and effective services that meet society s health needs is a major objective for all health care academicians and researchers Such skills are critical to ensure service reimbursement from an increasingly small pool of health care dollars Demonstrating clinical effectiveness depends on the reporting of written research results through journal publication so that the health care community and larger society will be able to access and read evidence supporting health care services Today several clinical reporting standard guidelines have been created by researchers to enhance the ability of readers to evaluate the quality and value of studies Journal Article Writing

and Publication is the first text to compile those clinical research reporting standards in one source and helps educators and novice researchers to better understand the skills needed for journal publication. Health care researchers must begin using these reporting standards in order to write manuscripts that are both correctly formatted and transparently convey all critical study strengths and limitations. Educators must teach these reporting standards to students who must evaluate research reports as consumers and possible future contributors to the literature through their own writing.

**Journal Article Writing and Publication** by Dr Sharon A Gutman, a former editor of the American Journal of Occupational Therapy, provides specific guidelines based on the most commonly accepted reporting standards for the preparation and writing of general research studies, intervention effectiveness studies, instrument development and testing studies, and case reports. A section is devoted to helping authors understand the rules governing the reporting of statistical data in text and tables. Separate sections help authors understand the manuscript preparation and submission process, the revision process, and the etiquette guiding communication with editors and reviewers. Guidelines for the preparation of scholarly discussion papers and editorials are also provided. *Journal Article Writing and Publication* also features a section that aims to help doctoral students and newly minted faculty turn academic work and dissertations into publishable journal articles. Suggestions are provided to help clinicians turn clinical data into research databases that could serve as the foundation for pilot studies. Finally, information is provided to help authors better understand the ethical considerations of publication, including plagiarism, dual submissions, inappropriate authorship, copyright, and conflict of interest.

***Virtual Work and Human Interaction Research*** Long, Shawn, 2012-04-30. *Virtual Work and Human Interaction Research* uses humanistic and social scientific inquiry to explore how humans communicate, behave, and navigate in their new virtual work spaces, providing scholars and practitioners an opportunity to study virtual work from quantitative and qualitative research approaches. The book explores informal and formal communication, emotional, psychological, and physical labor, rewarding and punishing virtual work behaviors, group decision making, socializing, and organizational change in a workplace without the physical and nonverbal cues that are taken for granted in traditional face-to-face work arrangements.

***Single Case Research Methodology*** Jennifer R. Ledford, David L. Gast, 2014-03-26. In this anticipated new edition of *Single Case Research Methodology*, David L. Gast and Jennifer R. Ledford detail why and how to apply standard principles of single case research methodology to one's own research or professional project. Using numerous and varied examples, they demonstrate how single case research can be used for research in behavioral and school psychology, special education, speech and communication sciences, language and literacy, occupational therapy, and social work. This thoroughly updated new edition features two entirely new chapters on measurement systems and controversial issues in single subject research, in addition to sample data sheets, graphic displays, and detailed guidelines for conducting visual analysis of graphic data. This book will be an important resource to student researchers, practitioners, and university faculty who are interested in answering applied research questions and objectively
