RHETORICAL CRITICISM

Tens of thousands of students at more than 300 colleges and universities have learned the exciting art of rhetorical criticism from previous editions of this exceptionally accessible text.

Understanding the processes of rhetorical criticism—the systematic investigation and explanation of symbolic acts and artifacts—creates opportunities for more effective communication. When we are aware of the various options available in the construction of messages and how they function to produce effects, we have the tools needed to question the messages in artifacts rather than responding uncritically.

Sonja Foss, who has an enviable talent for synthesizing complex rhetorical concepts and processes into clear explanations, presents nine methods of rhetorical criticism. She carefully explains and illustrates the theory behind each method with abundant examples of applications. Interesting and lively essays, some written by students, encourage readers to develop their critical skills. Useful bibliographies list additional samples for each type of criticism.

Rhetorical criticism is not a process confined to a few assignments in a rhetorical or media criticism course. It is an everyday activity we can use to understand our responses to symbols of all kinds and to create our own symbols to generate the responses we desire.

on American Public Address Martin J. Medhurst, 2020-08-26 This volume traces the historical evolution of American academic thought concerning public address what it is how it ought to be studied and what can be learned by engaging rhetorical texts in an analytical fashion To begin one must distinguish among three separate but interrelated uses of the term public address as practice theory and criticism The essays in this volume represent landmarks in the literal sense of that term they are marks on the intellectual landscape that indicate where scholars and ideas have passed and in that passing left a mark for future generations It is appropriate to revisit the landmarks that have set public address off as a field of study and it allows readers to remember the struggles that have led to the current situation Most of the authors of the following chapters are deceased but their ideas live on transformed adapted modified rejected and reborn The scholarly dialectic continues What constitutes a study in public address how best to approach rhetorical texts which analytical tools are required for the job how best to balance text with context and what role ought theory to play in the conduct or outcome of critical inquiry these questions live on To answer them at all is to engender debate and that is how it should be if the intellectual vitality of public address is to be maintained The papers are a prolegomenon to such studies for they mark where scholars have been and point the way to where they still must go **Speech Communication** Gerald M.
