Faith Physics Nathan V. Hoffman, 2021-03-15 Faith Physics is a new Theory of Everything ToE combining ancient spiritual wisdom and modern quantum physics findings to deliver a belief system that is both intellectually sound and spiritually satisfying It maintains an ineffable Supreme Consciousness is the catalyst of all material creation as a great thought through pure white light in zero point morphogenetic quantum fields Faith Physics claims that consciousness is the cornerstone of base reality

existing in a timeless state of now By using the natural cause and effect laws of classical physics the uncertainty principle of quantum mechanics and dark matter energy Faith Physics posits pure consciousness manifests physical creation in a remarkable myriad of forms In the wave particle duality paradigm revealed by quantum mechanics conscious observation transforms light energy into particulate physical matter as condensed or frozen light in accordance with Albert Einstein's famous  $E=mc^2$  equation Faith Physics teaches us we exist and thrive in a unified participatory universe emanating from an eternal Supreme Consciousness source and we are not just a product of random chance evolution In the 21st century religion and science are reaching an enlightened consensus that pure metaphysical consciousness is perpetually painting a picture on the space time continuum canvas depicting a miraculous cycle of physical creation entropy and cosmic rebirth *Exploring 1 Corinthians* John Phillips, 2001-11 John Phillips writes with enthusiasm and clarity cutting through the confusion and heretical dangers associated with Bible interpretation Moody Magazine

**Modern Physics and Ancient Faith** Stephen M. Barr, 2003-02-28 A considerable amount of public debate and media print has been devoted to the war between science and religion In his accessible and eminently readable new book Stephen M Barr demonstrates that what is really at war with religion is not science itself but a philosophy called scientific materialism Modern Physics and Ancient Faith argues that the great discoveries of modern physics are more compatible with the central teachings of Christianity and Judaism about God the cosmos and the human soul than with the atheistic viewpoint of scientific materialism Scientific materialism grew out of scientific discoveries made from the time of Copernicus up to the beginning of the twentieth century These discoveries led many thoughtful people to the conclusion that the universe has no cause or purpose that the human race is an accidental by product of blind material forces and that the ultimate reality is matter itself Barr contends that the revolutionary discoveries of the twentieth century run counter to this line of thought He uses five of these discoveries the Big Bang theory unified field theories anthropic coincidences Gödel's Theorem in mathematics and quantum theory to cast serious doubt on the materialist's view of the world and to give greater credence to Judeo Christian claims about God and the universe Written in clear language Barr's rigorous and fair text explains modern physics to general readers without oversimplification Using the insights of modern physics he reveals that modern scientific discoveries and religious faith are deeply consonant Anyone with an interest in science and religion will find Modern Physics and Ancient Faith invaluable *Science & Christianity* Richard F. Carlson, 2000-08-31 Six contributors here debate the relative merits of four distinct conceptions of the relationship between Christianity and science today Views range from a strict creationist posture to full fledged partnership Edited by Richard F Carlson

*Measuring the Universe* Kitty Ferguson, 2013-01-31 Suppose you and I still wondered whether all of the pinpoints of light in the night sky are the same distance from us Suppose none of our contemporaries could tell us whether the Sun orbits the Earth or vice versa or even how large the Earth is Suppose no one had guessed there are mathematical laws underlying the motions of the heavens How would how did anyone begin to discover these numbers and

these relationships without leaving the Earth What made anyone even think it was possible to find out how far without going there In Measuring the Universe we join our ancestors and contemporary scientists as they tease this information out of a sky full of stars Some of the questions have turned out to be loaded and a great deal besides mathematics and astronomy has gone into answering them Politics religion philosophy and personal ambition all have played roles in this drama There are poignant personal stories of people like Copernicus Kepler Newton Herschel and Hubble Today scientists are attempting to determine the distance to objects near the borders of the observable universe far beyond anything that can be seen with the naked eye in the night sky and to measure time back to its origin The numbers are too enormous to comprehend

Nevertheless generations of curious people have figured them out one resourceful step at a time Progress has owed as much to raw ingenuity as to technology and frontier inventiveness is still not out of date

**The Atheist's Fatal Flaw** Norman L. Geisler, Daniel J. McCoy, 2014-06-10 Most critiques of atheism focus on refuting head on the claims of atheists Instead this unique book faithfully represents what atheists say they believe and stands back to watch as the natural inconsistencies in that worldview inevitably rise to the surface Norman L Geisler the apologetic giant of our time is joined by Daniel J McCoy highlighting two inconsistencies in particular First they examine the atheist's assertion that God cannot exist because there is evil in the world and that if God truly existed he would intervene These same people then turn around and say any intervention on God's part would impose upon human autonomy and thus would be unjust Second these very interventions that would be considered immoral if imposed upon the earth by God are lauded when they stem instead from some human institution or authority Geisler and McCoy highlight this kind of doublethink step by step showing readers how to identify such inconsistencies in atheistic arguments and refute them or rather show atheists how they refute themselves

**The Natural History of Creation** M. Corey, 1995-05-09 The Natural History of Creation is the third and final installment in M A Corey's natural theology series This remarkable trilogy the first of its kind in this century has worked in tandem with the findings of modern science to help spearhead the rebirth of the natural theology movement around the world Nowhere will the reader find a more thorough description of the many breathtaking parallels between our modern scientific picture of the creation of the universe and the poetic description of the creation in Genesis One Contents The Scientific Accuracy of Genesis One The Rise of Humanity Physical Anthropology and Intelligent Design God and the Nature of Time Morality and Evolution Human Nature and the Divine Image Genesis and Moderate Anthropocentrism A Self Created Universe Frank Tipler's Omega Point Theory Divine Action and the Role of Natural Processes A Contrived World Evolution and the Nature of the Miraculous Is Life an Accident On the Validity of Natural Theology A Scientific Interpretation of the Divine Nature Epilogue Towards a Genuine Religious Ecology

**Revelation Through Science** James G. Martin, 2016-11-09 Revelation through Science is written for the educated non scientist who may be troubled by apparent conflicts between science and religion Are science and faith incompatible Astronomers physicists and biologists have now shown that the more deeply

science probes nature the more it reveals evidence pointing us to God After reviewing concepts from those fields Revelation through Science adds new material from chemistry It describes organic structures that are profoundly vital for life yet too complex for self assembly without some guiding principle It should lift the burden from believers and seekers to realize that science is not the enemy of faith
