Artificial Intelligence and Mobile Services - AIMS 2018 Marco Aiello, Yujiu Yang, Yuexian Zou, Liang-Jie Zhang, 2018-06-20

This book constitutes the proceedings of the International Conference on Artificial Intelligence and Mobile Services AIMS 2018 held as part of SCF 2018 in Seattle WA USA in June 2018 The 20 papers presented in this volume were carefully

reviewed and selected from numerous submissions The papers cover different aspects of mobile services from business management to computing systems algorithms and applications They promote technological technological innovations in research and development of mobile services including but not limited to wireless and sensor networks mobile and wearable computing mobile enterprise and eCommerce ubiquitous collaborative and social services machine to machine and Internet of things clouds cyber physical integration and big data analytics for mobility enabled services Nonlinear PDE's, Dynamics and Continuum Physics J. L. Bona, Katarzyna Saxton, Ralph Saxton, 2000 This volume contains the refereed proceedings of the conference on Nonlinear Partial Differential Equations Dynamics and Continuum Physics which was held at Mount Holyoke College in Massachusetts from July 19th to July 23rd 1998 Models examined derive from a wide range of applications including elasticity thermoviscoelasticity granular media fluid dynamics gas dynamics and conservation laws Mathematical topics include existence theory and stability instability of traveling waves asymptotic behavior of solutions to nonlinear wave equations effects of dissipation mechanisms of blow up well posedness and regularity and fractal solutions The text will be of interest to graduate students and researchers working in nonlinear partial differential equations and applied mathematics *Problems and Solutions in Thermoelasticity and Magneto-thermoelasticity* B. Das, 2016-11-25 This book presents problems and solutions of the mathematical theories of thermoelasticity and magnetothermoelasticity The classical coupled and generalized theories are solved using the eigenvalue methodology Different methods of numerical inversion of the Laplace transform are presented and their direct applications are illustrated The book is very useful to those interested in continuum mechanics Revealing Ecosystem Services Through Geospatial Technologies Onesimo Mutanga, Prem Chandra Pandey, Sandipan Das, Uday Chatterjee, 2025-08-30 This book covers the quantification of forests grasslands and woodlands ecosystem services from the supply side e g regulatory and provisioning services to the demand side including human cultural needs The Millennium Ecosystem Assessment MA 2005 defines ecosystem services as simply the benefits that are derived from ecosystems for human well being Board 2005 The report has documented that ecosystems have contributed more than 50% of the world s GDP However as a result of climate change and anthropogenic impacts about 60% of the world s ecosystem services have been degraded This significant reduction of services has serious consequences on food production climate regulation and net primary production among other services which directly affect human well being In order to appreciate the benefits of various ecosystems to humanity and monitor their degradation a systematic quantification of ecosystem services and their change in both time and space is critical In particular there is a need to characterize the ecological infrastructures processes and ecosystem functions that underpin the ecosystem services in ways that can be evaluated and tracked Potschin and Haines Young 2016 In addition various intervention measures to restore degraded ecosystems require constant and accurate measurement of the ecosystem characteristics in order to assess the benefits of ecological restoration Vegetation in particular provides a number of provisioning forage production food

regulatory climate temperature supporting primary production nutrient cycling and cultural educational recreation ecosystem services as well as biodiversity maintenance Masenyama et al 2022 Remote sensing data contributes significantly to mapping modeling and quantitative valuation of the ecosystem services in a spatially explicit manner It provides an opportunity to use standard protocols at various spatial scales as well as wall to wall mapping of phenomena through time which is critical for monitoring on a continuous basis

Wavelet Methods for Solving Partial Differential Equations and Fractional Differential Equations

Santanu Saha Ray, Arun Kumar Gupta, 2018-01-12 The main focus of the book is to implement wavelet based transform methods for solving problems of fractional order partial differential equations arising in modelling real physical phenomena It explores analytical and numerical approximate solution obtained by wavelet methods for both classical and fractional order partial differential equations

Chemical Solution Synthesis for Materials Design and Thin Film Device Applications

Soumen Das, Sandip Dhara, 2021-01-09 Chemical Solution Synthesis for Materials Design and Thin Film Device Applications presents current research on wet chemical techniques for thin film based devices Sections cover the quality of thin films types of common films used in devices various thermodynamic properties thin film patterning device configuration and applications As a whole these topics create a roadmap for developing new materials and incorporating the results in device fabrication This book is suitable for graduate undergraduate doctoral students and researchers looking for quick guidance on material synthesis and device fabrication through wet chemical routes Provides the different wet chemical routes for materials synthesis along with the most relevant thin film structured materials for device applications Discusses patterning and solution processing of inorganic thin films along with solvent based processing techniques Includes an overview of key processes and methods in thin film synthesis processing and device fabrication such as nucleation lithography and solution processing

Mobile Computing, Applications, and Services Petros Zerfos, Rebecca Montanari, Thomas Phan, 2010-06-08 This proceedings volume includes the full research papers presented at the First International Conference on Mobile Computing Applications and Services MobiCASE held in San Diego California during October 26 29 2009 It was sponsored by ICST and held in conjunction with the First Workshop on Innovative Mobile User Inter tivity WIMUI MobiCASE highlights state of the art academic and industry research work in main topics above the OSI transport layer with an emphasis on complete end to end systems and their components Its vision is largely influenced by what we see in the consumer space today high end mobile phones high bandwidth wireless networks novel consumer and enterprise mobile applications scalable software infrastructures and of course an increasingly larger user base that is moving towards an almost a mobile lifestyle This year s program spanned a wide range of research that explored new features algorithms and infrastructure related to mobile platforms We received submissions from many countries around the world with a high number from Europe and Asia in addition to the many from North America Each paper received at least three in pendent reviews from our Technical Program Committee members during the Spring of 2009 with final results coming out in July As a
