Mariam F. Ayad, 2022-11-15 Cutting edge research by twenty four international scholars on female power, agency, health and literacy in ancient Egypt. There has been considerable scholarship in the last fifty years on the role of ancient Egyptian women in society. With their ability to work outside the home, inherit and dispense of property, initiate divorce, testify in court and serve in local government, Egyptian women exercised more legal rights and economic independence than their counterparts throughout antiquity. Yet their agency and autonomy are often downplayed, undermined or outright ignored. In *Women in Ancient Egypt*, twenty four international scholars offer a corrective to this view by presenting the latest cutting edge research on women and gender in ancient Egypt. Covering the entirety of Egyptian history from earliest times to Late Antiquity, this volume commences with a thorough study of the earliest written evidence of Egyptian women, both royal and non royal, before moving on to chapters that deal with various aspects of Egyptian queens, followed by studies on the legal status and economic roles of non royal women and finally on women's health and body adornment. Within this sweeping chronological range, each study is intensely focused on the evidence recovered from a particular site or a specific time period. Rather than following a strictly chronological arrangement, the thematic organization of chapters enables readers to discern diachronic patterns of continuity and change within each group of women. is continually reinforced through acts of doing redoing and undoing Charting the historical shift away from mind and toward brain and moving fluidly across disciplines from digital art and documentary cinema to cybernetics and radical mental health movements Hilton illuminates the deep interconnections between performance perception and the historical construction of the neurotypical Through close readings of works by William Pope L Mel Baggs Wu Tsang and others Hilton also examines how neurodivergence has been represented embodied and materialized in contemporary art and media Restless engrossing and persistently attuned to moments of rupture when the neurotypical order falters Counter cartographies charts a path toward a more capacious imaginative world Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions

**Animals, Mind, and Matter** Josephine Donovan, 2022-10-01 It's no secret that animals are considered objects in the fields of law commerce and science characterized as property and commodities **Animals Mind and Matter The Inside Story** challenges this ascription and establishes that animals are living subjects who have minds and opinions of their own and care

about what happens to them Donovan contends that animals voices or standpoints should be part of any human decisions concerning their ethical treatment Elaborating on feminist care theory and critical animal standpoint theory the author provides compelling evidence for animal subjectivity exploring in the process the nature of subjectivity and consciousness while drawing from recent developments in quantum and emergence theories that point away from the dominant ontology of Cartesian objectivism Through these explorations Donovan proposes that a new narrative is emerging in the arts and sciences an inside story that re subjectifies natural life and leaves behind the deadening Midas touch of Cartesian objectivism
