Software Architecture. ECSA 2025 Tracks and Workshops Domenico Bianculli, Hassan Sartaj, Vasilios Andrikopoulos, Cesare Pautasso, Tommi Mikkonen, Jennifer Perez, Tomáš Bureš, Martina De Sanctis, Henry Muccini, Elena Navarro, Mohamed Soliman, Uwe Zdun, 2025-10-09 This book constitutes the refereed proceedings of the tracks and workshops which complemented the 19th European Conference on Software Architecture ECSA 2025 held in Limassol Cyprus during September 15-19, 2025. The 13 full papers and 19 short papers presented in this volume were carefully reviewed and selected from 56 submissions. They are grouped into the following topics: Tools and Demos, Tutorial, Doctoral Symposium, 1st International Workshop on AI Assisted Software Architecting (AISA), 5th International Workshop on Agility with Microservices Programming (AMP), 1st International Workshop on Architecting Digital Twin of an Organization (ArchDTO), 12th Workshop on Adaptive and Reconfigurable Systems and Architectures (AROSA), 8th International Workshop on Context-Aware Autonomous and Smart Architectures (CASA), 1st International Workshop on Software Architecture for Data-Intensive Systems (SADIS). *Intellectual Property Modularity in Software Products and Software Platform Ecosystems* Josef Wautl, 2013-06-15 This book examines the impact of Intellectual Property (IP) modular architecture on software products and software platform ecosystems. The presented results are based on a detailed qualitative case study analysis of two software products and two software platforms and on a quantitative study of two software ecosystems. The results extend the existing literature on IP modularity by demonstrating a direct association between IP modular product or platform architecture and the related business models. The analysis also shows that the early consideration of IP-related requirements in the requirements engineering process of software systems can prevent costly and time-consuming re-modularizations. The quantitative analysis in two software ecosystems shows that IP modular platform architecture, which can allow increased openness while still maintaining value appropriation, can increase a platform's attractiveness for complementors. To summarize this book demonstrates the connections between IP management, software architecture, and the respective business models of software product or platform providers. **SAP Malakar Sudipta**, 2019-09-20 **Phases of SAP Activate Methodology** Key features 400 PLUS Real-time SAP Activate SAP S/4HANA Interview questions and answers Numerous Tricky Real-time SAP Activate Case Studies and Demos SAP S/4HANA Approach Guidelines Explore the application scenarios of SAP Activate SAP Activate issues and challenges in large, mid, and small-scale projects and mitigation plan Digital transformation tips and tricks Intelligent enterprise tips and tricks Integration of SAP S/4HANA with machine learning intelligence Description The book promises to make you understand and practise the SAP Activate Framework.
