SAP is a market leader in enterprise business application software SAP solutions provide a rich set of composable application modules and configurable functional capabilities that are expected from a comprehensive enterprise business application software suite In most cases companies that adopt SAP software remain heterogeneous enterprises running both SAP and non SAP systems to support their business processes Regardless of the specific scenario in heterogeneous enterprises most SAP implementations must be integrated with a variety of non SAP enterprise systems Portals Messaging infrastructure Business process management BPM tools Enterprise Content Management ECM methods and tools Business analytics BA and business intelligence BI technologies Security Systems of record Systems of engagement The tooling included with SAP software addresses many needs for creating SAP centric environments However the classic approach to implementing SAP functionality generally leaves the business with a rigid solution that is difficult and expensive to change and enhance When SAP software is used in a large heterogeneous enterprise environment SAP clients face the dilemma of selecting the correct set of tools and platforms to implement SAP functionality and to integrate the SAP solutions with non SAP systems This IBM Redbooks publication explains the value of integrating IBM software with SAP solutions It describes how to enhance and extend pre built capabilities in SAP software with best in class IBM enterprise software enabling clients to maximize return on investment ROI in their SAP investment and achieve a balanced enterprise architecture approach This book describes IBM Reference Architecture for SAP a prescriptive blueprint for using IBM software in SAP solutions The reference architecture is focused on defining the use of IBM software with SAP and is not intended to address the internal aspects of SAP components The chapters of this book provide a specific reference architecture for many of the architectural domains that are each important for a large enterprise to establish common strategy efficiency and balance The majority of the most important architectural domain topics such as integration process optimization master data management mobile access Enterprise Content Management business intelligence DevOps security systems monitoring and so on are covered in the book However there are several other architectural domains which are not included in the book This is not to imply that these other architectural domains are not important or are less important or that IBM does not offer a solution to address them It is only reflective of time constraints available resources and the complexity of assembling a book on an extremely broad topic Although more content could have been added the authors feel confident that the scope of architectural material that has been included should provide

organizations with a fantastic head start in defining their own enterprise reference architecture for many of the important architectural domains and it is hoped that this book provides great value to those reading it This IBM Redbooks publication is targeted to the following audiences Client decision makers and solution architects leading enterprise transformation projects and wanting to gain further insight so that they can benefit from the integration of IBM software in large scale SAP projects IT architects and consultants integrating IBM technology with SAP solutions

Agilität durch ARIS Geschäftsprozessmanagement

August-Wilhelm Scheer, Helmut Kruppke, Wolfram Jost, Herbert Kindermann, 2006-08-11 Geschäftsprozessmanagement hat sich in letzter Zeit zu einem regelrechten Hype Thema entwickelt. Allzu häufig stehen dabei jedoch DV technische Aspekte im Fokus. Die IDS Scheer AG seit über 20 Jahren führendes IT und Beratungshaus in diesem Umfeld steht für einen ganzheitlichen Ansatz. Geschäftsprozessmanagement wird als betriebswirtschaftlich motivierter Zyklus von Strategie über Design und Implementierung bis hin zum Controlling verstanden. Das Buch widmet sich diesem Kreislauf in Theorie und Praxis aus technischer wie aus betriebswirtschaftlicher Sicht. Dabei wird auch auf die ARIS Plattform sowie den methodischen Ansatz von ARIS Value Engineering AVE eingegangen. Über die Highlights der Beiträge sind Fallbeispiele. Das Buch bietet Unternehmen wertvolle Anregungen wie sie ihre eigenen Geschäftsprozesse optimieren und dadurch wettbewerbsfähiger werden. **SAP GTS, Edition for SAP HANA - Einsatz im Arbeitsalltag der Exportkontrolle** Esra Ertas, 2025-07-29 Die

Ausfuhrkontrolle in einem global agierenden Unternehmen ist ein anspruchsvoller Tätigkeitsbereich. Immer wieder ändern sich die Bestimmungen zu Ausfuhr und Einfuhrgenehmigungen, Embargos und Sanktionen. Dabei sind Regelungen aus nationalem, europäischem, US-amerikanischem und internationalem Recht zu beachten. SAP Global Trade Services kurz SAP GTS ist ein mächtiges Werkzeug um sich im Dickicht der Gesetze, Verordnungen und Verträge zurechtzufinden und die Einhaltung aller einschlägigen Rechtsvorschriften zuverlässig und effizient sicherzustellen. In diesem Buch lernen Sie diese Softwarelösung aus Sicht der täglichen Praxis in der Ausfuhrkontrolle kennen. Sie erfahren wie Sie mithilfe von intelligenter Strukturierung von Stammdaten durch Bildung von Längsgruppen oder durch Definition von Findungsstrategien die Verwaltung Ihres Exportwesens sicher in den Griff bekommen und wie Sie Produkte gemäß den internationalen Ordnungsschemata wie Zolltarifnummern klassifizieren. Ausführlich wird erklärt welche Arten von Embargo und Sanktionsbestimmungen es gibt und wie Sie mithilfe von SAP GTS prüfen ob Ihre geplanten Exporte möglicherweise gegen einschlägige Regelungen verstoßen. Schließlich werfen Sie noch einen Blick auf den Prozess der Exportgenehmigung durch das deutsche Bundesamt für Wirtschaft und Ausfuhrkontrolle BAFA. Auch dank zahlreicher praktischer Tipps ist dieses Buch ein wertvoller Helfer in Ihrem Alltag in der Exportkontrolle.
