Watson,Chris H. C. Lyal,Colin A. Pendry,2015-01-08 In an age when biodiversity is being lost at an unprecedented rate it is vital that floristic and faunistic information is up to date reliable and easily accessible for the formulation of effective conservation strategies Electronic data management and communication are transforming descriptive taxonomy radically enhancing both the collection and dissemination of crucial data on biodiversity This volume is written by scientists at the forefront of current developments of floras and faunas along with specialists from applied user groups The chapters review novel methods of research development and dissemination which aim to maximise the relevance and impact of data Regional case studies are used to illustrate the outputs and impacts of taxonomic research Integrated approaches are presented which have the capacity to accelerate the production of floras and faunas and to better serve the needs of a widening audience Close-up and Macro Photography Robert Thompson,2017-09-18 Focusing on fieldcraft techniques for macro and close up photography Thompson covers the vital but often overlooked skills necessary to achieve consistent professional results in the field Case studies covering a broad and often challenging group of subjects from the seashore to your back garden form the core of the lavishly illustrated book Biology life history subject behaviour and ethics along with best practice approaches are discussed in detail and underpinned with photographic tips The book is divided into four sections Digital Fundamentals Fieldcraft Methodology Portfolio Case Studies Digital Workflow Presentation covering the full photographic process from capture through to editing captioning

development and storage are discussed Moving beyond the surface level approach to macro instruction this book provides readers with techniques that work in the field Illustrated with over 250 of the author s own inspiring images this publication is a must for photographers naturalists and anyone interested in improving their macro skills in the field **Identification Guide of Freshwater Macroinvertebrates of Spain** Javier Oscoz, David Galicia, Rafael Miranda, 2011-06-27 As a result of the European Commission s concern for the status of continental waters and as a clear reflection of the notion of water as heritage to be conserved in the year 2000 the Water Framework Directive 2000 60 CE was enacted its goal being to establish a framework to protect water and the different aquatic ecosystems by requiring the Member States to achieve a good ecological status in all their waters by 2015 Like all ecosystems freshwater ecosystems undergo physical chemical and energy related changes both of natural and anthropogenic origin These disturbances affect the organisms living in them and those who utilize their resources Therefore evaluating these changes has become a very important task in order to better understand aquatic systems The study and analysis of the ecological status of these ecosystems in relation to their conservation status and water quality is thus a fundamental tool for a more efficient and rational management of their resources that is a management that does not threaten the ecosystem The present guide for the identification of Spanish freshwater macroinvertebrates aims to facilitate the job of those who go to great lengths to identify them in order to then determine biotic indices It is not the aim of this book to serve as a zoological treaty nor does it claim to add new information on the biology or the ecology of the taxa covered This book is simply a working tool explicitly designed to facilitate the identification of the Spanish macroinvertebrates and the subsequent computing of biotic indices *The Management of Insects in Recreation and Tourism* Raynald Harvey Lemelin, 2013 An insight into the booming industry of insect leisure and tourism using case studies and examples from around the world
