The elegantly combined presentation of the various aspects of financial management and management accounting is a highlight of this text. Focusing on the core areas of financial management, basic concepts of finance, sources of finance, capital structure theories and planning, dividend policies, investment decisions, portfolio management and working capital management as well as the areas of management accounting, changes in financial position, financial statement analysis and inter-firm comparison, budgetary control and standard costing and cost information and management decisions, the book also delves on the contemporary topics such as financial environment, corporate governance and international financial management in detail. In addition, it contains a number of case studies on various areas of finance and management accounting. The current edition has been thoroughly revised, keeping in view contemporary developments in the literature and applicable provisions of the Companies Act 2013. Apart from updating the case studies, new cases have been added to support the relevance and quality of discussion. Firm, Equity Asset, and Fixed Income Securities Valuation Vusani Moyo, 2024-08-12 This textbook begins by introducing the concept of the time value of money and explaining how it is applied in valuation. It then uses practical and easy-to-understand examples to illustrate the application of the time value of money concept in valuing cash flows, annuities and perpetuities. This is followed by an in-depth discussion of the firm's financing sources and the determination of its cost of capital. The remainder of the textbook discusses the valuation of fixed income securities, equity assets and the firm, featuring specific examples and case studies from South Africa, Europe and the Americas. Equity asset and firm valuation approaches discussed include variants of single and multiple stage growth, dividend discount models, free cash flows, residual income and multiple valuation approaches. The practical examples and case studies equip students with the tools they need to apply these valuation approaches. Aimed at upper undergraduate and postgraduate accounting and finance students, this textbook discusses in which context each valuation approach is most appropriate.
