Distance, Rating Systems and Enterprise Finance Franz Flögel, 2018-07-27 In response to the credit crunch during the global financial crisis of 2007 2008 many have called for the re establishment of regional banks in the UK and elsewhere In this context Germany s regional banking system with its more than 1 400 small and regional savings banks and cooperative banks is viewed as a role model in the financing of small and medium sized enterprises SMEs However in line with the death of distance debate the universal application of ICT based scoring and rating systems potentially obviates the necessity for proximity to reduce information asymmetries between banks and SMEs calling into question the key advantage of regional banks Utilising novel ethnographic findings from full time participant observation and interviews this book presents intimate insights into regional savings banks and compares their SME lending practices with large nationwide operating commercial banks in Germany The ethnographic insights are contextualised by concise description of the three pillar German banking system covering bank regulation structural and geographical developments and enterprise finance Furthermore the book advances an original theoretical approach that combines classical banking theories with insights from social studies of finance on the ontological foundation of new realism Ethnographic findings reveal varying distances of credit granting depending on the rating results i e large banks allocate considerable credit granting authority to local staff and therefore challenge the proximity advantages of regional banks Nevertheless by presenting case studies of lending to SMEs the book demonstrates the ability of regional banks to capitalise on proximity when screening and monitoring financially distressed SMEs and explains why the suggestion that ICT can substitute for proximity in SME lending has to be rejected **Rating**

Annual Report United States. Office of the Comptroller of the Currency, 1979 *Central Bank Ratings* Indranarain Ramlall, 2022-07-01 When the global financial crisis broke central banks in both the US and the UK undertook massive asset purchase programmes which resulted in considerable increase in assets Cross border spillover effects were noted across global economies Balance sheet adjustments may eventually gnaw at the profit earning capacities of central banks and in extreme cases negative equity can manifest This updated book investigates a benchmark for comparing central banks The

author employs a unique and large set of metrics to gauge the quality of central banks and presents an argument to reflect upon international best practices covering 124 banks in this latest study The study uses different criteria including the accounting body research presence of stress testing exercises inflation targeting frameworks staff efficiency and languages of communication with the public amongst others The book begins by providing an overview of central banking before exploring some stylized facts about central banks in unique detail It then presents a ratings methodology for worldwide central banks to analyse the results A backtesting exercise is included to validate the quality of the ratings obtained The book concludes by offering insights into the comparison of central banks

People's Republic of China International Monetary Fund. Monetary and Capital Markets Department, 2017-12-26 This paper presents an assessment of the level of observance of the Basel Core Principles for Effective Banking Supervision BCPs in China The China Banking Regulatory Commission CBRC has maintained its momentum in regulation and supervision in the face of exceptional growth in scale and increasing complexity of the banking system The CBRC has also achieved a high degree of compliance with the BCPs However several dimensions of credit risk including treatment of problem assets concentration risk and related party exposures have aspects in which they lag international best practices and standards Failure to resolve these issues may hamper the CBRC in its task of assessing the nature and scale of credit risk in the system and within individual institutions
