## CHAPTER 1 ACCOUNTING IN ACTION

### CHAPTER LEARNING OBJECTIVES

1. ***Explain what accounting is.*** Accounting is an information system that identifies, records, and communicates the economic events of an organization to interested users.
2. ***Identify the users and uses of accounting.*** The major users and uses of accounting are as follows: (a) Management uses accounting information to plan, organize, and run the business. (b) Investors (owners) decide whether to buy, hold, or sell their financial interests on the basis of accounting data. (c) Creditors (suppliers and bankers) evaluate the risks of granting credit or lending money on the basis of accounting information. Other groups that use accounting information are taxing authorities, regulatory agencies, customers, labor unions, and economic planners.
3. ***Understand why ethics is a fundamental business concept.*** Ethics are the standards of conduct by which actions are judged as right or wrong. Effective financial reporting depends on sound ethical behavior.
4. ***Explain accounting standards and the measurement principles.*** Accounting is based on standards, such as International Financial Reporting Standards (IFRS). IFRS generally uses one of two measurement principles, the historical cost principle or the fair value principle. Selection of which principle to follow generally relates to trade-offs between relevance and faithful representation.
5. ***Explain the monetary unit assumption and the economic entity assumption.*** The monetary unit assumption requires that companies include in the accounting records only transaction data that can be expressed in terms of money. The economic entity assumption requires that the activities of each economic entity be kept separate from the activities of its owners and other economic entities.
6. ***State the accounting equation, and define its components.*** The basic accounting equation is:

$$\text{Assets} = \text{Liabilities} + \text{Equity}$$

Assets are resources a business owns. Liabilities are creditors' claims on total assets. Equity is the ownership claim on total assets.

The expanded accounting equation is:

**IAS - International Accounting Standard** Dr. Ashad ullah Qureshi, 2022-06-01 U S private entities considering adoption of International Standards for Small and Medium sized Entities IFRS for SMEs need to understand how the new standards will modify financial reporting However there has been no determination of the significance of the

financial statement impact of changing from United States Generally Accepted Accounting Principles U S GAAP to IFRS for SMEs Without this knowledge private entities in the United States will not be able to make an informed decision as to the benefits or consequences of adopting IFRS for SMEs Based on stakeholder theory this study sought to determine how adoption of IFRS for SMEs would affect the financial reporting of U S private entities Using identified reporting differences between the 2 sets of standards hypothetical 2010 IFRS for SMEs financial statements were prepared for 3 participating entities Analysis of variation between the hypothetical IFRS for SMEs financial statements and the original U S GAAP financial statements provided a means to determine the financial reporting impact of IFRS for SMEs adoption In each of the 3 case studies adoption of IFRS for SMEs did not significantly influence the financial reporting of U S private entities indicating that the communication of financial information would be fundamentally the same using the simplified IFRS for SMEs or the more complex U S GAAP The results of this study suggest that IFRS for SMEs should be considered an acceptable set of standards for the preparation of quality financial statements by U S private entities This study positively contributes to social change by providing new knowledge to assist private companies in the evaluation of the adoption of IFRS for SMEs such knowledge could in turn reduce financial reporting costs and improve the SMEs economic conditions
