**Reverse Phase Flash Chromatography** J. W. Blunt, 1987      [Green Flash Chromatography](#) John Robert Bickler, 2017

Flash chromatography a staple component of medicinal chemistry workflow consumes a lot of organic solvent upwards of 100 million liters annually just in North America. Most if not all of this organic waste is incinerated off site liberating CO<sub>2</sub> into the atmosphere. Because of this environmental impact many pharma companies are instituting requirements to reduce organic solvent waste but leaving the implementation up to their chemistry departments. In this poster we describe several proven ways to reduce organic solvent use without sacrificing purification efficiency.

**Reverse Phase HPFC Protocols & Notes** Adam Ashton Kinion M S, 2019-11-07. The Biotage system and Millipore system are the de facto systems when performing Flash Chromatography. The old Varian company also sold one which was acquired by Agilent and the line dropped. It is more the cartridge than the unit. What I have experienced is the Biotage systems are easier to operate simply set up for production situation better. I would say that most true commercial operations are likely note these places tend to be a bit more than guarded on their operations.
