Multinational Corporations and Foreign Direct Investment Stephen D. Cohen,2007-02-03 Foreign direct investment FDI and multinational corporations MNCs for better and worse play a large and growing role in shaping our world The integrating thesis of this book is the inevitability of heterogeneity in FDI and MNCs and accordingly the imperative of disaggregation Large companies doing business on a global basis increasingly dominate the production and marketing of the world s goods and services The importance of these companies continues to grow while the debate about their nature and effects remains mired in a long standing stalemate couched in strong black and white terms Stephen D Cohen seeks to reconcile this impasse by analyzing multinational corporations and foreign direct investment in an eclectic nuanced manner The core thesis is that an accurate understanding of the nature and impact of these phenomena comes from acknowledging the dominance of heterogeneity perceptions and ambiguity and the paucity of universal truths This approach should contribute significantly to both a better academic understanding and a more productive policy debate of an increasingly important element of the world economy

The Influence of Risk on CDM Cost Effectiveness from the Perspective of EU-ETS Compliance Investors Peter Wiedenhoff, 2011-04-12

While the trading prices of issued Certified Emission Reductions (CERs) within the European Union Emissions Trading Scheme (EU ETS) are transparent there is limited knowledge about the actual origination cost of Clean Development Mechanism (CDM) projects Minimum CER prices required for financial viability of a CDM project idea define a measure for CDM cost effectiveness and indicate the floor price for project participation As CDM projects are located in developing countries they face substantial implementation and performance risks that need to be considered for CDM cost effectiveness calculation As existing studies primarily focus on qualitative risk assessment there is a lack of a monetary evaluation of risk impact on CDM origination cost and CER floor price The present study intends to close this gap and introduces a model for calculation of CDM cost effectiveness taking risks into account from the perspective of EU ETS compliance investors The analysis is based on available CDM project data To ensure comparability of results a standardized project with characteristic technical parameters is defined for every project type and virtually installed in various developing countries For every cluster of project type and host country investment profitability is calculated Associated greenhouse gas (GHG) emission reductions are determined and integrated into the financial analysis As a result the CER floor price specifying CDM cost effectiveness is derived and indicated in Euros (EUR) per CER A simulation based risk model is developed and integrated into the CDM cost effectiveness calculation The risk model considers investment profitability and CER quantity risks and calculates a risk premium to consider the expected financial impact on the CER floor price Risk factors are modeled by fitting probability distributions to underlying base project data Monte Carlo simulation (MCS) results in a distribution of risk adjusted CER floor prices for every project cluster The model is applied to renewable energy technology energy efficiency and methane avoidance projects Risk influence on CDM cost effectiveness is exemplarily analyzed for wind onshore projects landfill gas (LFG) power generation and waste heat recovery (WHR) installations Model output shows that risk has a higher than expected financial impact which may result in risk premiums of up to three digit EUR amounts per CER The study results provide a scientific added value through integration of financial evaluation of risk impact into CDM cost effectiveness calculation The resulting risk-adjusted CER price distributions for CDM cost effectiveness enable the statistical analyses of CER floor prices

Project clusters with CER price expectations below traded market prices can be identified Thus the outcome not only contributes to CDM market understanding It also supports the definition of a CDM investment strategy *Investment In Startups And Small Business Financing* Farhad Taghizadeh-hesary, Naoyuki Yoshino, Chul Ju Kim, Peter J Morgan, Daehee Yoon, 2021-08-03 Successful startups and small businesses can play a significant role in economic growth and job creation They also contribute to economic dynamism by spurring innovation and injecting competition Startups are known to introduce new products and services that can create new value in the economy It is notable that most startups exit within their first ten years and most surviving young businesses do not grow but remain small Startups and small businesses face several obstacles to their development Accessing capital is a crucial constraint on their growth Most startups and small businesses have difficulties getting the funds they need because of their lack of a performance track record and lack of collateral making it difficult for lenders or investors to assess their risk Besides they are in the early stages of development and face a very high possibility of failure which significantly raises financing and investment risk *Investment in Startups and Small Business Financing* provides 12 thematic and case studies on new methods for bringing private investment loans or equity to startups and easing small businesses access to finance debt and capital The contributors are senior level policy experts and researchers from governments think tanks academia and international organizations The chapters are authored in a policy oriented way to be understandable for the readers with a different background This book is a precious source for the governments for adopting the right policies to develop small businesses and startups and valuable for the researchers in economics business and finance **The Business of Criminal Justice** Daniel Adrian Doss, Chengqi Guo, Joo Young Lee, 2011-12-19 Regardless of the type size or mission of a criminal justice or law enforcement organization optimum decision making can be achieved by examining activities and functions from the perspective of traditional business administration Using profit and nonprofit business models *The Business of Criminal Justice A Guide for Theory and Practice* integrates the two philosophies of traditional management and finance and service oriented benefit and demonstrates how success in these organizations is dependent on using the proper business model Topics discussed in this forward thinking volume include The basic characteristics of qualitative and quantitative human decisions that affect law enforcement organizations Management theory and the concepts of controlling coordinating leading organizing and planning Strategic management and long term decisions that affect law enforcement and justice related entities for five or more years Quality management and operations management of law enforcement entities The influences of economics on the administration of law enforcement entities Various aspects of mathematical modeling that influence human decision making to fulfill a stated objective Models that support the expending of funds to benefit the organization and its stakeholders while rendering public service Building relationships between the law enforcement entity and society through marketing branding and advertising Demonstrating how the concepts of business administration influence law enforcement and government organizations this volume is a

critical decision making tool for law enforcement and criminal justice entities ranging from small town sheriff's offices to large federal enterprises

The Business of School Leadership Larry Smith, Dan Riley, 2010-07-01 The role of school principals and their executive staff has changed rapidly and radically over the last decade They are now required to be not only leading educators but also effective business persons The reality is however that most school leaders have little if any formal training for these business roles and very limited personal experience in managing these matters The intention of the book is to assist school leaders in developing the understanding knowledge and skill of business processes that they need to perform this new role effectively
