Formulation Of Shampoo From Keratin Protein Atikah Bt Mad:

Formulation of Shampoo from Keratin Protein Atikah Mad Nawi,2013 Keratin protein is a protein which is extracted from chicken feather which consists of about 91% keratin 1 3% fat and 7 9% water Keratin protein is a hard protein that is also found in hair skin and nails From this research keratin protein is extracted from chicken feathers and the keratin protein will be used in formulating shampoo Human s hair is mainly of keratin and the shampoo with harsh chemical is used basic structures of hair will get damage The purpose of the research is to produce shampoo that contains keratin protein from chicken feathers and to add natural products as additives into shampoo to avoid harmful effect to human hair In this study the process begins with extracted keratin protein from chicken feather and natural additives were added into shampoo formulation At the end of this project we will be able to produce shampoo containing keratin that will help to improve the structure of hair

Formulation of Hair Straightening Cream from Keratin Protein Suguna Jeganathan,2015 A research was conducted on the formulation of hair straightening cream from keratin protein The keratin that used in this formulation was extracted from chicken feathers The keratin plays an important role during the hair straightening process in order to straighten the hair and reduce the damaged on the hairs Our hair consists of mainly keratin but in normal condition the hair consists of alpha keratin The original configuration of the hair is held in place by the bonding found in the cortex layers of the hair There are four types of bonds which are hydrogen bond sugar bond cystine bond disulphide bond and salt bond The hair straightening cream will break the disulphide bonds in the hair during the hair straightening process and allowed the confirmation of the new disulphide bonds with the new arrangement thus giving the hair a new shape The formulation was made with the mixture of water based and oil based chemicals Firstly the oil based and water based mixture were prepared separately at temperatures 60 70 C After the mixture was soluble the water based mixture poured into the oil based mixture at a temperature around 60 70 C The mixture then stirred immediately until the temperature dropped to 40 C Finally the keratin protein and the fragrance were added into the mixture and the mixture was continuously stirred at room temperature for 2 hours The result shows that the formulation has the ability to permanently straighten the hair without the damage to the hair The SEM analysis proven that the keratin can reduce the damaged to the hair during the straightening process The characterisation test to the hair straightening cream like pH analysis colour analysis centrifuge test FTIR test viscosity test and cycle test freeze and thaw shows that the cream is stable and within the standard range Chicken feather is one of the important source of keratin This is a good idea because poultry feathers are dumped used for land filling incinerated or buried which involves problem in storage handling emission control and ash disposal Therefore the use of the chicken feather in this project can reduce the waste disposal of the chicken feathers

Formulation of Hair Straightening Cream from Keratin Protein Siti Aziemah Mohd Sidek,2013 A research was conducted on the formulation of hair straightening cream from keratin protein The extracted keratin protein from the chicken feathers helps in straightening

without damage the hair The large number of chemicals in the hair products had changed the normal structure of the hair and become unhealthy Hence this formulation will produce an effective hair straightening cream that can straighten the hair and rebuild hair damaged Firstly the phases of the solution phase I and phase II was prepared by dissolving the chemicals together based on the water and oil system by put into the water bath at 65 C until all the chemicals had been soluble Soluble phase I and II were mixed together by stirring using the glass rod and continued stirring using a Homogenizer mixer for a two hour Clinical testing proved that this formulation only can temporarily straighten the hair for five to six hours and can soften curly and unmanageable hair by using the keratin in the formulation From this research can be concluded that this formulation needs more adjustment on the composition of chemicals to make it become permanent hair straightening cream and without damage the hair structure
