

LETTERS from READERS

THE F-N RUMPU

Sir,

When is Mr. Alan K. Clerk, whose bad-tempered effusion intrudes upon the correspondence columns this month?

Let him forthwith be placed at the wheel of a Jaguar and pursued by "Nashes" along a wet and winding road until the inevitable happens!

I am, Yours, etc.,

HYDER H. CUNDEY.

London, W.3.

Sir,

A further distinction resulted by Mr. Alan K. Clerk in his comparison in your August issue of the 2-litre Frazer-Nash with a 3½-litre car of approximately half the price, is that the former appears to be relatively unimpaired when the road deviates from the straight.

While this observation may not apply in regard to such vehicles as have a "C" in their name, will these be available at half the price of the Frazer-Nash and can it be said that they afford the "adequate comfort and protection" attributed to the type without the suffix?

A comparison, to the detriment of the smaller-engined vehicle, of cars of such dissimilar engine capacity, is of little value, but it would be of interest to be informed in what respects the power unit designed by the "clever Germans in 1936" should be regarded as obsolete. Does your correspondent claim any outstanding novelty in the design of the 3½-litre engine, good as it undoubtedly is? Has it not, in fact, much in common with earlier power units, including that of a sporting motor car designed in Wolverhampton by some clever Englishmen (with perhaps a little French inspiration) long before "Smiley little airfield circuits" were thought of?

I am, Yours, etc.,

C. W. J. HARRIS.

Chelmsford.

Sir,

Surely Mr. A. K. Clerk's letter is a rather unjustifiable attack on Mr. Aldington for writing in praise of a car in which he is interested.

The power unit of the Frazer-Nash may be out of date, but in 1937 the 2-litre 328 F.N.-B.M.W. was timed at 193 m.p.h. against the 115 m.p.h. of the 1951 3½-litre Jaguar XK 120, and it was also two seconds faster from 0-70 m.p.h. than the larger car.

Unfortunately, I have no performance figures for a modern "Nash", but, taking into consideration the much smaller engine, I should say its figure of merit is high—not taking price into consideration, because price must be balanced against length of life and only time will show

N.B.—Opinions expressed are those of our correspondents and Motor Sport does not necessarily associate itself with them.—Ed.

whether a "Nash" can outlast a cheaper rival. In the mid-'30s there were several American cars which for performance and refinement of running could equal a Rolls-Royce for about two years, though they cost well under £1,000, but they are rough now, while a Rolls is still a thing of beauty and refinement.

It appears to me that the chase for ultra high speed is ruining the true sports car, by which I mean a car designed for fast touring and not racing. The owner of a 115-m.p.h. two-seater can rarely use the last 20 m.p.h. of his speed and few are fit to drive so fast, while his cruising speed is more likely to be 70 m.p.h., a speed well within the capability of the old four-seater sports car in which four enthusiasts with baggage could have a weekend outing at 15-20 m.p.g. Now two cars are needed for such a trip.

One does not expect a 2-litre car to give fast four-seater performance, but 20 years ago 3½ litres could and did do so. The following figures suggest to me that the British has the most usable performance of any fast car of which I have much data, though I know that the Invicta, 4½-litre Bentley, Mercedes and Alvis all had good acceleration between 30 and 70 m.p.h., the vital period for fast averages. All cost more than the Jaguar at present-day values, but many are able to give 90 per cent. of their original performance after many years of service.

I do not wish to decry the Jaguar, which is doing much to restore car prestige, but other cars, particularly Frazer-Nash, have been doing this for some years, and I hope that some day we shall see a return to the genuine four-seater sports or fast-tourer. Until then vintage cars will hold the affections of many, and Frazer-Nash has vintage blood in it.

Mr. Clerk's remarks about the Frazer-Nash investment are in poor taste. There have been several claims for the fastest road car (but none by Hagetti to my knowledge), and only Rolls-Royce is universally accepted as the best car in the world. Friendly rivalry is a good thing but let us avoid slanging each other. To me there will never be a car like the Leyland Knight, but I see no objection to any other manufacturer or interested person praising his own fancy.

Good hunting to all competitors in racing, which I love, but when talking of sports cars I prefer to ignore speeds

over 100 m.p.h. and rely on acceleration figures, unless it is intended to compete in races.

I am, Yours, etc.,

Oxford. N. J. WARR.

[The B.M.W. which did 193 m.p.h., was rather "hotter" than most 328s.—Ed.]

Sir,

Your correspondent Mr. Alan Clerk spoils his case by over-statement, the Frazer-Nash being, from the point of view of sheer performance, the finest out-and-out sports car in this country (the new Jaguar excepted). But it is, also, true that not only the engine, but the whole car, is merely an Anglicised B.M.W., and although it has been developed into a better car all round than its size, it is little improvement on the few pre-war B.M.W.s which have received the same attention.

The example of the "Nash" does show up the appalling lack of sporting machinery conceived and produced in Britain since the war; there are only two names, Jaguar and Aston-Martin; with the possible addition of the Jupiter, which has proved disappointing due to a surplus of weight and an engine unavailable in its present form. Indeed, there are no 1½-litre engines now available which produce anything like the power of the Aston-Martin and Riley of 15 years ago, and the Hawthorn Riley must be the fastest British 1½-litre car. But the lack of power units is not the crux of the matter. At Le Mans this year, no less than three of the categories were won by Continental family saloons; not only were they family saloons but two of them were in mass-production and the third, the Porsche, is virtually merely a Vellor wages sports model. Although there was no opposition from this country to the Renaults and the Porsches (itself a deplorable state of affairs), the Lancia Aurelia on its modest 75 h.p. convincingly beat "our" Frazer-Nashes, which have a power-to-weight ratio twice as good, half the seating capacity, about a quarter the weather protection, and cost twice as much. Incidentally, one motoring paper reported that "the Lancia's fastest lap was only 37 m.p.h."

I think it is clear that in the matter of overall design, and particularly in the influence that has on handling characteristics, the gap which existed between Britain and the Continent in 1939 has now become, or is certainly becoming, even wider. I cannot imagine any British family saloon averaging nearly 70 m.p.h. for the 24 hours at Le Mans, let alone anything as small and as cheap as the Renault; modified merely to "Stage II" specification, incidentally.

If it were not for the Jaguars and Austons the outlook would be intolerable; but meanwhile there is available in this country a sports car which, though unobtainable, represents outstanding value for money by any standards, even by comparison with the Jaguar—the Morgan Plus Four.

I am, Yours, etc.,

Callington.

ANTHONY BLIGHT.
