## **From Etymology To Pragmatics Metaphorical And Cultural Aspects Of Semantic Structure Cambridge Studies In Linguistics:**

From Etymology to Pragmatics Eve Sweetser, 1991-07-26 This book offers a distinct approach to the analysis of the multiple meanings of English modals conjunctions conditionals and perception verbs Although such ambiguities cannot easily be accounted for by feature analyses of word meaning Eve Sweetser's argument shows that they can be analysed both readily and systematically Meaning relationships in general cannot be understood independently of human cognitive structure including the metaphorical and cultural aspects of that structure Sweetser shows that both lexical polysemy and pragmatic ambiguity are shaped by our metaphorical folk understanding of epistemic processes and of speech interaction Similar regularities can be shown to structure the contrast between root epistemic and speech act uses of modal verbs multiple uses of conjunctions and conditionals and certain processes of historical change observed in Indo European languages Since polysemy is typically the intermediate step in semantic change the same regularities observable in polysemy can be extended to an analysis of semantic change This book will attract students and researchers in linguistics philosophy the cognitive sciences and all those interested in metaphor

**Konzeptionelle Nähe und sprachliche Routinisierung** Johanna Stahnke, 2017-09-25 In einer Integration konversationsanalytischer und sprachwandeltheoretischer Ansätze untersucht die Studie die sprachliche Kontextualisierung konversationeller Selbstreparatur in der gesprochenen Niederdeutsch des Französischen. In Paraphrasen besteht zwischen Reparatur und Reparatur semantische Äquivalenz in Korrekturen semantische Differenz. Beide Reparaturtypen weisen spezifische prosodische, lexikalische und syntaktische Kontextualisierungshinweise auf. Als Datengrundlage dienen ein niederdeutsches Testcorpus und ein Distanzsprachliches Kontrollcorpus. Die Analyse erfolgt in einem variationslinguistischen Ansatz. In konzeptioneller Niederdeutsch kontextualisieren Sprecher Korrekturen tendenziell zu Paraphrasen um. Zur Erklärung der Ergebnisse werden niederdeutsche Kommunikationsbedingungen herangezogen, insbesondere Dialogizität. Semantisch inkompatible Korrekturen stellen ein konversationelles Problem dar, da sie die Diskurskohärenz stärker als Paraphrasen beeinträchtigen und das damit verbundene Risiko, das Rederecht aufzugeben erhöhen. Die paraphrastische Rekontextualisierung von Korrekturen wird als Sprecherstrategische Lösung dieses Problems aufgefasst, die zu sprachlicher Routinisierung führen kann.

**Evolutionary Epistemology, Language and Culture** Nathalie Gontier, Jean Paul van Bendegem, Diederik Aerts, 2006-07-25 For the first time in history scholars working on language and culture from within an evolutionary epistemological framework and thereby emphasizing complementary or deviating theories of the Modern Synthesis were brought together. Of course there have been excellent conferences on Evolutionary Epistemology in the past as well as numerous conferences on the topics of Language and Culture. However until now these disciplines had not been brought together into one all encompassing conference. Moreover previously there never had been such stress on alternative and complementary theories of the Modern Synthesis. Today we know that natural selection and evolution are far from synonymous and that they do not explain isomorphic phenomena in the world. Taking Darwin seriously is the way to go but today the time has come to take alternative and complementary theories that developed after the Modern Synthesis equally seriously and furthermore to examine how language and culture can merit from these diverse disciplines. As this volume will make clear a specific inter and transdisciplinary approach is one of the next crucial steps that needs to be taken if we ever want to unravel the secrets of phenomena such as language and culture.

**Deconstructing Constructions** Christopher S. Butler, Javier Martín Arista, 2009-01-14 This collection of papers brings together contributions from experts in functional linguistics and in Construction Grammar approaches with the aim of exploring the concept of construction from different angles and trying to arrive at a better understanding of what a construction is and what roles constructions play in the frameworks which can be located within a multidimensional functional cognitive space At the same time the volume has a historical dimension for instance in plotting the developments which led to recent models The book is organised in three sections the first deals with particular theoretical issues the second is devoted to the recent Lexical Constructional Model and the third presents a number of analyses of specific constructions The volume thus makes an important contribution to

the ongoing debate about the relationship between functionalist and constructionist models

**The Linguistics of Olfaction** Łukasz Jędrzejowski, Przemysław Staniewski, 2021-04-26 This volume presents novel cross linguistic insights into how olfactory experiences are expressed in typologically unrelated languages both from a synchronic and from a diachronic perspective It contains a general introduction to the topic and fourteen chapters based on philological investigation and thorough fieldwork data from Basque Beja Fon Formosan languages Hebrew Indo European languages Japanese Kartvelian languages Purepecha and languages of northern Vanuatu Topics discussed in the individual chapters involve inter alia lexical olfactory repertoires and naming strategies non literal meanings of olfactory expressions and their semantic change reduplication colexification mimetics and language contact The findings provide the reader with a range of fascinating facts about perception description contribute to a deeper understanding of how olfaction as an understudied sense is encoded linguistically and offer new theoretical perspectives on how some parts of our cognitive system are verbalized cross culturally This volume is highly relevant to lexical typologists historical linguists grammarians and anthropologists

*Cognitive Linguistics* Theo Janssen, Gisela Redeker, 2010-12-14 No detailed description available for Cognitive Linguistics

**Cognitive Linguistics** Mario Brdar, Stefan Th. Gries, Milena Ćić Fuchs, 2011-11-10 Cognitive Linguistics is not a unified theory of language but rather a set of flexible and mutually compatible theoretical frameworks Whether these frameworks can or should stabilize into a unified theory is open to debate One set of contributions to the volume focuses on evidence that strengthens the basic tenets of CL concerning e g non modularity meaning and embodiment A second set of chapters explores the expansion of the general CL paradigm and the incorporation of theoretical insights from other disciplines and their methodologies a development that could lead to competing and mutually exclusive theories within the CL paradigm itself The authors are leading experts in cognitive grammar cognitive pragmatics metaphor and metonymy theory quantitative corpus linguistics functional linguistics and cognitive psychology This volume is therefore of great interest to scholars and students wishing to inform themselves about the current state and possible future developments of Cognitive Linguistics

**Theories of Metaphor Revised** Stephan Kessler, 2018 Research that deals with metaphors and linguistic imagery has increased in the last thirty years However studies that question existing theories of metaphor from a comparative perspective are less common The reason for the present theoretical sketch was the metaphorical model of conceptualism alias the cognitive theory of metaphor at least with this theory metaphor itself has become a metaphor and the classical rhetorical metaphor has been sidelined Kessler s book not only criticises existing theories of metaphor but also develops from them a discursive synthesis that seeks to rehabilitate the classical metaphor as an everyday pragmalinguistic phenomenon For this purpose the nature of thought the mental lexicon predication and word semantics are also covered

**Mental Spaces in Discourse and Interaction** Todd Oakley, Anders Hougaard, 2008 The cognitive theory of mental spaces and conceptual integration MSCI is a twenty year old cross disciplinary enterprise that presently unfolds in academic circles on many levels of reflection and research One important area of inquiry where MSCI can be of immediate use is in the pragmatics of written and spoken discourse and interaction At the same time empirical insights from the fields of interaction and discourse provide a necessary fundament for the development of the cognitive theories of discourse This collection of seven chapters and three commentaries aims at evaluating and developing MSCI as a theory of meaning construction in discourse and interaction MSCI will benefit greatly not only from empirical support but also from clearer refinement of its methodology and philosophical foundations This volume presents the latest work on discourse and interaction from a mental spaces perspective surely to be of interest to a broad range of researchers in discourse analysis
