George Szekely,2015-03-02 In Play and Creativity in Art Teaching esteemed art educator George Szekely draws on his two classic volumes Encouraging Creativity in Art Lessons and From Play to Art to create a new book for new times The central premise is that art teachers are not only a source of knowledge about art but also a catalyst for creating conditions that encourage students to use their own ideas for making art By observing children at play and using props and situations familiar to them teachers can build on children s energy and self initiated discoveries to inspire school art that comes from the child s imagination The foundation of this teaching approach is the belief that the essential goal of art teaching is to

inspire children to behave like artists that art comes from within themselves and not from the art teacher Play and Creativity in Art Teaching offers plans for the study of children s play and for discovering creative art teaching as a way to bring play into the art room While it does not offer a teaching formula or a single set of techniques to be followed it demystifies art and shows how teachers can help children find art in familiar and ordinary places accessible to everyone This book also speaks to parents and the important roles they can play in supporting school art programs and nourishing the creativity of their children

Examining Young Learners: Research and Practice in Assessing the English of School-age Learners Szilvia Papp,Shelagh Rixon,2018 The proposed book on child second language L2 development and assessment will be a state of the art account of what we currently know about how children learn L2s in formal contexts and how that knowledge impacts on the design development and evaluation of language assessment products for young learners The uniqueness of child L2 development within the classroom is highlighted by considering children s L2 needs typical patterns of development and the role of instruction and assessment in how children learn Common issues shared in child L2 acquisition studies language testing and educational assessment are explored by linking research carried out within the educational academic and testing communities Several case studies are described from different educational contexts around the world where teaching and assessment of young language learners takes place In particular the book presents the Cambridge English approach to assessing young learners of English and presents a framework for the development research and validation activities around the Cambridge English suite battery for children
