

3. **Plan:** Draw the timeline and then compute the FV of these two cash flows.

Execute:

Timeline (since we are computing the future value of the account, we will treat the cash flows as positive—going into the account):

$$FV = ?$$

$$FV = 500(1.03) + 300 = 815$$

Evaluate:

The timeline helps us organize our work so that we get the number of periods of compounding correct. The first cash flow will have 1 year of compounding, but the second cash flow will be deposited at the end of period 1, so it receives no compounding.

4. *Editor's Note:* In several previous problems we used a financial calculator to solve a time value of money problem. Problems could be solved quickly and easily by manipulating the N, I/Y, PV, PMT, and FV keys. In each of these problems there was a series of payments, of equal amount, over time, i.e., an annuity. All you had to do to input this series was enter the payment (PMT) and the number of payment (N).

Many financial analysis problems involve a series of equal payments, but others involve a series of unequal payments. A financial calculator can be used to evaluate an unequal series of cash flows (using the cash flow (CF) key), but the process is cumbersome because each cash flow must be entered individually. I urge each student to study the Chapter 4 Appendix: "Using a Financial Calculator," as well as instructional materials that are produced by the manufacturers of the financial calculator.

Here we will solve a problem with uneven cash flows mathematically and with a financial calculator.

Plan: It is wonderful that you will receive this windfall from your investment in your friend's business. Since the cash flow payments to you are of different amounts and paid over 3 years, there are different ways in which you can think about how much money you are receiving.

Execute:

$$\begin{aligned} \text{a. } PV &= \frac{10,000}{1.035} + \frac{20,000}{1.035^2} + \frac{30,000}{1.035^3} \\ &= 9662 + 18,670 + 27,058 \\ &= 55,390 \end{aligned}$$

Baha Yıldız, Semra Taşpunar Altuntaş, Sertaç Fuad Karaağaoğlu, Tuna Can Güleç, Ü. Hasan Gözkonan, This is a precious book for the students of finance economics and business administration who want to gain knowledge on financial institutions calculations and markets On the other hand I strongly recommend this book who want to learn these complicated topics in an easy way Dr Mahfi E ilmez This book covers all topics related to financial management The most important feature of the book is that it contains plenty of examples on each subject in order to facilitate students comprehension In addition it will be easier to understand the unit as a whole with the end of the section evaluations consisting of classic and test questions Many factors have been instrumental in the emergence of this book First of all there are over a hundred business management and similar departments providing education in English at universities in Turkey Among the books taught in these schools the number of financial management books written in English is extremely limited Second the English financial Management books used in these schools are of UK and North American origin So theories examples practices are largely related to these countries Third financial management books written and sold in the UK and North America are very expensive which is quite high for students studying in Turkey Fourth as a developing country financial practices in Turkey the financial structures and environment of companies are quite different from developed countries The challenges mentioned above are the main sources of motivation for writing this book The faculty members involved in the book s writing are people who have experienced those challenges All have a long educational background and besides they are involved in the financial markets and some of whom are in decision making positions Each of the sections contains real world and Turkey examples values current financial practices and new theories The price of this book has been kept as low as possible Thus it is aimed to

contribute to both our students and the economy of the country Financial managers students academicians and other interested in the financial sector will benefit from the theories examples problem solutions and recommendations contained in the book We wish the book to be useful to students and all interested in finance Principles of Business & Management Oliver Laasch,2024-03-07 This popular UN endorsed textbook supports introductory student learning of business and management alongside the Sustainable Development Goals SDGs and their 5Ps prioritization of people partnership planet peace and prosperity for all Sustainable Business Management Dietmar Ernst,Ulrich Sailer,Robert Gabriel,2023-03-27 This comprehensive textbook gives an insight into all relevant aspects of business administration as they are all subject to fundamental changes due to the transformation to a more sustainable economy It starts with the background on sustainability and the scientific classification of sustainable business administration Next it sheds light on the boundary conditions regarding environmental economics and social responsibility The next section deals with management functions from strategy and international management to change management legal implications and HR management The last part focuses on value creation Here the authors shed light on the influence of sustainability in all areas of the corporate value chain from procurement on to production and ending with marketing and sales Also addressed are expert functions such as environmental management or sustainable product design which are essential in driving sustainable innovation in a dynamically changing environment *Innovation and Market Value. The Case of Tourism Enterprises* Dawid Szutowski,2017-03-18 In contemporary economics only one thing is constant constant change Gunday et al 2011 The notion of change relates directly to innovation The very nature of innovation constitutes combining existing factors in a new changed way Since the early stage of the scientific investigation of innovation research has focused mainly on the solutions actually implemented Schumpeter 1939 Yet it is only through implementation that the benefits of innovation may materialise The task is not simple The process of obtaining the gains is complex as innovation may pass through different stages Thus for almost half century the scientific community has considered innovation to be a complex process and not just a simple occurrence Myers and Marquis 1969 Innovation pushes progress forward Thus previous scientific investigation limited the concept of innovation to implementations which generate positive effects Nelson and Winter 1982 The above scientific considerations still hold today Moss Kanter 2006 Innovation is of crucial importance for tourism companies which cover accommodation for visitors food and beverage serving activities passenger transportation travel agencies and other reservation activities cultural activities sports and recreational activities and retail trade of country specific tourism characteristic goods UNWTO 2010 It provides them with competitive advantage and hence the firms with market power gain more from innovation Tirole 1995 A firm s innovation interacts with the environment It delivers diverse benefits to the consumers in the form of new products and lower prices which in turn impact positively on the company Shiller 2006 In the context of tourism the ongoing scientific discussion on innovation seems not to have achieved any definite conclusions yet

The implementation of innovation in tourism enterprises leads to the achievement of diverse ends From this point of view the measurement of the effects of innovation is of vital importance There are a number of financial measures covering substantially different fields The most comprehensive amongst them is a company's value It covers all the aspects of a company's activity Bodie and Merton 2000 However due to its importance and complexity numerous approaches to company value were created The basic distinction covers book and market value based approaches The proponents of book value assume that the balance sheet yields a reliable estimate of the value of assets and equities However numerous shortcomings emerge the static character dealing with historical figures failing to include intangibles and treating all classes of accounts as having equal importance Nunes 2003 The market value based approach stands for the price that assets would fetch in the marketplace Fabrozi and Drake 2009 The main objective of the research is to measure the short and long term impact of innovation announcements on the market value of equity of tourism enterprises
