Managerial Accountant's Compass Gary Oliver, 2018-10-09. This is the first detailed view of the managerial accountant's role and responsibilities in organization setting. Its aim is to foster role development, the opportunity to work at an advanced level of practice. Accounting studies develop technical skills associated with topics and responding to defined scenarios but provide very little guidance on what to recognize and approaching the broad problems or challenges under conditions of uncertainty. It is a double first because it provides the managerial accountant's compass as a general purpose analytical framework for managerial accounting independent of any selected theory and method. The metaphor of a compass creates a mental schema for its four points named: 1. goals and principles, 2. boundaries and constraints, 3. methods and models, and 4. collegial relationships. Dynastic Chinese and some other Central Asian cultures view the center as a fifth principal direction giving a total of five points. The center represents a high standard ethical conduct and self-care or moral compass. Managerial Accountant's Compass offers an integrated and systematic guide to approaching situations that are constantly changing. It gives a protective starting pattern which produces new meanings and awareness of the ambiguity and uncertainty for each situation. Ultimately the managerial accountant's compass can help you make more effective sense of yourself, your expertise and your practice in the organization where you work which should open career opportunities.

Corporate Financial Accounting and Reporting Tim Sutton, 2004. Corporate Financial Accounting and Reporting is a comprehensive accounting textbook directed at those using financial reports. Its aim is to help current and future managers gain a thorough understanding of companies published reports and is unique in the fact that it covers all three years of a traditional financial accounting course. The text is divided into 3 parts: the first covers the foundations of accounting, the second part considers the components of financial statements in more depth, and the third part explores how investors analyse financial statements. Recognising the increasingly international nature of accounting, this book provides full coverage of international accounting standards with the European Union's Company Law Directives providing its legal framework. Corporate Financial Accounting and Reporting is designed for international MBA programmes and specialist postgraduate programmes in international business finance in Europe. It can also be used in international business programmes at the undergraduate level.
