Original Selfishness Daryl P. Domning, Monika K. Hellwig, 2016-12-05 This book defends a startling idea that the age old theological and philosophical problems of original sin and evil long thought intractable have already been solved The solution has come from the very scientific discovery that many consider the most mortal threat to traditional religion evolution Daryl P Domning explains in straightforward terms the workings of modern evolutionary theory Darwinian natural selection and how this has brought forth life and the human mind He counters objections to Darwinism that are raised by some believers and emphasizes that the evolutionary process necessarily enforces selfish behavior on all living things This account of both physical and moral evil is arguably more consistent with traditional Christian teachings than are the explanations given by most contemporary evolutionary theologians themselves The prominent theologian Monika K Hellwig dialogues with Daryl Domning throughout the book to present a balanced reappraisal of the doctrine of original sin from both a scientist s and theologian s perspective

**Kennedy on Negotiation** Gavin Kennedy, 2017-03-02 Negotiation is a vital skill for every manager As a result there are almost as many patented techniques for negotiation as there are managers each proclaiming to be the definitive route to success The authors behind these techniques keep their work very much to themselves Their fundamentally different approaches to negotiation remain in isolation from each other as if their authors were too polite to contradict others in the field In most cases when you are developing your negotiation skills this leaves you with a stark choice pick a single technique and ignore the rest Until now Kennedy on Negotiation is an authoritative and comprehensive guide to negotiation skills training and practice Dr Kennedy uses the well established Four Phases model as the structure around which he critiques constructively the numerous competing theories and models Gavin Kennedy's book is everything you would expect from one of the most respected writers on negotiation It is a readable and reliable guide to all that is best in the various contributions to negotiation training from authors such as John Nash Walton and McKersie Atkinson Nierenberg Rubin and Brown Gottschalk Karass Fisher and Ury and many more including Gavin Kennedy himself

*Strategic Choice and International Relations* David A. Lake, Robert Powell, 2020-05-05 The strategic choice approach has a long pedigree in international relations In an area often rent by competing methodologies editors David A Lake and Robert Powell take the best of accepted and contested knowledge among many theories With the contributors to this volume they offer a unifying perspective which begins with a simple insight students of international relations want to explain the choices actors make whether these actors be states parties ethnic groups companies leaders or individuals This synthesis offers three new benefits first the strategic interaction of actors is the unit of analysis rather than particular states or policies second these interactions are now usefully organized into analytic schemes on which conceptual experiments may be based and third a set of methodological bets is then made about the most productive ways to analyze the interactions Together these elements allow the pragmatic application of theories that may apply to a myriad of particular cases such as individuals protesting environmental degradation governments seeking to control nuclear weapons or the United Nations attempting to mobilize member states for international peacekeeping Besides the editors the six contributors to this book all distinguished scholars of international relations are Jeffrey A Frieden James D Morrow Ronald Rogowski Peter Gourevitch Miles Kahler and Arthur A Stein Their work is an invaluable introduction for scholars and students of international relations economists and government decision makers
