100 Notable books of 2020 by the End of the World Review A concise but wide ranging personal history of the internet from for the first time the point of view of the user In a shockingly short amount of time the internet has bound people around the world together and torn us apart and changed not just the way we communicate but who we are and who we can be It has created a new unprecedented cultural space that we are all a part of even if we don't participate that is how we participate but by which we're continually surprised betrayed enriched befuddled We have churned through platforms and technologies and in turn been churned by them And yet the internet is us and always has been In *Lurking* Joanne McNeil digs deep and identifies the primary if sometimes contradictory concerns of people online searching safety privacy identity community anonymity and visibility She charts what it is that brought people online and what keeps us here even as the social equations of digital life what we're made to trade knowingly or otherwise for the benefits of the internet have shifted radically beneath us It is a story we are accustomed to hearing as tales of entrepreneurs and visionaries and dynamic and powerful corporations but there is a more profound intimate story that hasn't yet been told Long one of the most incisive ferociously intelligent and widely respected cultural critics online McNeil here establishes a singular vision of who we are now tells the stories of how we became us and helps us start to figure out what we do now

The Case Against Disclosure James Hutson, Daniel Plate, 2025-08-28 The Case Against Disclosure Defending Creative Autonomy in the Age of AI challenges the prevailing assumption that creators must disclose their methods when using artificial intelligence As AI tools become deeply embedded in writing research coding and artistic production institutions publishers and the U S Copyright Office have moved toward transparency mandates requiring creators to document and reveal the extent of AI assistance in their work This book argues that such demands are neither ethically justified nor practically enforceable representing an unnecessary and damaging encroachment on the creative process Transparency often framed as a safeguard for authenticity and accountability is instead an instrument of control one that reinforces outdated notions of originality while failing to account for the realities of AI driven authorship The Case Against Disclosure dismantles the myth that process defines authorship asserting that credibility stems from the willingness to take responsibility for a work not from exhaustive documentation of how it was made Through legal analysis historical parallels and contemporary case studies this book exposes how transparency mandates create unnecessary barriers restricting creative autonomy and imposing impractical bureaucratic oversight on the production of knowledge and culture Essential reading for scholars policymakers and professionals in media law and technology this work presents a forceful argument against institutional overreach advocating for a future in which creators retain full control over their methods It is both a scholarly intervention and a polemic making the case that the right to opaque creation is fundamental to intellectual and artistic freedom in the AI age
