Invisibilising Austrian German Anna Dorothea Havinga, 2018-01-22 This book provides an insight into the standardisation process of German in eighteenth century Austria It describes how norms prescribed by grammarians were actually implemented via a school reform carried out by educationalist Johann Ignaz Felbiger on the order of Empress Maria Theresa Quantitative and qualitative analyses were undertaken of certain Upper German features e apocope the absence of the prefix ge and the ending t in past participles and variants of the verb form

sind in reading primers issues of the Wienerisches Diarium Wiener Zeitung and petitionary letters These reveal how such variants became increasingly invisible in writing This process of invisibilisation i e a process of stigmatization which prevents the use of certain varieties and variants in writing can be attributed to a number of factors Empress Maria Theresa s appeal for a language reform the normative work by eighteenth century grammarians the implementation of educational reforms and the early introduction of East Central German variants in newspaper issues **Linguistic Purism in Action** Nils

Langer,2013-02-18 The auxiliary do tun is one of the most discussed constructions in West Germanic In German there is a striking opposition between modern standard German where the construction is virtually ungrammatical and considered to be sub standard by most speakers whilst as this book shows the construction is attested in all modern dialects as well as historic stages since 1350 In answering why auxiliary tun is ungrammatical in modern standard German it is shown that the stigmatization of tun was caused by prescriptive grammarians in the 16th 18th century Furthermore it is shown that the stigmatization of tun as bad German occurred in clearly discernible stages from bad poetry 1550 1680 to bad written German 1680 1740 and finally to bad German in general after 1740 thus providing evidence that the history of the standardization of German needs to take into account direct metalinguistic comments from prescriptive grammarians The effectiveness of linguistic purism is also shown by evidence from two other constructions namely polynegation and double perfect **Der**
