Neuroprosthetic Supersystems Architecture Matthew E. Gladden, 2017-05-13 This volume serves as a resource for the design and analysis of neuroprosthetic supersystems which can be defined as organizations either small or large simple or complex whose human members have been neuroprosthetically augmented While numerous other texts focus on the biomedical engineering of neuroprostheses as technological devices or on the biocybernetic engineering of the host device system comprising a neuroprosthesis and its human host this volume presents a unique investigation of the intentional creation of higher order supersystems that allow multiple neuroprosthetically augmented human beings to interact with one another and with external information systems in order to accomplish some shared task In essence this can be understood as the work of designing and managing neuroprosthetically enhanced organizations Individual chapters present an ontology of the neuroprosthesis as a computing device a biocybernetic ontology of the host device system an ontology of the neuroprosthesis as an instrument of cyborgization motivating and inhibiting factors for the organizational deployment of posthumanizing neuroprostheses by military organizations and other early adopters an introduction to enterprise architecture in the context of technological posthumanization an exploration of the implications of neuroprosthetic augmentation for enterprise architecture and considerations for the development of effective network topologies for neuroprosthetically augmented organizations The conceptual frameworks formulated within this book offer a wide range of tools that can be of use to policymakers ethicists neuroprosthetic device manufacturers organizational decision makers and others who must analyze or manage the complex legal ethical and managerial implications that result from the use of emerging neuroprosthetic technologies within an organizational context Physiologie humaine Lauralee Sherwood, 2015-06-09 La 4e de couverture indique Nouveautés et adaptation de la 3e édition plus de 90 % des figures ont été retouchées La plupart des images des cellules et des figures anatomiques sont nouvelles elles sont plus réalistes et en perspective Dans cette édition des fiches de révision pour chaque chapitre ont été ajoutées à la fin du livre afin que les étudiants puissent réviser les points clés Des problèmes de réflexion permettent aux étudiants d'analyser des cas cliniques et des symptômes partir de leurs connaissances Un contenu très pédagogique tout est mis en œuvre pour aider l'étudiant dans son

Explaining Russian-German code-mixing Nikolay Hakimov, 2021. The study of grammatical variation in language mixing has been at the core of research into bilingual language practices. Although various motivations have been proposed in the literature to account for possible mixing patterns, some of them are either controversial or remain untested. Little is still known about whether and how frequency of use of linguistic elements can contribute to the patterning of bilingual talk. This book is the first to systematically explore the factor usage frequency in a corpus of bilingual speech. The two aims are i) to describe and analyze the variation in mixing patterns in the speech of Russian-German adolescents and young adults in Germany and ii) to propose and test usage-based explanations of variation in mixing patterns in three morphosyntactic contexts: the adjective modified noun phrase, the prepositional phrase, and the plural marking of German noun insertions in bilingual sentences. In these contexts, German noun insertions combine with either Russian or German words and grammatical markers, thus yielding mixed bilingual and German monolingual constituents in otherwise Russian sentences, the latter also labelled as embedded language islands. The results suggest that the frequency with which words are used together mediates the distribution of mixing patterns in each of the examined contexts. The differing impacts of co-occurrence frequency are attributed to the distributional and semantic specifics of the analyzed morphosyntactic configurations. Lexical frequency has been found to be another important determinant in this variation. Other factors include recency or lexical priming in discourse in the case of prepositional phrases and phonological and structural similarities and differences in the inflectional systems of the contact languages in the case of plural marking.
