Finance John B. Guerard, Jr., Eli Schwartz, 2007-10-04 The book addresses several problems in contemporary corporate finance optimal capital structure both in the US and in the G7 economies the Capital Asset Pricing Model CAPM and the Arbitrage Pricing Model APT and the implications for the cost of capital dividend policy sales forecasting and pro forma statement analysis leverage and bankruptcy and mergers and acquisitions It is designed to be used as an advanced graduate corporate financial management textbook The Rating Agencies and Their Credit Ratings Herwig Langohr, Patricia

Langohr, 2010-04-01 Credit rating agencies play a critical role in capital markets guiding the asset allocation of institutional investors as private capital moves freely around the world in search of the best trade off between risk and return However they have also been strongly criticised for failing to spot the Asian crisis in the early 1990s the Enron WorldCom and Parmalat collapses in the early 2000s and finally for their ratings of subprime related structured finance instruments and

their role in the current financial crisis This book is a guide to ratings the ratings industry and the mechanics and economics of obtaining a rating It sheds light on the role that the agencies play in the international financial markets It avoids the sensationalist approach often associated with studies of rating scandals and the financial crisis and instead provides an objective and critical analysis of the business of ratings The book will be of practical use to any individual who has to deal with ratings and the ratings industry in their day to day job Reviews Rating agencies fulfil an important role in the capital markets but given their power they are frequently the object of criticism Some of it is justified but most of it portrays a lack of understanding of their business In their book The Rating Agencies and their Credit Ratings Herwig and Patricia Langohr provide an excellent economic background to the role of rating agencies and also a thorough understanding of their business and the problems they face I recommend this book to all those who have an interest in this somewhat arcane but extremely important area Robin Monro Davies Former CEO Fitch Ratings At a time of unprecedented public and political scrutiny of the effectiveness and indeed the basic business model of the Credit Rating industry and heightened concerns regarding the transparency and accountability of the leading agencies this book provides a commendably comprehensive overview and should provide invaluable assistance in the ongoing debate Rupert Atkinson Managing Director Head of Credit Advisory Group Morgan Stanley and member of the SIFMA Rating Agency Task Force The Langohrs have provided useful information in a field where one frequently finds only opinions or misconceptions They supply a firm base from which to understand changes now underway A well read copy of this monograph should be close to the desk of every investor issuer and financial regulator legislator or commentator John Grout Policy and Technical Director The Association of Corporate Treasurers

Industrieanleihen zweitklassiger Investmentqualität als Anlagealternative unter Risk/Return Gesichtspunkten

Holger Mertens, 1999-11-15 Inhaltsangabe Einleitung Seit der Unterzeichnung des Maastrichter Vertrages im Februar 1992 und seinem Inkrafttreten im November 1993 hat es zwischen den Mitgliedsländern der EU einen starken Konvergenzprozeß der Zinsniveaus gegeben Für Investoren bedeutet die Angleichung der Zinsniveaus da durch den Kauf von hochverzinslichen Staatsanleihen wie die von Italien oder Spanien nicht länger hohe Erträge erzielt werden können Sie sind nun gezwungen sich nach Anlagealternativen umzuschauen Am amerikanischen Rentenmarkt ist seit vielen Jahren das Segment der Industrieanleihen eine solche Alternative zu Staatsanleihen Da die Kreditqualität eines Industrieunternehmens beispielsweise niedriger ist als die der Bundesrepublik Deutschland wird den Investoren eine höhere Verzinsung als bei Staatsanleihen gewährt Wenn europäische Investoren in der Vergangenheit Industrieanleihen kauften dann nur solche mit erstklassiger Investmentqualität d.h. Anleihen mit einem Rating von Triple A und Double A deren Risiken und Erträge englisch Risk und Return sich nicht deutlich von denen der Staatsanleihen unterschieden Im Rahmen dieser Arbeit soll untersucht werden ob es für Investoren rentabel ist Papiere zweitklassiger Investmentqualität zu kaufen d.h. Anleihen mit einem Rating von Single A und Triple B Der Kauf eines solchen Papiers bringt einerseits höhere Risiken mit sich andererseits aber auch höhere Erträge

Die zentrale Fragestellung in der vorliegenden Arbeit ist ob Industriefinanzierungen zweitklassiger Investmentqualität unter Risk Return Gesichtspunkten eine Anlagealternative zu Staats und Industriefinanzierungen erstklassiger Investmentqualität darstellen. Obwohl es in der Fragestellung nicht explizit erwähnt wird handelt es sich in der Untersuchung um europäische Industriefinanzierungen. Da aber diese bisher erst wenig Risk Return Daten verfügbar sind werden die Ergebnisse aus dem Zahlenmaterial amerikanischer Industriefinanzierungen abgeleitet.

Peter Brusov, Tatiana Filatova, 2025-07-19 Business valuation and company value play a very important role in making an informed investment decision buying and selling shares and bonds of a company on the stock market insurance taxation etc. This book develops new approaches to business valuation and company value. The existing methods of business and company valuation have many shortcomings two of which are global related to the impossibility of estimating one of the fundamental parameters of valuation the discount rate and the impossibility of correctly accounting for the retrospective period of valuation. Both of these shortcomings can currently be overcome only within the framework of the modern theory of Brusov Filatova Orekhova BFO which is done in this monograph devoted to the development of a qualitatively new approach to the valuation of businesses and companies. The second most important method of business valuation CAPM was generalized by the authors to include financial risk along with business risk and for the first time this was done correctly. A new model CAPM 2.0 was created and applied to many companies. And finally CAPM 2.0 was included in the modern theory of Brusov Filatova Orekhova BFO which allows for a correct assessment of a business and a company taking into account both business and financial risks illustrating the practical application of the developed innovative approach.
