study is prefaced by an overview of the detection and subsequent spread of the pandemic in the country concerned The relevant legal and constitutional frameworks that governed the government and corporate conduct in the face of the pandemic are also discussed followed by the consideration of forms of criminal liability Government responses to the COVID 19 pandemic differed vastly in terms of both the choice of strategies adopted herd immunity test and trace lockdown etc and the quality and speed of government implementation of those strategies and associated interventions Both factors impacted the number of infections and casualties It is therefore appropriate to consider forms of criminal liability for failure of individual members of government including specific public authorities to act to the best of their abilities as timely as possible and in accordance with expert advice
