*The Couch, the Clinic, and the Scanner* David Hellerstein,2023-05-09 Winner 2023 Choice Outstanding Academic Title Over the past several decades psychiatry has undergone radical changes After its midcentury heyday psychoanalysis gave way to a

worldview guided by the Diagnostic and Statistical Manual which precisely defined mental disorders and their treatments more recently this too has been displaced by a model inspired by neuroscience Each of these three dominant models overturned the previous era's assumptions methods treatment options and goals Each has its own definitions of health and disease its own concepts of the mind And each has offered clinicians and patients new possibilities as well as pitfalls The Couch the Clinic and the Scanner is an insightful first person account of psychiatry's evolution David Hellerstein a psychiatrist who has practiced in New York City since the early 1980s working with patients doing research and helping run clinics and hospitals provides a window into how the profession has transformed In vivid stories and essays he explores the lived experience of psychiatric work and the daunting challenges of healing the mind amid ever changing theoretical models Recounting his intellectual clinical and personal adventures Hellerstein finds unexpected poetry in hallways and waiting rooms encounters with patients who are by turns baffling frustrating and inspiring and the advances of science Drawing on narrative medicine approaches The Couch the Clinic and the Scanner offers a perceptive and eloquent portrayal of the practice of psychiatry as it has struggled to define and redefine itself *British Medical Journal*, 1906 *Beyond the Madrasa* Nilanjana Gupta, 2022-12-30 This book looks at madrasas and educational institutions run by Muslim communities in India focusing on the history social relevance and importance of these institutions It provides a sensitive and in depth analysis of the push and pull of tradition religiosity and modernity within these establishments The book studies several institutions in Kozhikode Surat Mumbai Hyderabad Barak Valley in Assam Ladakh Delhi and several cities in Uttar Pradesh and examines new initiatives curricula models of education and professional training being offered It contextualises educational reforms in madrasas in response to changing policies and larger socio economic realities in contemporary India It also interrogates stereotypes associated with Islam and madrasa education paying particular attention to their syllabi and desired outcomes This book also looks at the roles and positions of women in these institutions Emphasising the long and complex history of Muslim communities and madrasas the book showcases the remarkable diversity of approaches and pedagogical practices which combine deeni and duniyati education across India today This book will be of interest to students and researchers of the history of education religious education comparative education and sociology It will also be useful to people working with NGOs and policymakers in the field of educational reform and planning *Quality of Healthcare in the Aftermath of the COVID-19 Pandemic* Moumtzoglou, Anastasius, 2021-12-10 The COVID 19 pandemic has put massive stress on healthcare professionals formal training their creed to do no harm and the patient safety movement COVID 19 affects all aspects of daily life and healthcare's organizational culture and values Healthcare institutions experience absenteeism change in commerce patterns and interrupted supply delivery in this context It has also revealed the extensive amounts of data needed for population health management as well as the opportunities afforded by mainstreaming telehealth and virtual care capabilities thus making the implementation of health IT essential in the post pandemic era

Quality of Healthcare in the Aftermath of the COVID 19 Pandemic clarifies how healthcare professionals might provide their services differently than treating a patient through its vicinity with multiple providers It examines the notion that healthcare education requires a pack of healthcare workers from varied educational backgrounds and training levels for the nuances of a disease Covering topics such as blockchain technology power density analysis and supply chain this book is a valuable resource for undergraduate and extended degree program students graduate students of healthcare quality and health services management healthcare managers health professionals researchers professors and academicians Sweetness in the Blood James Doucet-Battle,2021-03-16 A bold new indictment of the racialization of science Decades of data cannot be ignored African American adults are far more likely to develop Type 2 diabetes than white adults But has science gone so far in racializing diabetes as to undermine the search for solutions In a rousing indictment of the idea that notions of biological race should drive scientific inquiry Sweetness in the Blood provides an ethnographic picture of biotechnology s framings of Type 2 diabetes risk and race and importantly offers a critical examination of the assumptions behind the recruitment of African American and African descent populations for Type 2 diabetes research James Doucet Battle begins with a historical overview of how diabetes has been researched and framed racially over the past century chronicling one company s efforts to recruit African Americans to test their new diabetes risk score algorithm with the aim of increasing the clinical and market value of the firm s technology He considers African American reticence about participation in biomedical research and examines race and health disparities in light of advances in genomic sequencing technology Doucet Battle concludes by emphasizing that genomic research into sub Saharan ancestry in fact underlines the importance of analyzing gender before attempting to understand the notion of race No disease reveals this more than Type 2 diabetes Sweetness in the Blood challenges the notion that the best approach to understanding managing and curing Type 2 diabetes is through the lens of race It also transforms how we think about sugar filling a neglected gap between the sugar and molasses sweetened past of the enslaved African laborer and the high fructose corn syrup and corporate fed body of the contemporary consumer laborer
