SAP Transaction Manager module tracks Treasury trades through their full life cycle – from trade entry to payments to month-end processing to maturity of the trades. All accounting entries related to the trades are triggered by the trades and are posted directly to the SAP General Ledger.

Transaction Manager configuration is extensive when considering the several submodules within Transaction Manager (e.g., Money Market, Foreign Exchange, Securities, Derivatives, Commodities, and Trade Finance).

The Transaction Manager modules integrate well into other SAP modules, such as Cash Management and Financial Accounting.

Transaction Manager configuration is consistent wherever possible across different trade types. For example, there are basic differences between money market trades and derivative trades. Derivative trades have underlying assets, but money market trades do not. The configuration required for the different trade types is going to be different but is largely going to be driven by the definition of the product and transaction type configuration.

Invoice Verification for SAP Stephen Birchall, Invoice verification in SAP is an often misunderstood subject despite its central role in contributing to a company's fiscal health Adding to the confusion is the fact that it falls between two teams the MM team and the FI team and each assumes that the other is responsible for the design and configuration of Invoice Verification Although the process can be streamlined many organizations get the design and use of invoice verification wrong resulting in vendors not being paid and accounts being placed on stop which prevents further Purchase Orders from being processed until the vendor has been paid The aim of this book is to help readers fully understand the invoice verification process particularly the changes in ERP 6.0 If they get the design right then the process will run smoothly and vendors will be paid on time not too early either User input can be kept to a minimum and much of the process can be automatic There are one or two basic mistakes that are made during the design of the process and the guide highlights these and many other confusing areas and describes in simple terms the options available along with the consequences of getting it wrong

Auditing and GRC Automation in SAP Maxim Chuprunov,2013-04-09 Over the last few years financial statement
scandals cases of fraud and corruption data protection violations and other legal violations have led to numerous liability
cases damages claims and losses of reputation As a reaction to these developments several regulations have been issued
Corporate Governance the Sarbanes Oxley Act IFRS Basel II and III Solvency II and BilMoG to name just a few In this book
compliance is understood as the process mapped not only in an internal control system that is intended to guarantee
conformity with legal requirements but also with internal policies and enterprise objectives in particular efficiency and
profitability The current literature primarily confines itself to mapping controls in SAP ERP and auditing SAP systems Maxim
Chuprunov not only addresses this subject but extends the aim of internal controls from legal compliance to include
efficiency and profitability and then well beyond because a basic understanding of the processes involved in IT supported
compliance management processes are not delivered along with the software Starting with the requirements for compliance
Part I he not only answers compliance relevant questions in the form of an audit guide for an SAP ERP system and in the
form of risks and control descriptions Part II but also shows how to automate the compliance management process based on
SAP GRC Part III He thus addresses the current need for solutions for implementing an integrated GRC system in an
organization especially focusing on the continuous control monitoring topics Maxim Chuprunov mainly targets compliance
experts auditors SAP project managers and consultants responsible for GRC products as readers for his book They will find
indispensable information for their daily work from the first to the last page In addition MBA management information
system students as well as senior managers like CIOs and CFOs will find a wealth of valuable information on compliance in
the SAP ERP environment on GRC in general and its implementation in particular
