From Edmund Husserl The Idea Of Phenomenology:

The Idea of Phenomenology Edmund Husserl, 1999-04-30 In this fresh translation of five lectures delivered in 1907 at the University of G ttingen Edmund Husserl lays out the philosophical problem of knowledge indicates the requirements for its solution and for the first time introduces the phenomenological method of reduction For those interested in the genesis and development of Husserl s phenomenology this text affords a unique glimpse into the epistemological motivation of his work his concept of intentionality and the formation of central phenomenological concepts that will later go by the names of transcendental consciousness the noema and the like As a teaching text *The Idea of Phenomenology* is ideal it is brief it is unencumbered by the technical terminology of Husserl s later work it bears a clear connection to the problem of knowledge as formulated in the Cartesian tradition and it is accompanied by a translator s introduction that clearly spells out the structure argument and movement of the text

Encyclopedia of Contemporary Literary Theory Irene Rima Makaryk, 1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline As with any body of scholarship various schools of thought exist and sometimes conflict within it I R Makaryk has compiled a welcome guide to the field Accessible and jargon free the *Encyclopedia of Contemporary Literary Theory* provides lucid concise explanations of myriad approaches to literature that have arisen over the past forty years Some 170 scholars from around the world have contributed their expertise to this volume Their work is organized into three parts In Part I forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose The essays also discuss the uses and limitations of the various schools and the key issues they address Part II focuses on individual theorists It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context Part III deals with the vocabulary of literary theory It identifies significant complex terms places them in context and explains their origins and use Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture

Heidegger in the Twenty-First Century Tziovani Georgakis, Paul J. Ennis, 2015-03-02 The current volume is comparative and inter disciplinary and it provides a reflection on what thinking might become after Heidegger s philosophy Its aim is to critically expand the current field of research by presenting unfamiliar and uncharted avenues that will guide and carry the Heidegger scholarship into the twenty first century By doing so it addresses fundamental questions in the Heideggerian scholarship including its problems restraints and future direction It also engages and broadens the increasingly disparate approaches to Heidegger s work whether those approaches are traditional in their

employment of phenomenology and hermeneutics or whether they apply to Heidegger's thinking in new and surprising ways. The first section of the volume emphasizes the importance of methodology for the future of Heidegger studies while the second section examines the historical, ethical and vocal-poetical in Heidegger's thought and draws conclusions relevant to the Heidegger scholar of today. The final section demonstrates Heidegger's appeal to a variety of other discourses besides philosophy and the way his thinking could be creatively approached, utilized and implemented in our century. Contributions come from cutting edge scholars such as Babette E. Babich, Dermot Moran, François Raffoul and Trish Glazebrook. *Feminist Reflections on the History of Philosophy* Lilli Alanen, Charlotte Witt, 2004-09 Feminist work in the history of philosophy has come of age as an innovative field in the history of philosophy. This volume marks that accomplishment with original essays by leading feminist scholars who ask basic questions: What is distinctive of feminist work in the history of philosophy? Is there a method that is distinctive of feminist historical work? How can women philosophers be meaningfully included in the history of the discipline? Who counts as a philosopher? This collection is a unique collaboration among philosophers from North America and the Nordic Countries including papers written from both analytic and continental philosophical perspectives and discussing both ancient and modern philosophers. *Feminist Reflections on the History of Philosophy* will be of interest to historians of philosophy, feminist theorists, women's studies faculty and students and humanists interested in canon formation and transformation. *In the Name of Phenomenology* Simon Glendinning, 2007-08-07 The attempt to pursue philosophy in the name of phenomenology is one of the most significant and important developments in twentieth century thought. In this bold and innovative book Simon Glendinning explores the changing landscape of phenomenology in key texts by Husserl, Heidegger, Sartre, Merleau-Ponty, Levinas and Derrida. **Phenomenology and the Foundations of the Sciences** Edmund Husserl, 2001-11-30 There is no author's introduction to *Phenomenology and the Foundations of the Sciences* either as published here in the first English translation or in the standard German edition because its proper introduction is its companion volume *General Introduction to Pure Phenomenology*. 2 The latter is the first book of Edmund Husserl's larger work *Ideas Toward a Pure Phenomenology and Phenomenological Philosophy* and is commonly referred to as *Ideas I* or *Ideen I*. The former is commonly called *Ideen III*. Between these two parts of the whole stands a third *Phenomenological Investigations of Constitution* generally known as *Ideen II*. In this introduction the Roman numeral designations will be used as well as the abbreviation PFS for the translation at hand. In many translation projects there is an initial problem of establishing the text to be translated. That problem confronts translators of the books of Husserl's *Ideas* in different ways. The *Ideas* was written in 1912 during Husserl's years in Göttingen. 1901-1916 Books I and II were extensively revised over nearly two decades and the changes were incorporated by the editors into the texts of the *Husserliana* editions of 1950 and 1952 respectively. Manuscripts of the various reworkings of the texts are preserved in the Husserl Archives but for those unable to work there the only one directly available for *Ideen II* is the reconstructed one. *The Theory of Intuition in Husserl's*

Phenomenology Emmanuel Lévinas, 1995 In this landmark study Emmanuel Levinas discusses the aspects and function of intuition in Husserl's thought and its meaning for philosophical self reflection An essential and illuminating explication of central issues in Husserl's phenomenology it is also important as a formative work of one of this century's most distinguished philosophers Levinas focuses on the role of intuition which he explains as the theoretical act of consciousness that makes objects present to us He demonstrates how Husserl's theory of intuition follows directly from his new conception of being He then identifies intuition as the original phenomenon that leads to the concept of truth itself In this analysis he shows that Husserl's theory of being opens up an entirely new philosophical dimension

The Theory and Practice of Husserl's Phenomenology Harry P. Reeder, 2010

Ideas Pertaining to a Pure Phenomenology and to a Phenomenological Philosophy Edmund Husserl, 1983-09-30 the *Logische Untersuchungen* I phenomenology has been conceived as a substratum of empirical psychology as a sphere comprising immanent descriptions of psychical mental processes a sphere comprising descriptions that so the immanence in question is understood are strictly confined within the bounds of internal experience It would seem that my protest against this conception has been of little avail and the added explanations which sharply pinpointed at least some chief points of difference either have not been understood or have been heedlessly pushed aside Thus the replies directed against my criticism of psychological method are also quite negative because they miss the straightforward sense of my presentation My criticism of psychological method did not at all deny the value of modern psychology did not at all disparage the experimental work done by eminent men Rather it laid bare certain in the literal sense radical defects of method upon the removal of which in my opinion must depend an elevation of psychology to a higher scientific level and an extraordinary amplification of its field of work Later an occasion will be found to say a few words about the unnecessary defences of psychology against my supposed attacks

End of Phenomenology Tom Sparrow, 2014-06-04 Shows how speculative realism is replacing phenomenology as the beacon of realism in contemporary Continental philosophy

Event and Subjectivity: The Question of Phenomenology in Claude Romano and Jean-Luc Marion Kadir Filiz, 2023-12-11 Event and Subjectivity presents a rich phenomenological analysis of the event in contemporary phenomenology by focussing on the work of Claude Romano and Jean Luc Marion Although the event is a major topic of contemporary philosophy its centrality has not been acknowledged enough in the phenomenological movement The book starts with the idea that the event cannot find a proper place in Husserl's transcendental phenomenology and Heidegger's existential phenomenology It proposes a phenomenological version of the event that transforms the definition of phenomenon subjectivity and phenomenology itself in order to do justice to the phenomenality of the event At the same time Event and Subjectivity is the first book on Claude Romano's understanding of phenomenology in English It also offers a fresh reading of the phenomenology of Jean Luc Marion by highlighting the phenomenon of the event

Phenomenology World Wide Anna-Teresa Tymieniecka, 2002 Phenomenology is the main philosophy of the 20th century now passed on to a new

generation To restore its authentic vision this title proposes a return to its foundational source in Husserl's project of a universal science unpacking all its creative capacities

The Ethics of Husserl's Phenomenology Joaquim Siles i Borràs, 2010-02-11 The Ethics of Husserl's Phenomenology aims to relocate the question of ethics at the very heart of Husserl's phenomenology This is based on the idea that Husserl's phenomenology is an epistemological inquiry ultimately motivated by an ethical demand that pervades his writing from the publication of Logical Investigations 1900-1901 up to The Crisis of European Sciences and Transcendental Phenomenology 1935 Joaquim Siles Borràs traces the ethical concepts apparent throughout Husserl's main body of work and argues that Husserl's phenomenology of consciousness experience and meaning is ultimately motivated by an ethical demand by means of which Husserl aims to re-define philosophy and re-found science with the aim of making philosophy and science capable of dealing with the most pressing questions concerning the meaningfulness of human existence

An Actology of the Given Malcolm Torry, 2023-08-03 An actology introduced by the first book in this series Actology Action Change and Diversity in the Western Philosophical Tradition is a conceptual structure characterized by action change and diversity and that envisages reality as action in changing patterns The previous book in this series Actological Readings in Continental Philosophy reads a number of continental philosophers through this lens This new book An Actology of the Given takes a somewhat different approach it explores the concepts of the gift givenness giving and other cognates in the light of reality understood as action in patterns rather than as beings that change and it does so by discussing some anthropology the writings of a number of continental philosophers biblical texts social policy and a variety of other givens

Marion and Derrida on The Gift and Desire: Debating the Generosity of Things Jason Alvis, 2016-01-13 This book examines the various encounters between Jean-Luc Marion and Jacques Derrida on the gift considers their many differences on desire and demonstrates how

these topics hold the keys to some of phenomenology's most pressing structural questions especially regarding deconstructive approaches within the field The book claims that the topic of desire is a central lynchpin to understanding the two thinkers conflict over the gift for the gift is reducible to the desire to give which initiates a turn to the topic of generosity To what degree might loving also imply giving How far might it be suggested that love is reducible to desire and intentionality It is demonstrated how Derrida the generative father of deconstruction rejects the possibility of any potential relation between the gift and desire on the account that desire is bound to calculative repetition economical appropriation and subject centered interests that hinder deconstruction Whereas Marion a representative of the phenomenological tradition demands a unique union between the gift and desire which are both represented in his reduction to givenness and erotic reduction The book is the first extensive attempt to contextualize the stark differences between Marion and Derrida within the phenomenological legacy Husserl Heidegger Kant supplies readers with in depth accounts of the topics of the gift love and desire and demonstrates another means through which the appearing of phenomena might be understood namely according to the generosity of things *Heaven, Earth, and In-Between in the Harmony of Life* Anna-Teresa

Tymieniecka, 2012-12-06 This volume marks a phase of accomplishment in the work of the World Phenomenology Institute in unfolding a dialogue between Occidental phenomenology and the Oriental Chinese classic philosophy Going beyond the stage of reception the Oriental scholars show in this collection of studies their perspicacity and philosophical skills in comparing the concepts ideas the vision of classic phenomenology and Chinese philosophy toward uncovering their common intuitions This in depth probing aims at reviving Occidental thinking reaching to its intuitive sources as well as providing Chinese thinking with a precise apparatus of expression toward its rejuvenation in a new significance Studies by Korean and Chinese phenomenologists Nam In Lee Inhui Park Benjamin I Schwartz Anna Teresa Tymieniecka Sitansu Ray Zhang Xian Zhang Qingxiong Tsung I Dow Ashok K Gangadean Yushiro Takei Louise Sunderarajan Gregory Tropea James Sellmann Tyong Bok Rhie Sang Ki Kim Daniel Zelinski Qingjie Wang Calvin O Schrag Jung Sun Han *Ideas Pertaining to a Pure Phenomenology and to a Phenomenological Philosophy* Edmund Husserl, 1989-09-30 As is made plain in the critical apparatus and editorial matter appended to the original German publication of Husserl's *Ideas II* I this is a text with a history It underwent revision after revision spanning almost 20 years in one of the most fertile periods of the philosopher's life The book owes its form to the work of many hands and its unity is one that has been imposed on it Yet there is nothing here that cannot be traced back to Husserl himself Indeed the final clean copy for publication prepared by an assistant was completely reviewed by the master three times and emended by him in detail on each occasion Nevertheless in the end the work was in fact not submitted for publication and after Husserl's pen last touched the manuscript in 1928 it was set aside until posthumously edited and published by the Husserl Archives in 1952 The story of the composition of *Ideas II* begins with the pencil manuscript of 1912 This is the ultimate textual source for both *Ideas II* and *Ideas III* 2 It has been preserved as a folio of 84
