Hard Lesson of Trainings Riad Morshed,2021-08-17 Training is an organized procedure which brings about a semi permanent change in behavior for a definite purpose The three main areas involved are skills knowledge and attitudes but always with a definite purpose in mind It differs from education in many ways for all practical purpose training is aimed at specific job based objectives rather than the broader society based aims of education Historically trainees were expected to learn their jobs by exposure by picking up what they could from experienced fellow employees There were not termed trainees since they were not systematically trained but they enjoyed such titles as helpers apprentices in industrial circles But this method of learning was haphazard learning time was lengthy motivational needs often neglected with the possibility of many incorrect procedures being passed on There was also a certain fear from experienced members of the workforce that passing on their skills would ultimately lead to their own exit Planned economy and economic growth in the country has given emphasis to the need for a more systematic means of training for job skills Thus was born a more analytical approach

of training it is important that due attention is paid to training right from the time when one first starts doing a job. If not, as it is the unfortunate experience of many, it is attempts at learning games and sports; it will be extremely difficult, if not almost impossible, to unlearn what has once been learnt wrong on one's own during the initial stages. **The Small Business**
