State Ideology, Science, and Pseudoscience in Russia Baasanjav Terbish, 2022-02-25 This book recounts the entangled stories of three distinctly Russian movements state ideology Russian cosmism and Eurasianism from their inception at the end of the nineteenth century and beginning of the twentieth century until now Despite harboring pseudoscientific and mystical ideas specific to Russia all three movements were propagated by their followers as universal sciences and all three vied for scientific supremacy and universal acceptance Suppressed by the Bolsheviks and their state ideology as unscientific in the 1920s Russian cosmism and Eurasianism led an esoteric underground existence during the

Soviet period and re emerged in the dying years of the Soviet Union seeking not only to reclaim their scientific status but also to potentially fill the perplexing vacuum left by the ensuing demise of Soviet state ideology This study relates the post Soviet search for a new state ideology or new National Idea at the federal and regional levels based on the Kremlin s projects and the case of the ethnic Republic of Kalmykia in south west Russia *Russia's National Security in Aleksandr Dugin's Neo-Eurasianism* Marcin Skladanowski,2023-09-05 Aleksandr Dugin is an extremely radical thinker Nevertheless it is worth dealing with his thought because it shows in an exaggerated form how the evolution of social and political ideas took place in the history of Russia which led to Putin s contemporary neo imperialism This book presents the Russian discourse on national security against a broader background of global academic reflection takes a closer look at the sources and ideological basis of the concept of Russia s security developed by Dugin discusses the subject and main dimensions of Russia s national security in Dugin s works and shows the importance of Russia s foreign policy for the creation of its national security

Kirgistan und die sowjetische Moderne Moritz Florin,2014-12-10 The Soviet state promised its citizens liberation from the shackles of an outmoded past Soviet modernism after 1945 even found enthusiastic followers on the Central Asian periphery But from the 1960s at the latest public criticism grew loud A small group of intellectuals around Chinghiz Aitmatov criticized the decay of traditions the repression of Islam and the increasing environmental destruction This triggered a gradual process of delegitimisation of Soviet rule The volume analyses this process using the example of the Soviet Republic of Kyrgyzstan ranking it alongside global historical contexts of decolonisation Cold War and a growing criticism of modernism

Russia as Civilization Kåre Johan Mjør,Sanna Turoma,2020-05-18 Analyzing the use of civilization in Russian language political and media discourses intellectual and academic production and artistic practices this book discusses the rise of civilizational rhetoric in Russia and global politics Why does the concept of civilization play such a prevalent role in current Russian geopolitical and creative imaginations The contributors answer this question by exploring the extent to which discourse on civilization penetrates Russian identity formations in imperial and national configurations and at state and civil levels of society Although the chapters offer different interpretations and approaches the book shows that Russian civilizationism is a form of ideological production responding to the challenges of globalization The concept of civilization while increasingly popular as a conceptual tool in identity formation is also widely contested in Russia today This examination of contemporary Russian identities and self understanding will be of particular interest to students and scholars of Russian area studies and Slavic studies intellectual and cultural history nationalism and imperial histories international relations discourse analysis cultural studies media studies religion studies and gender studies **The New Cold War and the Remaking of Regions** T.V. Paul,Markus Kornprobst,2025-07-01 A compelling examination of how secondary states are preserving their strategic autonomy and are resisting spheres of influence Russia s invasion of Ukraine and the deteriorating United States China relationship signify the onset of the New Cold War Unlike the original Cold War this competition is

multipolar and multiplex with secondary powers small states and even nonstate actors pragmatically selecting which of their interests intersect with those of the great powers The New Cold War and the Remaking of Regions contends that multiplexity and multipolarity have important repercussions for the world's regional orders Contributors to the book address the New Cold War and regional ordering processes from realist liberal and constructivist perspectives They demonstrate how variable regional dynamics will lead either to peaceful change or conflict This volume is part of a new wave of scholarship that expands the focus of international relations beyond great powers and recognizes the increasing agency that other states have gained in the twenty first century world order **Russian Elite Image of Iran** Dmitry Shlapentokh,2009 **Civilization**

Giovanni Borgognone,Patricia Chiantera-Stutte,2022-09-29 Civilizations or rather narratives about civilizations matter not only as research subjects in textbooks literary and scientific essays but also in politics This seems to be the case in civilizational states such as China Russia Turkey and Syria Also in Western countries in recent decades the notion of civilization has often been used in public discourse political parties and leaders have referred in particular to the need to protect Western civilization calling in this regard for policies to restrict immigration from Muslim countries In 2022 the narrative on civilization was used to legitimize the Russian invasion of Ukraine The studies in this collected volume reconstruct how civilizational paradigms and narratives have been used to explain political relations to define the global order to justify attempts to gain hegemony over particular geopolitical areas and to make predictions on global developments in specific times of crisis In particular this book analyzes the concepts of civilization as they have been used in the intellectual and political discourse in periods particularly critical for global relations and for the consolidation or contestation of the West's dominant role in international national politics and academic discourse Intermarium Marek Jan Chodakiewicz,2017-09-08 History and collective memories influence a nation its culture and institutions hence its domestic politics and foreign policy That is the case in the Intermarium the land between the Baltic and Black Seas in Eastern Europe The area is the last unabashed rampart of Western Civilization in the East and a point of convergence of disparate cultures Marek Jan Chodakiewicz focuses on the Intermarium for several reasons Most importantly because as the inheritor of the freedom and rights stemming from the legacy of the Polish Lithuanian Ruthenian Commonwealth it is culturally and ideologically compatible with American national interests It is also a gateway to both East and West Since the Intermarium is the most stable part of the post Soviet area Chodakiewicz argues that the United States should focus on solidifying its influence there The ongoing political and economic success of the Intermarium states under American sponsorship undermines the totalitarian enemies of freedom all over the world As such the area can act as a springboard to addressing the rest of the successor states including those in the Caucasus Central Asia and the Russian Federation Intermarium has operated successfully for several centuries It is the most inclusive political concept within the framework of the Commonwealth By reintroducing the concept of the Intermarium into intellectual discourse the author highlights the

autonomous and independent nature of the area This is a brilliant and innovative addition to European Studies and World Culture Contemporary Issues in International Relations Mehmet Emin Erendor,Mehmet Fatih Öztarsu,2020-03-04 Recent regional and global crises have changed the structure of international relations and cause countries to be inconsistent in their policies Examples of these include the protest demonstrations and political crises which started in the Middle East and African countries in 2010 known as the Arab Spring which had a major effect on Syria and the movement towards Brexit These emerging regional and global crises have highlighted the shortcomings of the discipline of international relations and the need for a new detailed study to be conducted The topics in this book have been carefully selected in order to provide a more objective assessment of the recent and ongoing problems of the international community This volume will be a valuable resource for graduate undergraduate and post graduate students academics and researchers in the areas of cyber security international law international organizations and international relations **New Russian Nationalism** Pal

Nation, Ethnicity and Race on Russian Television Stephen Hutchings,Vera Tolz,2015-03-05 Russia one of the most ethno culturally diverse countries in the world provides a rich case study on how globalisation and associated international trends are disrupting and causing the radical rethinking of approaches to inter ethnic cohesion The book highlights the importance of television broadcasting in shaping national discourse and the place of ethno cultural diversity within it It argues that television s role here has been reinforced rather than diminished by the rise of new media technologies Through an analysis of a wide range of news and other television programmes the book shows how the covert meanings of discourse on a particular issue can diverge from the overt significance attributed to it just as the impact of that

discourse may not conform with the original aims of the broadcasters The book discusses the tension between the imperative to maintain security through centralised government and overall national cohesion that Russia shares with other European states and the need to remain sensitive to and to accommodate the needs and perspectives of ethnic minorities and labour migrants It compares the increasingly isolationist popular ethnonationalism in Russia which harks back to old fashioned values with the similar rise of the Tea Party in the United States and the UK Independence Party in Britain Throughout this extremely rich well argued book complicates and challenges received wisdom on Russia s recent descent into authoritarianism It points to a regime struggling to negotiate the dilemmas it faces given its Soviet legacy of ethnic particularism weak civil society large native Muslim population and overbearing yet far from entirely effective state control of the media

The United States, the Soviet Union and the Geopolitical Implications of the Origins of the Cold War Nicolas Lewkowicz, 2018-10-30 The United States the Soviet Union and the Geopolitical Implications of the Origins of the Cold War 1945 1949 describes how the United States and the Soviet Union deployed their hard and soft power resources to create the basis for the institutionalization of the international order in the aftermath of World War Two The book argues that the origins of the Cold War should not be seen from the perspective of a magnified spectrum of conflict but should be regarded as a process by which the superpowers attempted to forge a normative framework capable of sustaining their geopolitical needs and interests in the post war scenario The United States the Soviet Union and the Geopolitical Implications of the Origins of the Cold War 1945 1949 examines how the use of ideology and the instrument of political intervention in the spheres of influence managed by the superpowers were conducive to the establishment of a stable international order It postulates that the element of conflict present in the early period of the Cold War served to demarcate the scope of manoeuvring available to each of the superpowers and studies the notion that the United States and the Soviet Union were primarily interested in establishing the conditions for the accomplishment of their vital geostrategic interests This required the implementation of social norms imposed in the respective spheres of influence a factor that provided certainty to the spectrum of interstate relations after the period of turmoil that culminated with the onset of World War Two

We God's People Jocelyne Cesari, 2021-12-16 Cesari argues that both religious and national communities are defined by the three Bs belief behaviour and belonging By focusing on the ways in which these three Bs intersect overlap or clash she identifies the patterns of the politicization of religion and vice versa in any given context Her approach has four advantages firstly it combines an exploration of institutional and ideational changes across time which are usually separated by disciplinary boundaries Secondly it illustrates the heuristic value of combining qualitative and quantitative methods by statistically testing the validity of the patterns identified in the qualitative historical phase of the research Thirdly it avoids reducing religion to beliefs by investigating the significance of the institution ideas connections and fourthly it broadens the political approach beyond state religion relations to take into account actions and ideas conveyed in other arenas such as education

welfare and culture Culture, Political Economy and Civilisation in a Multipolar World Order Ray Silvius, 2016-10-04 This book seeks to understand how Russia's multifaceted rejection of American unipolarity and de-territorialised neo-liberal capitalism has contributed to the gestation of the present multipolar moment in the global political economy. Analysing Western world order precepts via the actions of a powerful albeit precarious national political economy and state structure situated on the periphery of Western world order, Silvius explores the manner in which culture and ideas are mobilised for the purposes of national, regional and international political and economic projects in a post-global age. The book explains and analyses the tensions of post-Soviet Russia's integration into and simultaneous partial rejection of the capitalist global political economy. Provides an overview of the social, political and historical origins of Russian samobytnost (uniqueness) after the fall of the Soviet Union and demonstrates their significance to contemporary understandings of world order. Explores how structures of cultural difference and practices of cultural differentiation interact with the normative legacies of American hegemonic aspirations in contemporary world order structures. Evaluates how cultural and civilisational representations are mobilised for state projects and their corresponding regional and international dimensions within the global political economy. This book will be of great interest to students and scholars of Russian Foreign Policy, IPE and comparative political economy.

Putinismus Walter Laqueur, 2015-04-08 Walter Laqueur zieht zu den fruchtbarsten und einflussreichsten Zeitgeschichtlern der westlichen Welt. Die Zeit. Worum geht es? Der Russland-Experte Walter Laqueur beleuchtet Putins neue Großmachtpolitik. Er zeigt, wie sich nach dem Ende der Sowjetunion ein neuer gesellschaftlicher Konsens gebildet hat: antiwestlich, antiliberal und staatsrigid, der an tief verwurzelte Traditionen Russlands anknüpft. Putin, Vorreiter dieser fatalen Entwicklung, findet breite Zustimmung im Land. Sein Kurs durch die Destabilisierung Osteuropas, verlorenen Einfluss zurückzugewinnen, führt unweigerlich in eine gefährliche Konfrontation mit dem Westen.
