Transformation of Japanese Multinational Enterprises and Business Shige Makino, Yasuro Uchida, Tamiko Kasahara, 2024-03-30 The purpose of this book is to highlight how current successful Japanese multinational enterprises MNEs and companies have changed their business or business models in the past three decades Japanese MNEs received a lot of attention from academia and industry during the 1980s and the early 1990s and their factors for success have been compared with those of Western MNEs Unfortunately following the collapse of the bubble economy in the early 1990s international business researchers and practitioners' attention has turned away from Japan and its MNEs to emerging markets notably the rapidly growing China Japanese MNEs have faced the mature domestic economy and also have had to overcome many new challenges in the twenty first century such as rapid aging depopulation and response to new technologies Japanese MNEs and companies today are being forced to respond to new business environments never seen in the past The prerequisites for business activities have significantly changed from those of former Japanese companies and their management practices Even in such a difficult situation however many Japanese MNEs and emerging companies have achieved steady growth and have succeeded by changing their business models This book provides the reader with new directions for research and lessons by analyzing the challenges of Japanese multinational enterprises and emerging companies The redirection of attention is expected to have a positive impact on the field of international business study and practice

Wu,2013-11-24 The Color of Success tells of the astonishing transformation of Asians in the United States from the yellow peril to model minorities peoples distinct from the white majority but lauded as well assimilated upwardly mobile and exemplars of traditional family values in the middle decades of the twentieth century As Ellen Wu shows liberals argued for the acceptance of these immigrant communities into the national fold charging that the failure of America to live in accordance with its democratic ideals endangered the country s aspirations to world leadership Weaving together myriad perspectives Wu provides an unprecedented view of racial reform and the contradictions of national belonging in the civil rights era She highlights the contests for power and authority within Japanese and Chinese America alongside the designs of those external to these populations including government officials social scientists journalists and others And she demonstrates that the invention of the model minority took place in multiple arenas such as battles over zoot suiters leaving wartime internment camps the juvenile delinquency panic of the 1950s Hawaii statehood and the African American freedom movement Together these illuminate the impact of foreign relations on the domestic racial order and how the nation accepted Asians as legitimate citizens while continuing to perceive them as indelible outsiders By charting the emergence of the model minority stereotype The Color of Success reveals that this far reaching politically charged process continues to have profound implications for how Americans understand race opportunity and nationhood *Strategic Management* V.S.P.
