Human Rights, Religion and International Law Kerry O'Halloran, 2018-11-13 In this book Kerry O'Halloran analyses a subject of international interest religion and examines related contemporary issues from a human rights perspective The book takes the view that while the impact of Islamic State violence has dramatically demonstrated the destructive power of religious extremism for contemporary western societies there are also good grounds for the latter to examine the extent to which their laws and policies nationally and internationally are contributing to religion s currently destabilizing social role It makes the case for a fuller understanding of the role of religion or belief and argues for a rebalancing of the functional relationship between Church and State both nationally and internationally Beginning with an overview of religion including an examination of key concepts and constructs the chapters go on to outline the international framework of related human rights provisions and note the extent of their ratification It proceeds by identifying a set of themes such as the Constitutional positioning of religion law and policy in relation to secularism faith schools equality legislation and the religious exemption and the tension between free speech and religion and undertakes a comparative evaluation of how these and other themes indicate significant differences in six leading common law jurisdictions as illustrated by their associated legislation and case law It then considers why this should be and assesses any implications arising This book will be of great interest to students and scholars in the fields of law religious studies political science human rights and social policy

New Medicalism and the Mental Health Act John Fanning, 2018-08-09 Ten years have passed since the Mental Health Act MHA 2007 came into force in England An amending statute the Act reformed the MHA 1983 and reshaped the law governing the compulsory care and treatment of people suffering from mental disorders Primarily driven by concerns about risk it sought to remove legalistic obstacles to civil commitment and extend the law s coercive reach into the community At the time of its introduction the 2007 Act was written off as a retrograde step and a missed opportunity for radical rights focused reform Despite this little attention has been paid to its impact in the years since Published to coincide with the tenth anniversary of the 2007 Act this book offers a timely evaluation of mental health law and policy in England It argues that the current MHA defies easy categorisation within any of the descriptive models which have customarily narrated the mechanics of civil commitment namely legalism new legalism and medicalism It therefore makes the case for a new model new medicalism to account for the 2007 Act s enhancement of the discretion of mental health professionals for the express purposes of facilitating the management of situations of risk In doing so the book critically examines the problems inherent in civil commitment

frameworks organised around the concept of risk explores the theoretical foundations of new medicalism considers the challenges facing proponents of future reform in the era of the UN Convention on the Rights of Persons with Disabilities and reflects on the 2007 Act's practical impact
