Managing Health Care Business Strategy George B. Moseley III, Moseley, 2017-03-20 Managing Health Care Business Strategy is the definitive textbook on strategic planning and management for healthcare organizations. It offers all the basic information on strategic planning and management within the unique context of organizations concerned with the delivery and financing of health care. It does this by noting the singular strategic environment in health care, explaining the special procedures and options available to health care organizations and providing real life examples in the form of case studies. It includes not only a description of the basic multi-step process of creating and then managing a strategic plan but also a detailed look at the role played by the key business functions: finance, marketing, human resources, information technology, and law, as well as specific strategic options: merger, acquisition, reorganization, joint venture, and some of the popular tools for analyzing strategic situations: balanced scorecard, Six Sigma, SWOT.

Szamosi, 2018-08-15 Despite over three decades of debate around the nature of human resource management (HRM), its intellectual boundaries and its application in practice, the field continues to be dogged by a number of theoretical and practical limitations. Written by an international team of respected scholars, this updated textbook adopts a critical perspective to examine the core management function of HRM in all its complexity, including its darker sides. *Human Resource Management: A Critical Approach* opens with a critique of the very concept of HRM, tracing its development over time and then systematically analyses the context of HRM practice, of HRM and international perspectives on HRM. New chapters commissioned for this second edition look at HRM and the issues of diversity, migration, global supply chains, and economic crisis. This textbook is essential reading for advanced and inquisitive students of HRM and for HRM professionals looking to deepen their understanding of the complexities of their field.
