The Innovator's Dilemma - Disruptive Innovation in der Automobil-Industrie: Elektromobilität anhand des Beispiel-Unternehmens VW Matthias Zoephel, 2011-04-29. Forschungsarbeit aus dem Jahr 2009 im Fachbereich BWL - Unternehmensführung / Management Organisation, Note 2,2, Hochschule für Technik und Wirtschaft Chur. Veranstaltung: MSc Entrepreneurship. Sprache: Deutsch. Abstract: 1995 stellte Clayton Christensen seine Theorie vor, warum etablierte Unternehmen an manchen Innovationen scheitern. Darin argumentiert er, dass nur bestimmte Innovationen die disruptiven Innovationen eine Gefahr für etablierte Unternehmen darstellen können, wobei sustaining Innovationen den etablierten Unternehmen keine existenzbedrohenden Probleme bereiten. Disruptive Innovationen stellen eine neue Technologie dar, welche außerhalb des Knowhow-Bereichs von etablierten Unternehmen liegt und welche das Potential hat, die jetzige Technologie des etablierten Unternehmens zu ersetzen. Das Unternehmen steht dann vor der Entscheidung, entweder Ressourcen von der jetzigen Technologie abzuziehen und in die neue Technologie zu investieren oder abzuwarten, ob sich die neue Technologie wirklich am Markt durchsetzt. Ersteres könnte dazu führen, dass das etablierte Unternehmen Ressourcen verschwendet, im Falle, dass sich die neue Technologie nicht durchsetzt, und letzteres könnte dazu führen, dass das Unternehmen in technologischen Rückstand gerät, wenn sich die neue Technologie doch durchsetzt. Beides kann zu Marktanteilsverlusten führen, und Christensen bezeichnet diese Situation als das Innovator's Dilemma für etablierte Unternehmen. Dieser Report wird im ersten Abschnitt Christensen's Theorie detaillierter beleuchtet, wobei die verschiedenen Arten von Innovationen definiert und beschrieben werden. Ein aktuelles Beispiel der disruptiven Innovationstheorie, das Aufkommen der Elektromobilität in der Automobilbranche, wird im zweiten Teil dieses Reports aufgezeigt, wobei der Deutsche Autobauer Volkswagen als Beispielunternehmen dienen wird. Mögliche Lösungsvorschläge wie VW das Innovator's Dilemma meistern kann, werden im dritten Teil dieses Berichts erläutert. Bevor der vierte Teil die Erkenntnisse des Reports zusammenfasst und eine Schlussfolgerung zieht.

Christopher Westland,2017-09-16 This is an exciting new edition of a core textbook that explores innovation management from a global perspective Innovation management is increasingly significant both as an academic discipline and as an integral part of the way businesses seek to change and grow However the key factors behind successful innovation and the process by which innovation is turned into profit in the global arena remain largely undefined The new edition provides a unique answer to these questions and offers a step by step guide to innovation strategy development taking into account the global context in which businesses today operate Written by a highly experienced instructor this is an ideal companion for undergraduate students of innovation as well as postgraduate and MBA students taking modules with an innovation component New to this Edition Completely rewritten and restructured to explore in more depth how innovative ideas are identified and strategized in an increasingly globalized world Fully updated and extended case studies on world leading companies Increased attention to commercialized innovation including factors such as intellectual property laws technology acceleration and the competition for venture capital and finance Coverage of new topics such as open innovation and service innovation Expanded coverage of the tools and methods needed to understand financial gain and risk *Disrupting the Digital Humanities* Dorothy Kim,Jesse Stommel,2018 All too often defining a discipline becomes more an exercise of exclusion than inclusion Disrupting the Digital Humanities seeks to rethink how we map disciplinary terrain by directly confronting the gatekeeping impulse of many other so called field defining collections What is most beautiful about the work of the Digital Humanities is exactly the fact that it can t be tidily anthologized In fact the desire to neatly define the Digital Humanities to filter the DH y from the DH is a way of excluding the radically diverse work that actually constitutes the field This collection then works to push and prod at the edges of the Digital Humanities to open the Digital Humanities rather than close it down Ultimately it s exactly the fringes the outliers that make the Digital Humanities both lovely and rigorous This collection does not constitute yet another reservoir for the new Digital Humanities canon Rather our aim is less about assembling content as it is about creating new conversations Building a truly communal space for the digital humanities requires that we all approach that space with a commitment to 1 creating open and non hierarchical dialogues 2 championing non traditional work that might not otherwise be recognized through conventional scholarly channels 3 amplifying marginalized voices 4 advocating for students and learners and 5 sharing generously to support the work of our

IntroBooks,2019-01-12 The term disruptive innovation was given in the year 1995 by Clayton M Christensen and is regarded as one of the most influential and important innovations of the 21st century Disruptive innovation refers to the innovation that helps in creating new market and value network in place of the existing market and value network which leads to the disruption of the market leading firms alliances and products that had already been established earlier Each and every innovation cannot be regarded as a disruptive innovation even if they are bringing about change in the existing system In accordance with the Theory of Disruptive Innovation disruptive innovation has been classified into two types low end disruption and new market disruption The low end disruption is a type of disruption that occurs when the changes within the product take place at a higher rate than the customers are able to adapt to the changes made within the product The new market disruption occurs when a new product emerges in the market that has not been served earlier by any of the incumbents of the industry and that fits itself within the new or emerging market segment The process of disruptive

innovation is considered important for business leaders because of the benefits that it provides to the customers of the market. A disruptive innovator provides the products at a favorable price to its customers as well as years at creating a new and improvised value of his/her product by making additional changes in the product. The process of disruptive innovation has been proven beneficial for executives also. The first disruptive innovation was encountered by the human beings in around 10 000 BC in the Middle East and since then it has continued to take place.
