networks will have an increasingly important role and impact in making the global village a reality The papers collected in this volume highlight the global nature of the activities and the tremendous pace of R D in the field of communications and networking *2000 IEEE International Conference on Multimedia and Expo, ICME2000: Wednesday, 2000* **The Application of Programmable DSPs in Mobile Communications** Alan Gatherer, Edgar Auslander, 2001-12-21 With the introduction of WAP in Europe and I mode in Japan mobile terminals took their first steps out of the world of mobile telephony and into the world of mobile data At the same time the shift from 2nd generation to 3rd generation cellular technology has increased the potential data rate available to mobile users by tenfold as well as shifting data transport from circuit switched to packet data These fundamental shifts in nature and the quantity of data available to mobile users has led to an explosion in the number of applications being developed for future digital terminal devices Though these applications are diverse they share a common need for complex Digital Signal Processing DSP and in most cases benefit from the use of programmable DSPs Digital Signal Processors Features contributions from experts who discuss the implementation and applications of programmable DSPs Includes detailed introductions to speech coding speech recognition video and audio compression biometric identification and their application for mobile communications devices Discusses the alternative DSP technology which is attempting to unseat the programmable DSP from the heart of tomorrow s mobile terminals Presents innovative new applications that are waiting to be discovered in the unique environment created when mobility meets signal processing The Application of Programmable DSPs in Mobile Communications provides an excellent overview for engineers moving into the area of mobile communications or entrepreneurs looking to understand state of the art in mobile terminals It is also a must for students and professors looking for new application areas where DSP technology is being applied

BoogarLists | Directory of Electronics Technologies , International Conference on Digital Signal Processing Proceedings ,2002 Embedded Microprocessor Systems Christian Müller-Schloer, 1996 Embedded microprocessor systems are affecting our daily lives at a fast pace mostly unrecognised by the general public Most of us are aware of the part they are playing in increasing business efficiency through office applications such as personal computers printers and copiers Only a few people however fully appreciate the growing role of embedded systems in telecommunications and industrial environments or even in everyday products like cars and home appliances The challenge to engineers and managers is not only highlighted by the sheer size of the market 1.5 billion microcontrollers and microprocessors are produced every year but also by the accelerating innovation in embedded systems towards higher complexity in hardware software and tools as well as towards higher performance and lower consumption To maintain competitiveness in this demanding environment an optimum mix of innovation time to market and system cost is required Choosing the right options and strategies for products and companies is crucial and rarely obvious In this book the editors have therefore skilfully brought together more than fifty contributions from some of the leading authorities in embedded

systems The papers are conveniently grouped in four sections
