The Hyperboloidal Foliation Method Philippe G Lefloch, Yue Ma, 2014-11-27 The Hyperboloidal Foliation Method introduced in this monograph is based on a 3+1 foliation of Minkowski spacetime by hyperboloidal hypersurfaces This method allows the authors to establish global in time existence results for systems of nonlinear wave equations posed on a curved spacetime It also allows to encompass the wave equation and the Klein Gordon equation in a unified framework and consequently to establish a well posedness theory for a broad class of systems of nonlinear wave Klein Gordon equations This book requires certain natural null conditions on nonlinear interactions which are much less restrictive than the ones assumed in the existing literature This theory applies to systems arising in mathematical physics involving a massive scalar field such as the Dirac Klein Gordon systems

Magnan,2004 Muon-Catalyzed Fusion and Fusion with Polarized Nuclei B. Brunelli,G.G. Leotta,2013-11-11 The International School of Fusion Reactor Technology started its courses 15 years ago and since then has maintained a biennial pace Generally each course has developed the subject which was announced in advance at the closing of the previous course The subject to which the present proceedings refer was chosen in violation of that rule so as to satisfy the recent and diffuse interest in cold fusion among the main European laboratories involved in controlled thermonuclear research CTR In the second half of 1986 we started to prepare a workshop aimed at assessing the state of the art and possibly of the perspectives of muon catalyzed fusion Research in this field has recently produced exciting experimental results open to important practical applications We thought it worthwhile to consider also the beneficial effects and problems of the polarization of the nuclei in both cold and thermonuclear fusion In preparing the 8th Course on Fusion Reactor Technology it was necessary to abandon the traditional course format because the influence of the workshop procedure was inevitable the participants were roughly equally divided into experts in cold fusion and experts in thermonuclear fusion The course had largely an interdisciplinary character as many disciplines were involved atomic and molecular physics nuclear physics accelerator technology system analysis etc Plasma physics was excluded with a sigh of relief from the experts in thermonuclear fusion
