

The background of the book cover is a photograph of railroad tracks curving through a rural landscape under a purple and blue sky. The tracks are dark and lead the eye towards the horizon. The sky is a gradient of purple and blue, suggesting dusk or dawn. The surrounding fields are green and yellow, with some distant buildings visible on the horizon.

Its theoretical framework and grounded discussions engage students to think clearly and systematically about dilemmas in the rapidly changing media environment. The 13 chapter text is organized around six decision-making questions: the 5Ws and H of media ethics. The questions encourage students to articulate the issues, apply codes, policies or laws, consider the needs of stakeholders, sift and sort through conflicting values, integrate philosophic principles and pose a test of publicity. Specifically, the questions ask: What's your problem? Why not follow the rules? Who wins, who loses? What's it worth? Who's whispering in your ear? How's your decision going to look? As they progress through the text, students are encouraged to resolve dozens of practical applications and increasingly complex case studies relating to journalism, new media, advertising, public relations and entertainment. Other distinctive features include: Comprehensive materials on classic moral theory and current issues such as truth-telling and deception, values, persuasion and propaganda, privacy, diversity and loyalty. A user-friendly approach that challenges students to think for themselves rather than imposing answers on them. Consistent connections between theories and the decision-making challenges posed in the practical applications and case studies. A companion website with online resources for students including additional readings and chapter overviews as well as instructor materials with a test bank, instructor's manual, sample syllabi and more. **Winning Votes by Abusing Reason** Jamie Carlin Watson,2016-12-14 Over the past few decades psychologists have discovered that human reasoning is defective in surprising ways We are beset by numerous biases and heuristics which lead us to reason poorly about things that matter to us And while there are illuminating evolutionary explanations for how these biases and heuristics may have benefited our species in its phylogeny psychologists are unanimous that these cognitive dispositions largely corrupt rather than aid our belief forming practices In *Winning Votes by Abusing Reason* Political Rhetoric and Responsible Belief Jamie Watson argues that political rhetoric rather than helping us overcome these defects exacerbates them And standard attempts to address this problem such as deliberative democracy and paternalism tend to either exclude citizens from important decisions or give them the illusion of reasoning well perpetuating poor and irresponsible political beliefs This book concludes that rather than attempt more political solutions the most promising approach to forming and preserving responsible political beliefs is to adopt individual principles of epistemic caution The author brings together insights from political philosophy social epistemology behavioral psychology and agnotology to suggest how we might protect our belief forming behavior from the corrosive effects of political rhetoric Recommended for scholars of philosophy rhetoric political science and communications
