Dynamo in Structural Design

Håvard Vasshaug, Dark Architects

Class Description

The visual programming interface of Dynamo is enabling structural engineers with the tools to build optimized structures with minimal energy, and subsequently make their own design tools. Based on the Revit Platform, we can use our creativity to develop optimized structural systems using computational logic in an advanced building information modelling environment. This presentation will teach participants how to create and iterate computational space frames with native Revit Framing elements and Adaptive Components, and how these can be used in structural analysis.

About the Speaker:

Håvard Vasshaug is a Structural Engineer (M.Sc.), BIM Manager and Design Technologist at Dark Architects. He has vast experience providing Revit training, solutions, and seminars for architects and engineers over the past 8 years, and now uses this background to share knowledge of digital building design solutions. He regularly speaks about technical workflows, digital innovation and human development at various national and international conferences and seminars, and receive wide acclaim for his talks and classes. He writes about BIM and visual scripting solutions on vasshaug.net, and administers the Norwegian Revit forum. Håvard has a passion for making technology work in human minds and on computers, and he has three tools in doing that: Building project development, technology research, and knowledge sharing.
