Relational Ethics in Christian Music fills part of this scholarly gap by focusing on the religious aspects of musical activity particularly on the practices of Christian communities Based on ethnomusicological fieldwork at three Protestant churches and a group of seminary students studying in an immersion course at South by Southwest SXSW and synthesizing theories of discourse formation and care ethics oriented towards restorative justice it first argues that relationships are ontological for both human beings and musical activity It further argues that musical meaning and emotion converge in human bodies such that music participates in personal and communal identity construction in affective ways yet these constructions are not always just Thus considering these aspects of music s ways of being in the world Music for Others finally argues that music is ethical when it preserves people in and restores people to just relationships with each other and thereby with God
