**Photography and September 11th** Jennifer Good, 2020-09-13 It is all but impossible to think of September 11th 2001 and not at the same time recall an image The overwhelmingly visual coverage in the world's media pictured a spectacle of terror from images of the collapsing towers to injured victims and fatigued firefighters In the days weeks and months that followed this vast collection of photographs continued to circulate relentlessly This book investigates the psychological impact of those photographs on a stunned American audience Drawing on trauma theory this book asks whether the prolonged exposure of audience to photographs was cathartic or damaging It explores how first the collective memory of the event was established in the American psyche and then argues that through repetitive use of the most powerful pictures the culture industry created a dangerously simple 9 11 metanarrative At the same time people began to reclaim and use photography to process their own feelings most significantly in communities of photographic memorial websites Such exercises were widely perceived as democratic and an aid to recovery This book interrogates that assumption providing a new understanding of how audiences see and process news photography in times of crisis

**Photography's Materialities** Geoff Bender, Rasmus R. Simonsen, 2021-05-17 There is little dispute that photography is a material practice and that the photograph itself is ineluctably material And yet matter material and materiality have proven to be remarkably elusive terms of inquiry frequently producing studies that are disparate in scope sharing seemingly little common ground Although the wide methodological range of materialist study can be dizzying it is this book's contention that that multiplicity is also the field's greatest asset keeping materialist inquiry enduringly vibrant provided that varying methods are in close enough proximity to converse Photography's Materialities orchestrates one such conversation Juxtaposing the insights of theorists like Lacan Benjamin and Latour beside close studies of crime spirit and composite photography among others this collection aims for a productive synergy one capacious enough

Alexandra Moschovi,2020-12-15 The first transnational history of photography's accommodation in the art museum

Photography was long regarded as a middle brow art by the art institution Yet at the turn of the millennium it became the hot global art of our time In this book part institutional history part account of shifting photographic theories and practices

Alexandra Moschovi tells the story of photography's accommodation in and as contemporary art in the art museum Archival research of key exhibitions and the contrasting collecting policies of MoMA Tate the Guggenheim the V A and the Centre Pompidou offer new insights into how art as photography and photography as art have been collected and exhibited since the 1930s Moschovi argues that this accommodation not only changed photography's status in art culture and society but also played a significant role in the rebranding of the art museum as a cultural and social site      *Felice Beato* Anne

Christine Muller,2017-01-20 This book investigates the September 11 2001 attacks as a case study of cultural trauma as well as how the use of widely distributed easily accessible forms of popular culture can similarly focalize evaluation of other moments of acute and profoundly troubling historical change The attacks confounded the traditionally dominant narrative of the American Dream which has persistently and pervasively featured optimism and belief in a just world that affirms and rewards self determination This shattering of a worldview fundamental to mainstream experience and cultural understanding in the United States has manifested as a cultural trauma throughout popular culture in the first decade of the twenty first century Popular press oral histories literary fiction television and film are among the multiple ubiquitous sites evidencing preoccupations with existential crisis vulnerability and moral ambivalence with fate no win scenarios and anti heroes now pervading commonly told and readily accessible stories Christine Muller examines how popular culture affords sites for culturally traumatic events to manifest and how readers viewers and other audiences negotiate their fallout
