Barricades And Borders Europe 1800 1914 By Robert Gildea:

Barricades and Borders Robert Gildea, 2003-03-06 This is a comprehensive survey of European history from the coup d'état of Napoleon Bonaparte in France to the assassination of the Archduke Ferdinand at Sarajevo which led to the First World War. It concentrates on the twin themes of revolution and nationalism which often combined in the early part of the century but which increasingly became rival creeds. Going beyond traditional political and diplomatic history, the book incorporates the results of recent research on population movements, the expansion of markets, the accumulation of capital, social mobility, education, changing patterns of leisure, religious practices and intellectual and artistic developments. The work falls into three chronological sections. The first, starting in 1800 rather than the more usual 1815, follows the build up of the revolutionary currents which were eventually going to erupt in the Year of Revolutions 1848. The second, from 1850 to 1880, deals with the golden age of capitalism, the successful culmination of struggles for national unification and the threat of anarchism. The concluding chapters look at the social and political stresses caused by socialism and national minorities, at new attempts by government to order society, imperial rivalry and the descent into a war which was to mark the end of nineteenth century Europe. For this third edition, Dr Gildea has substantially revised the text and maps and completely updated the bibliography. Newly added introductory sections guide the reader through the wealth of material in each chapter. The new edition also includes for the first time a full Chronology of the period, a list of leading state ministers and family trees for all the major dynasties.

The First Age of Industrial Globalization Maartje Abbenhuis, Gordon Morrell, 2019-10-17 This book offers an accessible and lively survey of the global history of the age of industrialization and globalization that arose in the wake of the Napoleonic Wars and collapsed in the maelstrom of the First World War. Through a combination of industrialization, technological innovation and imperial expansion, the industrializing powers of the world helped to create an interconnected global space that left few regions untouched. In ten concise chapters, this book relays the major shifts in global power, economics and society, outlining the interconnections of global industrial, imperial and economic change for local and regional experiences, identities and politics. It finishes with an exposé on the catastrophic impact of the First World War on this global system. *The First Age of Industrial Globalization* weaves together the histories of industrialization, world economy, imperialism, international law, diplomacy and war, which historians usually treat as separate developments and integrates them to offer a new analysis of an era of fundamental historical change. It shows that the revolutionary changes in politics, society and international affairs experienced in the 19th century were interconnected developments. It is essential reading for any student of modern global history.

Das Jahrhundert verstehen Dan Diner, 2015-11-02 Die große Interpretation des 20. Jahrhunderts. Dan Diner untersucht das politische Geschehen im 20. Jahrhundert auf zwei Ebenen: zum einen die Ebene der vordergründigen Konfrontationen von Werten und Ideologien; zum anderen die Ebene der traditionellen Konfliktlinien von Hegemonie und Nationalität, die bis ins 19. Jahrhundert zurückreichen. Das Hauptgewicht seiner Darstellung

liegt auf der katastrophischen ersten Jahrhunderthälfte wobei er die Ereignisse von der europäischen Peripherie her in den Blick nimmt bislang verborgen gebliebene Beziehungen aufdeckt und neue Interpretationen vorschlägt Globale Vorherrschaft und Fortschrittsglaube Johannes Paulmann, 2019-08-28 In seiner souveränen Synthese zeigt Johannes Paulmann wie sehr sich die Lebenswelt der Europäer zwischen 1850 und 1914 wandelte In dieser Epoche wurden materielle und geistige Grundlagen gelegt die bis in unsere Gegenwart hinein aktuell sind Gleichzeitig erlebte Europa den Höhepunkt seiner imperialen Machtentfaltung nie wieder erreichte der Kontinent ein vergleichbares Maß an globaler Vorherrschaft wie in den Jahren vor 1914 Selten veränderte sich so vieles so schnell wie in der zweiten Hälfte des 19. many groups and communities from socialists to scientists organised themselves across national borders The timeframe covers the rise of international movements and associations before the First World War the conflagration of 1914 and the emergence of new actors such as the League of Nations The book acknowledges the changing framework for transnational activism including its interplay with domestic politics and international institutions By tracing international movements and ideas the book aims to reveal and explain the multifarious and sometimes contradictory nature of internationalism

The Social Railway and Its Workers in Europe's Modern Era, 1880-2023 David Welsh, 2025-06-26 This thematically arranged book examines the evolution of rail transport and a number of railway workforces across Europe in the modern era from around 1880 to 2023 Each chapter explores how within the context of a social railway rail workers developed distinct national and international perspectives on the nature of their work and their roles in societies and states David Welsh convincingly argues that workers formed a raft of entirely new and enduring organisations such as trade unions that in turn became ramparts of hope Welsh goes on to consider how the insurgent character of these organisations produced moments of fury during tumultuous periods in the 20th century The Social Railway and its Workers in Europe's Modern Era 1880-2023 explores the national and European contexts in which both characteristics came to the fore including the ecology of fossil fuel technology coal and oil Above all it argues that social economic and political forces are not simply external scene shifting but integral to the history of railway systems The book examines the cultural construction of European railways through literature art and other forms of writing as well as recent oral history It also includes a detailed investigation of the role played by nationalisation and public ownership in Europe In the context of neoliberalism and globalization it proposes a 21st century programme for the social railway

Cataclysms Dan Diner, 2008-01-05 Cataclysms is a profoundly original look at the last century Approaching twentieth century history from the periphery rather than the centers of decision making the virtual narrator sits perched on the legendary stairs of Odessa and watches as events between the Baltic and the Aegean pass in review unfolding in space and time between 1917 and 1989 while evoking the nineteenth century as an interpretative backdrop Influenced by continental historical legal and social thought Dan Diner views the totality of world history evolving from an Eastern and Southeastern European angle A work of great synthesis Cataclysms chronicles twentieth century history as a universal civil war between a succession of conflicting dualisms such as freedom and equality race and class capitalism and communism liberalism and fascism East and West Diner's interpretation rotates around cataclysmic events in the transformation from multinational empires into nation states accompanied by social revolution and ethnic cleansing situating the Holocaust at the core of the century's predicament Unlike other Eurocentric interpretations of the last century Diner also highlights the emerging pivotal importance of the United States and the impact of decolonization on the process of European integration
