Caribbean and the British Isles Bonds of Empire thus traces West Indians participation in a complex process of cultural transition as they manipulated Britishness and their relationship to it not only as colonial peoples but also as Britons

The Rise and Fall of the British Nation David Edgerton, 2018-06-28 From the acclaimed author of Britain s War Machine and The Shock of the Old a bold reassessment of Britain s twentieth century It is usual to see the United Kingdom as an island of continuity in an otherwise convulsed and unstable Europe its political history a smooth sequence of administrations from building a welfare state to coping with decline Nobody would dream of writing the history of Germany say or the Soviet Union in this way David Edgerton s major new history breaks out of the confines of traditional British national history to redefine what it was to British and to reveal an unfamiliar place subject to huge disruptions This was not simply because of the world wars and global economic transformations but in its very nature Until the 1940s the United Kingdom was Edgerton argues an exceptional place liberal capitalist and anti nationalist at the heart of a European and global web of trade and influence Then as its global position collapsed it became for the first time and only briefly a real successful nation with shared goals horizons and industry before reinventing itself again in the 1970s as part of the European Union and as the host for international capital no longer capable of being a nation Packed with surprising examples and arguments The Rise and Fall of the British Nation gives us a grown up unsentimental history which takes business and warfare seriously and which is crucial at a moment of serious reconsideration for the country and its future

32 Counties Kieran Allen, 2021-04-20 This is Irish history seen anew from below bristling with practical lessons for working class struggle today Eamonn McCann The 32 counties of Ireland were divided through imperial terror and gerrymandering Partition was borne from a Tory strategy to defend the British Empire and has spawned a carnival of reaction in Irish politics ever since Over the last 100 years conservative forces have dominated both states offering religious identity as a diversion from economic failures and inequality Through a sharp analysis of the history of partition Kieran Allen rejects the view that the two cultures of Catholic and Protestant communities lock people into permanent antagonism Instead the sectarian states have kept its citizens divided through political and economic measures like austerity competition for reduced services and low wages Overturning conventional narratives 32 Counties evokes the tradition of James Connolly and calls for an Irish unity movement from below to unite the North and the Republic into a secular socialist and united Ireland

Periodizing Secularization Clive D. Field, 2019 Moving beyond the now somewhat tired debates about secularization as paradigm theory or master narrative *Periodizing Secularization* focuses upon the empirical evidence for secularization viewed in its descriptive sense as the waning social influence of religion in Britain Particular emphasis is attached to the two key performance indicators of religious allegiance and churchgoing each subsuming several sub indicators between 1880 and 1945 including the first substantive account of secularization during the fin de siecle A wide range of primary sources is deployed many of them relatively or entirely unknown and with due regard to their methodological and interpretative challenges On the back of them a cross cutting statistical measure of active church adherence is devised which clearly shows how secularization has been a reality and a gradual not revolutionary process The most likely causes of secularization were an incremental demise of a Sabbatarian culture coupled with the associated emergence of new leisure opportunities and transport links and of religious socialization in the church at home and in the school The analysis is also extended backwards to include a summary of developments during the eighteenth and early nineteenth centuries and laterally to incorporate a preliminary evaluation of a six dimensional model of diffusive religion demonstrating that these alternative performance indicators have hitherto failed to prove that secularization has not occurred The book is designed as a prequel to the author s previous volumes on the chronology of British secularization Britain s Last Religious Revival 2015 and Secularization in the Long 1960s 2017 Together they offer a holistic picture of religious transformation in Britain during the key secularizing century of 1880 1980
