The Hidden Science of Lost Civilisations David Wilcock, 2012-04-01 *The Hidden Science of Lost Civilisations* is a guided tour through the most incredible scientific mysteries in the modern world and a rediscovery of an ancient system of physics and spirituality that has since crumbled almost entirely into ruin David Wilcock's extensive knowledge of contemporary science has led him to rewrite the Mayan myth 2012 will not be the

end of the world but will be the start of mankind's golden period. A hidden intelligence, a living energy field that the universe is built from which David Wilcock calls the Source Field guides mankind's destiny. David Wilcock has studied this intelligence for over thirty years and has come to understand that the Source Field is the key to unlocking the mysteries mankind has always struggled to answer: who are we, how did we get here, and where are we going. Drawing upon alternative science as well as cutting edge quantum physics and consciousness research, Wilcock connects the scientific with lost traditions of ancient wisdom to predict what lies in mankind's future.

Techno-Orientalism 2.0 David S. Roh, Betsy Huang, Greta Aiyu Niu, Christopher T. Fan, Greta A. Niu, 2025-07-15. Building on the groundbreaking *Techno Orientalism: Imagining Asia in Speculative Fiction*, *History and Media* published by Rutgers University Press in 2015, *Techno Orientalism 2.0: New Intersections and Interventions* addresses the impact of a volatile post-pandemic present on speculative futures by and about Asians. The backdrop of this highly anticipated follow-up is a world that is radically different than in 2015: COVID-19 threats of a new cold war with China, Russia's invasion of Ukraine, and the reemergence of strong man politics around the world. An essential volume for this new critical juncture in Asian American history, *Techno Orientalism 2.0* catalogs intersectional dialogue with discourses such as Afrofuturism, Indigenous futurities, environmentalism, and disability studies. It also engages with recent high profile and lesser known works of Asian and Asian American speculative fiction, film, television, anime, art, music, journalism, architecture, state sponsored policies, and infrastructural projects, and the now dominant China Panic.

Mastaler,2019-04-17 Now more than ever it s critical that religious stories encompass a call to moral responsibility for the earth and to the global poor But the divorce between religious faith and science has left many people feeling unmoored and adrift at a time when we ought to be drawing closer to nature and each other It is a theological activity to see the world as it really is to look its suffering squarely in the face and tend to a wounded world The global poor especially women among them are some of the world s most disenfranchised people Their realities must inform the conversations about God and the world that people of faith are having in the church There is no salvation from the world only salvation with the world This means learning to live as a member of a community of mutual responsibility to look inward and ask ourselves how we might turn outward and live differently Concern for nature and social justice must become a central part of Christian moral life **The New York Times Magazine** ,2002
