**The Oxford History of the Novel in English** Cyrus R. K. Patell, Deborah Lindsay Williams, 2024-03-05 The Oxford History of the Novel in English is a twelve volume series presenting a comprehensive global and up to date history of English language prose fiction written by a large international team of scholars The series is concerned with novels as a whole not just the literary novel and each volume includes chapters on the processes of production distribution and reception and on popular fiction and the fictional sub genres as well as outlining the work of major novelists movements and tendencies This book offers an account of US fiction during a period demarcated by two traumatic moments the eve of the entry of the United States into the Second World War and the onset of the Covid 19 pandemic The aftermath of the Second World War was arguably the high point of US nationalism but in the years that followed US writers would increasingly explore the possibility that US democracy was a failure both at home and abroad For so many of the writers whose work this volume explores the idea of nation became suspect as did the idea of national literature as the foundation for US writing Looking at post 1940s writing the literary historian might well chart a movement within literary cultures away from nationalism and toward what we would call cosmopolitanism a perspective that fosters conversations between the occupants of different cultural spaces and that regards difference as an opportunity to be embraced rather than a problem to be solved During this period the novel has had significant competition for the US public's attention from other forms of narrative and media film television comic books videogames and the internet and the various forms of social media that it spawned If however the novel becomes a residual form during this period it is by no means archaic The novel has been reinvigorated over the past eighty years by its encounters with both emergent forms such as film television comic books and digital media and the emergent voices typically associated with multiculturalism in the United States

**The New Midwest** Mark Athitakis, 2017-02-06 Dives deep into Midwestern literature unpacking the mythology of the region and how today's writers are complicating our simple idea of the Heartland Huffington Post In the public imagination Midwestern literature has not evolved far beyond heartland laborers and hardscrabble immigrants of a century past But as the region has changed so in many ways has its fiction In this book the author explores how shifts in work class place race and culture has been reflected or ignored by novelists and short story writers From Marilynne Robinson to Leon Forrest Toni Morrison to Aleksandar Hemon Bonnie Jo Campbell to Stewart O'Nan this book is a call to rethink the way we conceive Midwestern fiction and one that is sure to prompt some new must have additions to every reading list Using the lens of novels and short stories published over the past 30 or so years Athitakis seeks to illuminate the ways we still lean on literary mythology of the Midwest when it comes to defining the region Chicago Tribune The New Midwest rightly praises the Midwestern novels of Marilynne Robinson Jeffrey Eugenides Toni Morrison and Jonathan Franzen but also points out works of comparable merit that warrant rediscovery The Washington Post The New Midwest is a crisp engaging tip sheet and guide for further reading Milwaukee Journal Sentinel A journey through the Midwest and through some key works by writers

Athitakis thinks are most effectively using the region in their fiction Kirkus Reviews      **Love and Work** Mieke Polderman,2014-09-01 Is there interaction between love and work If so in what ways does it appear The main incentive for this research is the notable increase of American and Dutch people who wish to spend more and more of their time working and who feel useless and robbed of their identity when separated from their jobs It seems that work is considered more fulfilling and satisfying than love which can be undermined by failing relationships tension depression violence addiction crime or angry and unmanageable children Whereas Proust described love in a milieu where most of the work was done by servants and artists Freud was convinced that love and work were the two main pillars of society This view has been echoed by psychologists sociologists philosophers and novelists However a new phenomenon is that men and women share love and work Finding the right balance between the two is a hot topic in how to books newspaper and magazine articles but the underlying connections have received little if any scrutiny In fact it may well be a mission impossible since as the Frankfurt School asserted the capitalist powers in search of profit urge politicians to lure men women and children onto the work floor by telling them work is a duty that not only will provide disposable income but also happiness and fulfillment in life Hence people internalize this message without asking themselves why continuous consumption is more important than giving and receiving love which they crave but seldom find Although focusing on middle class people between the ages of twenty five and forty who are travelling the highway of life have paid jobs a relationship of at least three years and children this study should be of interest to everyone      **The O.
