*Weltgeschichte in Göttingen* André de Melo Araújo, 2014-03-15 Im Zeitalter der Globalisierung gewinnt die Weltgeschichtsschreibung in besonderem Maße an Bedeutung Vor diesem Hintergrund untersucht André de Melo Araújo das bislang unerforschte Gesamtspektrum des spätmodernen universalhistorischen Denkens an der Universität zu Göttingen Dabei geht er den Debatten um die Weltgeschichtsschreibung nach die hier auf die Spitze getrieben wurden und eröffnet den Blick auf eine dynamische Vielfalt an konkurrierenden Wissensformen Araújo zeigt dass diese Formen trotz ihrer Verschiedenheit ein gemeinsames Wissensprinzip eint Sie alle untersuchten aus einer anthropologisch inspirierten Perspektive die Verhältnisse zwischen den konstitutiven Teilen des Menschen bzw den konstitutiven Teilen der Welt um auf das Ganze des Menschen sowie auf das Ganze der Welt zu schließen

**The Routledge Companion to Big History** Craig Benjamin, Esther Quaedackers, David Baker, 2019-08-01 The Routledge Companion to Big History guides readers through the variety of themes and concepts that structure contemporary scholarship in the field of big history The volume is divided into five parts each representing current and evolving areas of interest to the community including big history's relationship to science social science the humanities and the future as well as teaching big history and little big histories Considering an ever expanding range of theoretical pedagogical and research topics the book addresses such questions as what is the relationship between big history and scientific research how are big historians working with philosophers and religious thinkers to help construct meaning how are leading theoreticians making sense of big history and its relationship to other creation narratives and paradigms what is little big history and how does big history impact on thinking about the future The book highlights the place of big history in historiographical traditions and the ways in which it can be used in education and public discourse across disciplines and at all levels A timely collection with contributions from leading proponents in the field it is the ideal guide for those wanting to engage with the theories and concepts behind big history

**A History of Big History** Ian Hesketh, 2023-06-15 Big History is a seemingly novel approach that seeks to situate human history within a grand cosmic story of life It claims to do so by uniting the historical sciences in order to construct a linear and accurate timeline of threshold moments beginning with the Big Bang and ending with the present and future development of humanity itself As well as examining the theory and practice of Big History this Element considers Big History alongside previous largescale attempts to unite human and natural history and includes comparative discussions of the practices of chronology

universal history and the evolutionary epic      Big History, Small World Cynthia Stokes Brown, 2016-12-30 The newest way to think about the universe becomes engaging and personal in Big History Small World From the Big Bang to You by Cynthia Stokes Brown Her clear introduction to big history divided into eight thresholds of time is the perfect starting point for any reader intrigued by this rich blend of history and science Big History Small World is also the first book about big history specifically designed to be used in high school courses and with the free curriculum available from the Big History Project cofounded by Bill Gates and David Christian Big History Small World is organized into twelve chapters In the first chapter Brown discusses the scientific method In the last chapter she discusses the different ways people interpret big history and find meaning in it The other ten chapters are based on eight major turning points or thresholds in the cosmic story One threshold the emergence of life gets two chapters while a discussion of the future fills chapter eleven This book is not formatted as a traditional textbook although it can easily be used as one Each chapter has questions on the frontier of knowledge as well as suggestions of how the content applies directly to the reader to answer the perennial question Why do I have to learn this There are illustrations charts diagrams a glossary and timeline and short biographies of scientists and historians who have been influential in developing big history Cynthia Stokes Brown has taught world history in high school and trained high school teachers at Dominican University of California where she piloted big history courses and helped initiate the big history program now required for all freshmen She is the author of the general interest book on big history Big History From the Big Bang to the Present New York New Press 2nd ed 2012 and also wrote a university level textbook with David Christian and Craig Benjamin Big History Between Nothing and Everything New York McGraw Hill 2014 She is a founding member of the International Big History Association and associate editor of its publication Origins      **A**

**Companion to World History** Douglas Northrop, 2014-12-15 A COMPANION TO WORLD HISTORY This new volume offers insightful reflections by both leading and emerging world historians on approaches methodologies arguments and pedagogies of a sub discipline that has continued to be in flux as well as in need of defining itself as a relevant alternative to the traditional national regional or chronological fields of inquiry Choice The focus on the practicalities of how to do world history probably gives it its edge Its thirty three chapters are grouped into sections that address how to set up research projects in world history how to teach it how to get jobs in it how to frame it and how it is done in various parts of the globe It is an actual handbook in other words as opposed to a sample of exemplary work English Historical Review A Companion to World History offers a comprehensive overview of the variety of approaches and practices utilized in the field of world and global history This state of the art collection of more than 30 insightful essays including contributions from an international cast of leading world historians and emerging scholars in the field identifies continuing areas of contention disagreement and divergence while pointing out fruitful directions for further discussion and research Themes and topics explored include the lineages and trajectories of world history key ideas and methods employed by world historians the teaching of world history

and how it draws upon and challenges traditional approaches and global approaches to writing world history By considering these interwoven issues of scholarship and pedagogy from a transnational interregional and world global scale fresh insights are gained and new challenges posed With its rich compendium of diverse viewpoints *A Companion to World History* is an essential resource for the study of the world's past *Expanding Worldviews: Astrobiology, Big History and Cosmic Perspectives* Ian Crawford, 2021-06-07 This book collates papers presented at two international conferences held at the Australian National University in 2018 and Birkbeck College London in 2019 exploring the relationships between big history and astrobiology and their wider implications for society These two relatively new academic disciplines aim to integrate human history with the wider history of the universe and the search for life elsewhere The book will show that despite differences in emphasis big history and astrobiology share much in common especially their interdisciplinary approaches and the cosmic and evolutionary perspectives that they both engender Specifically the book addresses the unified all embracing nature of knowledge the impact of big history on humanity and the world at large the possible impact of SETI on astrobiology and big history the cultural signature of Earth's inhabitants beyond our own planet and the political implications of a planetary worldview The principal readership is envisaged to comprise scholars working in the fields of astrobiology big history and space exploration interested in forging interdisciplinary links between these diverse topics together with educators and a wider public interested in the societal implications of the cosmic and evolutionary perspectives engendered by research in these fields **International Encyclopedia of Human Geography**, 2019-11-29 International Encyclopedia of Human Geography Second Edition Fourteen Volume Set embraces diversity by design and captures the ways in which humans share places and view differences based on gender race nationality location and other factors in other words the things that make people and places different Questions of for example politics economics race relations and migration are introduced and discussed through a geographical lens This updated edition will assist readers in their research by providing factual information historical perspectives theoretical approaches reviews of literature and provocative topical discussions that will stimulate creative thinking Presents the most up to date and comprehensive coverage on the topic of human geography Contains extensive scope and depth of coverage Emphasizes how geographers interact with understand and contribute to problem solving in the contemporary world Places an emphasis on how geography is relevant in a social and interdisciplinary context Origin Story David Christian, 2018-05-22 This New York Times bestseller elegantly weaves evidence and insights into a single accessible historical narrative Bill Gates and presents a captivating history of the universe from the Big Bang to dinosaurs to mass globalization and beyond Most historians study the smallest slivers of time emphasizing specific dates individuals and documents But what would it look like to study the whole of history from the big bang through the present day and even into the remote future How would looking at the full span of time change the way we perceive the universe the earth and our very existence These were the questions David Christian set out to answer when he

created the field of Big History the most exciting new approach to understanding where we have been where we are and where we are going In Origin Story Christian takes readers on a wild ride through the entire 13.8 billion years we've come to know as history By focusing on defining events thresholds major trends and profound questions about our origins Christian exposes the hidden threads that tie everything together from the creation of the planet to the advent of agriculture nuclear war and beyond With stunning insights into the origin of the universe the beginning of life the emergence of humans and what the future might bring Origin Story boldly reframes our place in the cosmos

Obsession der Gegenwart Alexander C.T. Geppert, Till Kössler, 2015-10-28 Time is an obsession of the present yet current debates seem largely unaware of its historical formation throughout the twentieth century Given a century characterized by frequent ruptures and supersessions of competing temporal regimes it is remarkable that time has not played a more central role in its historicisation neither as analytical category nor thematic research subject The nine articles in this special issue set in Germany England Spain and Japan pursue both perspectives On the one hand they examine the conceptual role function and importance of time in and for the writing of history on the other they analyse changing regimes and historicity and the transformation of time practices empirically Criticising established standard narratives of a global standardization of time or its relentless acceleration this volume rather emphasizes the pluritemporality of the twentieth century and foregrounds the historical preconditions of our digitally driven present day simultaneities Thus it explores the possibilities of the historicisation of time as a fundamental category for thinking the twentieth century and offers a building block for a new time history

**How the Biosphere Works** Fred Spier, 2022-04-25 How the Biosphere Works Fresh Views Discovered While Growing Peppers offers a simple and novel theoretical approach to understanding the history of the biosphere including humanity's place within it It also helps to clarify what the possibilities and limitations are for future action This is a subject of wide interest because today we are facing a great many environmental issues many of which may appear unconnected Yet all these issues are part of our biosphere For making plans for the future and addressing our long term survival and well being an integrated knowledge of our biosphere and its history is therefore indispensable Key Features Documents what the biosphere is and what our position as humans within it is today Describes how the biosphere has become the way it is Summarizes the novel simple theoretical model proposed in the book and thus how the biosphere functions Predicts what the possibilities and limitations are for future human action Emphasizes how simple but careful observations can lead to far reaching theoretical implications

British Modernism and the Anthropocene David Shackleton, 2023 British Modernism and the Anthropocene Experiments with Time assesses the environmental politics of modernism in relation to the idea of the Anthropocene a proposed geological epoch in which humans have fundamentally changed the Earth System The early twentieth century was marked by environmental transformations that were so complex and happened on such great scales that they defied representation Modernist novelists responded with a range of innovative narrative forms that started to make environmental crisis on a

planetary scale visible Paradoxically however it is their failures to represent such a crisis that achieve the greatest success David Shackleton explores how British modernists employed types of narrative breakdown including fragmentation and faltering passages devoid of events to expose the limitations of human schemes of meaning negotiate the relationship between different scales and types of time produce knowledge of ecological risk and register various forms of non human agency Situating modernism in the context of fossil fuel energy systems plantation monocultures climate change and species extinctions Shackleton traces how H G Wells D H Lawrence Olive Moore Virginia Woolf and Jean Rhys undertook experiments with time in their novels that refigure history and the historical situations into which they were thrown Ultimately British Modernism and the Anthropocene shows how modernist novels provide rich resources for rethinking the current environmental crisis and cultivating new structures of environmental care and concern *Doom* Niall Ferguson,2021-09-13 Corona ist nicht die letzte Katastrophe der Menschheit nur ihre jüngste Katastrophen lassen sich nicht vorhersagen Und dennoch Wenn das Unheil zuschlägt sollten wir besser gerüstet sein als die Römer beim Ausbruch des Vesuv die Menschen im Mittelalter bei der rasenden Verbreitung der Pest in ganz Europa oder die Russen bei der Reaktorkatastrophe von Tschernobyl Aber sind wir das Haben wir nicht gerade in der Corona Pandemie alles erlebt an imperialer Berheblichkeit bürokratischer Erstarrung und tiefer Spaltung Doom schaut mit dem Blick des Historikers und Ökonomen auf die unterschiedlichsten Desaster in der Menschheitsgeschichte Wir müssen unsere Lektionen aus diesen historischen Beispielen lernen damit künftige Katastrophen uns nicht in den Untergang führen Mit einem aktuellen Vorwort des Autors für die deutsche Ausgabe **Yearbook of Transnational History** Thomas Adam,2018-05-31 The Yearbook of Transnational History is dedicated to disseminating pioneering research in the field of transnational history This inaugural volume provides readers with articles on topics such as soccer travel music and social policy These articles highlight the movement of ideas people policies and practices across various cultures and societies and explore the relations and connections and spaces created by these movements These articles make clear that historical phenomena from travel to music cannot be contained and explained within just one national setting The volume offers further a number of theoretical and methodological articles that provide insights into the concept of transnational history and the approach of intercultural transfer studies Last but not least the volume also includes a number of review articles These review articles provide an examination of books central to teaching transnational history as well as a historiographical exploration of the impact of transnational history on the field of sports history **Kondratieff waves** Brian J. L. Berry,Leonid E. Grinin,Andrey V. Korotayev,Philippe Jourdon,Lucas Bernard,Aleksandr V. Gevorkyan,Tom Palley,Willi Semmler,William R. Thompson,Arno Tausch,Denis J. Dean,Euel Elliott,Jonas Van Vossle,Peter Herrmann,Stephen I. Ternyik,Leo Nefiodow,Simone Nefiodow,Anton L. Grinin,Valentina M. Bondarenko,Nikolai D. Kondratieff,Barry K. Gills,Robert A. Denemark,2015-05-29 In the period from the 1920s to 1930s the theory of economic cycles underwent dramatic changes Due to the research of such

famous economists as Nikolay Kondratieff Joseph Kitchin Wesley Mitchell Simon Kuznets and Joseph Schumpeter the idea of a whole system of economic cycles with characteristic periods between two and sixty years was developed The idea of a system of intertwined economic cycles is nowadays paramount to the school of evolutionary economics and its development promises rather interesting future outcomes That is why this issue of our Kondratieff Waves Yearbook is devoted to the interconnections between various economic cycles As to the subtitle of this volume one should note that many of the contributors refer to the system of cycles and the fact that real economic cycles make up a system whereas among different types of cycles the Juglar Kuznets and Kondratieff cycles are the most important ones for the present day economic dynamics Although Kondratieff himself considered long waves as above all an economic phenomenon the theory of the long waves became however very actively developed in connection with their political and geopolitical aspects In this Yearbook the political aspect of Kondratieff waves is the subject of several articles in the second section The last section of this Yearbook is devoted to the heritage of Kondratieff and other prominent economists The year 2015 marks the 150th anniversary of the outstanding Russian economist one of the most prominent researchers of medium term economic cycles Mikhail Tugan Baranovsky and the volume is concluded with Kondratieff's article about him Concerning 2015 we should mention another anniversary namely 30 years since the death of Simon Kuznets 1901-1985 This edition will be useful for economists social scientists as well as for a wide range of those interested in the problems of the past present and future of global economy and globalization

*The Great Silence* Milan M. Ćirković, 2018-04-26 The Great Silence explores the multifaceted problem named after the great Italian physicist Enrico Fermi and his legendary 1950 lunchtime question Where is everybody In many respects Fermi's paradox is the richest and the most challenging problem for the entire field of astrobiology and the Search for ExtraTerrestrial Intelligence SETI studies This book shows how Fermi's paradox is intricately connected with many fields of learning technology arts and even everyday life It aims to establish the strongest possible version of the problem to dispel many related confusions obfuscations and prejudices as well as to offer a novel point of entry to the many solutions proposed in existing literature Ćirković argues that any evolutionary worldview cannot avoid resolving the Great Silence problem in one guise or another

**Time and Space in the Internet Age** Stephen Kern, 2024-08-01 This book analyzes how new technologies transformed life and thought between two periods 1880-1920 and 1980-2020 with a focus on temporal experiences of past present future and the spatial experiences of form distance and direction The signature contrast is between experiences of time and space transformed by the telephone in the earlier period and the Internet in the later period along with other sharp contrasts the sinking of the Lusitania in 1915 and the attack on the World Trade Center on 9/11 World War I and the Gulf Wars gravity bombs and smart bombs the pandemics of 1918 and 2020 assembly lines and flexible production Farmer's Almanacs and computer based weather predictions cash transactions and one click ordering decolonization and globalization internationalism and planetarity The book also makes three interpretive arguments the

Epistemological Argument covers how greater knowledge introduced uncertainties the Ethical Argument tracks how new technologies prompted ethical judgments about their value and the Re hierarchizing Argument tracks the erosion of spatial hierarchies most notably in religion society and politics with the increasing progress of secularization social mobility and democratization Time and Space in the Internet Age is a thought provoking study for academics and general readers interested in the history of technology and science
