Architektur und Diagramm Gleiter, Jörg H., Gasperoni, Lidia, 2019-10-31 Als wiederkehrendes Element spielen Diagramme eine wichtige Rolle im kreativen Prozess des architektonischen Entwurfs In ihnen sind Praxis und Theorie eng miteinander verbunden Aber ist die Architektur immer schon diagrammatisch gewesen Oder sollte man nicht von einer spezifisch diagrammatischen Architektur wie sie zu Beginn der 1920er Jahre entstanden ist und sich bei Postmoderne Dekonstruktivismus und computational design bis heute in der Transformation ihrer diagrammatischen Techniken etabliert hat Das Buch sammelt die Texte von Studierenden und widmet sich unterschiedlichen Funktionen des Diagramms zunächst als einem Medium der Architektur und anschließend einer Architektur die es zum privilegierten Werkzeug des Entwurfs erhoben hat As a recurring element diagrams play an important role in the creative process of architectural design Within them practice and theory are closely linked But has architecture always been diagrammatic Or shall one rather speak of a specific diagrammatic architecture one that arose in the beginning of the 1920s and has established its diagrammatic techniques through postmodernism deconstructivism and computational design until today The book collects student texts and dedicates itself to various functions of the diagram firstly as a medium of architecture then as an architecture that elevated the diagram to a privileged tool of design

Boredom and the Architectural Imagination Andreea Mihalache, 2024-07-18 Boredom as an impetus for architectural theory and practice Any theorist or practitioner of architecture must confront and even be compelled by boredom Called ennui Langeweile or acedia boredom is a pressing concern as the production and obsolescence of images accelerates with new technologies leaving individuals saturated with information presented in fleeting displays that are easy to produce easy to delete and easy to consume In this innovative book Andreea Mihalache discusses the work of a quartet of well known thinkers designer Bernard Rudofsky architects Robert Venturi and Denise Scott Brown and artist Saul Steinberg who all

recognized this form of exhaustion and shallowness as the disease of the modern world Rudofsky found it in a deeper and more intimate engagement between the human body and its environment Proclaiming Less is a bore Venturi and later Scott Brown explored excess as the remedy to boredom With detachment and irony Steinberg mocked the homogenous architecture of the American city Taken together Mihalache shows these four offer a comprehensive view of the alienated relationship of individuals with their world at three different yet interrelated scales the body the building and the urban space

Urban Comics Dominic Davies, 2019-02-21 Urban Comics Infrastructure and the Global City in Contemporary Graphic Narratives makes an important and timely contribution both to comics studies and urban studies offering a decolonisation and reconfiguration of both of these already interdisciplinary fields With chapter length discussions of comics from cities such as Cairo Cape Town New Orleans Delhi and Beirut this book shows how artistic collectives and urban social movements working across the global South are producing some of the most exciting and formally innovative graphic narratives of the contemporary moment Throughout the author reads an expansive range of graphic narratives through the vocabulary of urban studies to argue that these formal innovations should be thought of as a kind of infrastructure This infrastructural form allows urban comics to reveal that the built environments of our cities are not static banal or depoliticised but rather highly charged material spaces that allow some forms of social life to exist while also prohibiting others Built from a formal infrastructure of grids gutters and panels and capable of volumetric multi scalar perspectives this book shows how urban comics are able to represent repair and even rebuild contemporary global cities toward more socially just and sustainable ends Operating at the intersection of comics studies and urban studies and offering large global surveys alongside close textual and visual analyses this book explores and opens up the fascinating relationship between comics and graphic narratives on the one hand and cities and urban spaces on the other

Transpecies Design Adrian Parr Zaretsky, Michael Zaretsky, 2024-07-31 In May 2019 the United Nations released the Global Assessment Report on Biodiversity and Ecosystem Services which warned that human activities will drive nearly one million species to extinction in a few decades The primary reasons for this are habitat loss and biodiversity demise caused by changing climate pollution introducing nonindigenous species clearing land over population and consumption Given this situation humans must change course as both human wellbeing and the wellbeing of other than human species are imbricated in one another One way humanity can accomplish the needed transformation is to move beyond an anthropocentric view of life by embracing a transpecies approach that is premised upon interconnected flourishing Transpecies design as outlined in this book offers a new approach to regenerating the natural environment while honoring biodiversity Rather than presenting the human experience as the goal of design transpecies design takes the inextricable linkages connecting living things as both its starting point and end goal As such it moves beyond human experience serving as the fundamental ingredient for making better design processes and decisions This book is essential reading for artists designers and architects as well as students of architecture landscape architecture interior architecture art product design urban design planning environmental philosophy and cultural studies *The Palladio Method* Thorsten Bürklin, Martin Ebert, 2024-03-04 The architect Andrea Palladio was a draughtsman and a designer a mason and an engineer an innovator and an image maker His growing importance from the 16th century onwards was based on his profound expertise in architectural issues that went beyond singular tasks and situations and beyond his particular moment in history His way of thinking and solving architectural problems proved invaluable for centuries to come The contributions to this volume reflect on Palladio's method's beyond historicism and style and thus provide insights into design and building in our time Ghosts of Transparency Michael R. Doyle, Selena Savić, Vera Bühlmann, 2019-09-23 In this book the editors focus on architecture and communication from various different perspectives taking into account that the term architecture is used for buildings as well as in the context of computer software Data and software also impact on our cities raw data however do not convey any information in order to generate information and communication they have to be organized and must make sense to the reader The contributions avoid clear separation of the various communication spheres of their disciplines Instead they use the wide range of approaches to explore meanings an ambitious aim that leaves the destination wide open the reader is invited to share in this adventure **Identity Architects** Oliver Herwig, 2017 An exclusive look at the inner workings of Ippolito Fleitz Group the world renowned studio led by Peter Ippolito and Gunter Fleitz Peter Ippolito and Gunter Fleitz are the Identity Architects mentioned in the title of this book founders of Ippolito Fleitz Group and creators of thousands of

The City of Today is a Dying Thing Des Fitzgerald,2024-01-16 Lively irreverent and insightful Lauren Elkin Like Jon Ronson on town planners Endlessly funny seriously smart John Grindrod Cities are bad for us polluted noisy and fundamentally unnatural We need green space not concrete Trees not tower blocks So goes the argument But is it true What would the city of the future look like if we tried to build a better life from the ground up And would anyone want to live there Here Des Fitzgerald takes us on an urgent unforgettable journey into the future of urban life from shimmering edifices in the Arizona desert to forest bathing in deepest Wales and from rats in mazes to neuroscientific studies of the effects of our surroundings Along the way he reveals the deep lying and often controversial roots of today s green city movement and offers an argument for celebrating our cities as they are in all their raucous constructed and artificial glory
